Google

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

ACKNOWLEDGMENTS

The *Statistical Abstract of the United States* has been published annually for the past 72 years, and its present content and form are the result of the work of many persons during that period. Revisions are made each year to adapt it to meet current needs and uses, and to bring the various statistical series up to date.

The *Statistical Abstract* is prepared in the Office of Morris H. Hansen, Assistant Director for Statistical Standards. This issue was compiled by William Lerner under the supervision of Bruce L. Jenkinson and under the general direction of Morris B. Ullman, Chief, Statistical Reports Section. Kathleen H. Dugan is editor and Elma D. Beynon is editorial supervisor.

This is the thirteenth edition of the *Statistical Abstract* to be issued under the editorship of Kathleen H. Dugan who, on June 1, 1951, retired from the Government service. Every effort will be made to maintain the high standards characteristic of Mrs. Dugan's work.

The cooperation of many persons acting in either their official positions or as individuals, who contributed to the preparation of this volume, is gratefully acknowledged. The list of tables by source (pages XII–XV), as well as the source note following each table, indicates the various government and private agencies cooperating in furnishing information, assisting in the selection and preparation of the material, or otherwise contributing to the preparation of the *Statistical Abstract.*

SEPTEMBER 1951.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, *Statistical Abstract of the United States: 1951.* (Seventy-second edition.) Washington, D. C., 1951.

PREFACE

Use of the Statistical Abstract.—The *Statistical Abstract of the United States* presents in a single annual volume important summary statistics on the industrial, social, political, and economic organization of the United States, and includes a representative selection from most of the important statistical publications. It is, of necessity, limited primarily to national data and to limited summaries by States. It does not attempt to present the great wealth of local data available from many sources.

This book is designed to serve a twofold purpose: *First*, to serve as a convenient reference volume for quantitative summary information; and *second*, to serve as a guide to various important sources of statistical data. If the user finds that the information given here on a particular subject is not sufficiently detailed for his purpose, it is suggested that he refer to the publication or the agency from which the statistics were obtained for publication in the *Statistical Abstract*. The source of each table is given at the foot of the table. The original source usually contains additional statistical detail, and a more complete discussion of the definitions and concepts involved, than can be presented in the *Statistical Abstract*; also, it may supply data for small areas. Further, the agencies initially responsible for the statistics occasionally can supply still more detailed information on the basis of their unpublished tabulations or records.

1951 edition.—This edition, the 72nd annual issue of the *Statistical Abstract of the United States*, is designated by the year of publication. The statistics shown are the latest available in the early part of the calendar year. The time periods or dates covered by the information in the tables vary according to the practices followed by the various agencies responsible for their preparation.

This edition includes 1,045 tables in comparison with 1,064 tables in the previous edition. The slight reduction in number of tables was the result of the continuing intensive review of several sections in each edition of the *Statistical Abstract*. The objective of this review is to introduce new subject material of greater current interest and to eliminate data that are less timely or present greater detail than seems warranted in a summary publication.

Worthy of mention as significant additions of completely new subject material are a group of tables on advertising expenditures included in section 33, Distribution and Services, and the three tables on concentration of output, and mergers and acquisitions included in section 30, Manufactures. The material on advertising, particularly, represents an initial attempt in the *Statistical Abstract* to bring together data from a number of private sources in a field which is of great current interest.

Another change of major import in this edition is the presentation of data from the 1948 Census of Business. Availability of these data afforded an opportunity for thorough review of the Distribution and Services section. As a result, the new presentation is not only more current but also more complete both in terms of subject coverage and area coverage. New material is also included on dwelling units from preliminary reports of the 1950 Census of Housing, on school enrollment, on distribution of personal income, on Federal government expenditures for credit programs, civil works, and aid to State and local governments, and on a number of other subjects.

Finally, the two Agriculture sections and the Forests and Forest Products section (sections 24–26) have been brought into line with the material on these subjects appearing in *Historical Statistics of the United States* (see p. v) resulting in substantial revision and rearrangements of portions of these sections as well as in the addition of some new material.

With respect to content other than tabular, efforts to expand the general n preceding each section were continued, notably in section 20, Roads and Motor hicles. In addition, four new charts have been added, three of these to sections wl previously contained none.

Integration with historical supplement.—The completion of *Historical Stati of the United States, 1789–1945* in July 1949 (see p. V) made possible a revisio the annual *Abstract* which was started in the 1949 issue. In general, each sec of the annual *Statistical Abstract* is reviewed intensively to bring about an incre emphasis on statistics of current interest and, at the same time, to reduce the amo of historical detail presented.

Sections of the annual volume which have now been revised by comparison v the historical supplement are as follows: 1–3, 7, 8, 11–16, 19–21, 23–26, 29, and (see Contents, p. VII for section titles). The type and extent of revision va considerably, section to section.

In all sections containing related data, cross references to the historical sup ment have been included in the tabular headnotes. Finally, the historical appen (see Appendix I, tables A and B) first introduced in the 1949 edition has been c tinued and brings to date the statistical series shown to 1945 in *Historical Statis* This appendix has been arranged to serve a twofold purpose. The user of the ann *Statistical Abstract* will find there the earliest date to which the given statistics carried in the historical supplement. The user of the supplement will find each se brought to date, where possible, and the table number in the current *Statistical stract* in which the same or related data may be found. Where figures for 1945 earlier years are known to have been revised from those shown in the supplem the revisions have been listed in Appendix I, table B. No attempt has been m to list specific sources of data in Appendix I because of the space problem. In gene the source agencies are the same as for the same series specified in the supplement noted at the bottom of the current *Statistical Abstract* table.

With respect to the data contained by Appendix I in this edition, the very seri problem of space has placed limitations on the amount of data which should be sho in order to achieve completely the objectives mentioned above. In order to m room for figures for the current year, 1950 (see Appendix I, table A), it was necess to omit the column for 1947 which appeared in the 1950 edition. It was further nec sary to limit the presentation of the revisions of figures (see Appendix I, table only to those which have occurred or been brought officially to the attention of *Abstract* staff during the current year; revisions shown in the 1949 and 1950 *Abstr* have not been repeated in this issue. Hence, in order to bring *Historical Statis* to date, reference is necessary to the 1949, 1950, and 1951 issues of the *Statist Abstract.*

Supplements to the Abstract.—The *Statistical Abstract*, as an annual one-volu publication, is of necessity limited in amount of detail shown. Businessmen, teach librarians, public officials, professional workers, and others often require data individual cities, counties, metropolitan areas, and other small areas as well as States. Economists, teachers, students, and others frequently need more histor information. To meet such requests for more detail, a series of supplements to *Abstract* has been initiated.

The *County and City Data Book, 1949*, now in press, represents both a revis (bringing to date) and a consolidation of two earlier supplements, the *County D Book*, issued 1947, and the *Cities Supplement*, issued 1944. The *County and Data Book, 1949*, brings together 101 items of information for each State, each coun and each standard metropolitan area and 92 items for each of about 400 cities hav 25,000 or more inhabitants in 1940. Broad subject fields covered include the 1 Census of Business, 1947 Census of Manufactures, 1945 Census of Agriculture, 1 vital statistics, 1949 bank deposits, 1948 city government employment and finan

STATISTICAL ABSTRACT SUPPLEMENTS

County and City Data Book, 1949. A compact presentation of 101 items of statistical data for each county and standard metropolitan area in the United States and 92 items of statistical data for each of about 400 cities having 25,000 inhabitants or more in 1940. Washington, D. C., 1950. About 500 pages. (In press.) Represents both a revision and a consolidation of two earlier small-area supplements, the *County Data Book* issued in 1947, and the *Cities Supplement—Statistical Abstract of the United States* issued in 1944.

Historical Statistics of the United States, 1789–1945. A supplement to the *Statistical Abstract*, prepared with the cooperation of the Social Science Research Council. A compilation of about 3,000 statistical time series, largely annual, extending back through time to the earliest year for which figures are available. Includes definitions of terms and descriptive text. Specific source notes provide a basic guide to original published sources for further reference and additional data. Detailed alphabetical subject index. 363 pages. Issued 1949. Third printing. Price $2.50 (Buckram).

Purchase orders should be addressed to the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

COMMUNICATIONS 452

Telephone systems—Telegraph systems—Radio and television networks and broadcast stations—Newspapers, periodicals and books—Postal service.

POWER 467

Supply of energy—Electric energy; capacity of generating plants and production—Financial and operating statistics of electric utility companies—Rural electrification—Income account of natural gas companies—Gas utility industry—Water power.

ROADS AND MOTOR VEHICLES 480

Rural roads—State highway systems—Federal highway projects—Public roads finances—Motor-vehicle production—Motor-vehicle travel—State motor-vehicle registrations and revenues—Motor fuel consumption—Motor-vehicle accident fatalities.

TRANSPORTATION, AIR AND LAND—STEAM AND ELECTRIC RAILWAYS, EXPRESS COMPANIES, MOTORBUSSES, AND CIVIL AERONAUTICS 493

Steam railways: Mileage; equipment; employees; receiverships; capitalization, investment, income, dividends, revenue, expenses; freight and passenger service; accidents—Electric railways—Express companies—Pullman company—Motor carriers of property and passengers—Motorbus lines—Civil aeronautics.

WATERWAYS, WATER TRAFFIC, AND SHIPPING 524

Water-borne commerce, foreign and domestic—Ocean ports—Great Lakes ports—Rivers, canals, and connecting channels—Merchant marine—Panama Canal traffic—Net tonnage of vessels entered and cleared in foreign trade.

IRRIGATION, DRAINAGE, AND SOIL CONSERVATION 548

Irrigation enterprises—Irrigation of agricultural lands—Federal reclamation projects—Drainage on farms—Drainage enterprises—Soil conservation.

AGRICULTURE—GENERAL STATISTICS 559

Balance sheet of agriculture—Number and acreage of farms—Land utilization—Value of farm property—Value of farm products—Type of farm—Color and tenure of farm operators—Farm mortgage status and indebtedness—Indexes of farm prices—Farm income and expenditures—Commodity Credit Corporation, inventories and acquisitions—Farm facilities, roads, etc.—Farmers' marketing and purchasing associations—Farms and farm property in Territories and possessions.

AGRICULTURE—PRODUCTION AND RELATED SUBJECTS 595

Indexes of volume of farm production—Agricultural products exported and imported—Acreage, production, and value of crops—Average prices of crops and livestock—Grain—Hay—Tobacco—Sugar—Cotton—Cottonseed and products—Vegetables—Fruits—Animal and vegetable fats and oils—Foreign trade in foodstuffs and silk—Domestic animals and chickens on farms—Livestock or livestock production—Stockyard receipts and shipments—Meats, lard, and animal products—Dairy products—Oleomargarine—Poultry—Eggs—Cold storage holdings—Wool—Farm animals and farm crops in Territories and possessions.

Section

26. FORESTS AND FOREST PRODUCTS

Commercial forest land—Stand and growth of saw timber—Annual drain—National forests—Forest fires—Forest trees planted on farm lands—Lumber and lumber products.

27. FISHERIES

Quantity and value of catch—Canned and frozen fishery products—Exports and imports of fishery products—Fish propagation.

28. MINING AND MINERAL PRODUCTS

Mineral industries—Mineral products—Ferrous and nonferrous metals—Coke—Coal—Work stoppages in coal mining industries—Natural gas and natural gasoline—Crude and refined petroleum—Oil wells—Asphalt and gypsum—Cement—Stone—Salt—Employment and injuries in mineral industries.

29. CONSTRUCTION AND HOUSING

Expenditures for private and public construction—Construction contracts—Construction and building costs—Public housing—Characteristics and occupants of dwelling units—Rents and values—Facilities and equipment—Persons per room—Nonfarm mortgaged properties.

30. MANUFACTURES

Manufacturing establishments—Wage earners and production—Indexes of industrial production—Power requirements—Expenditures for plant and equipment—Inventories—Production and related information of selected products and groups of products—Printing and publishing—Motion-picture industry—Manufactures in Alaska, Hawaii, and Puerto Rico.

31. FOREIGN COMMERCE (INCLUDING INTERNATIONAL TRANSACTIONS)

International transactions—Foreign grants and credits—Foreign assistance—Foreign trade—Gold and silver—In-transit and transshipment trade—Duties collected.

32. COMMERCE OF TERRITORIES AND POSSESSIONS

Alaska—Puerto Rico—Hawaii—American Samoa—Virgin Islands—Guam.

33. DISTRIBUTION AND SERVICES (INCLUDING ADVERTISING)

Wholesale trade—Retail Trade—Chain stores and mail-order houses—Consumers' cooperatives—Department stores—Service establishments—Hotels—Places of amusement—Advertising.

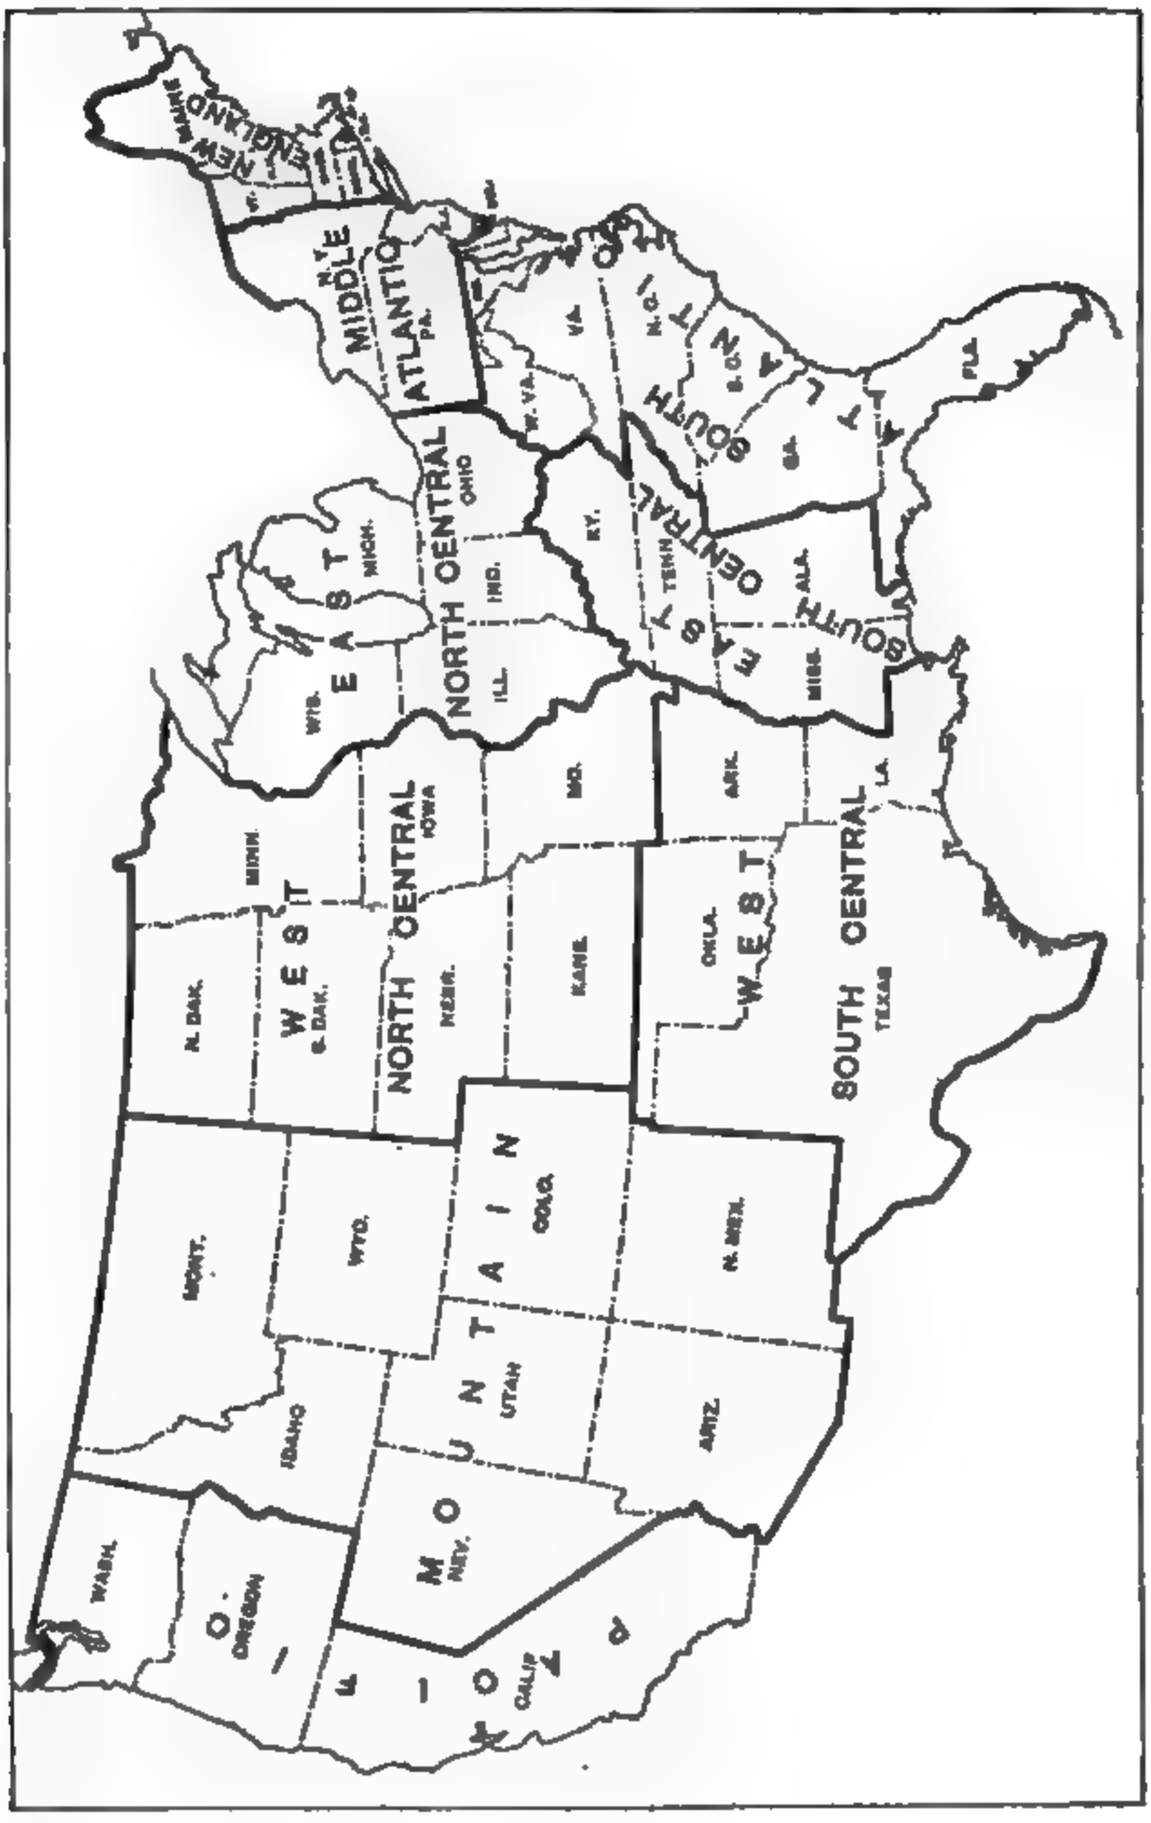

FIG. I.—MAP OF THE UNITED STATES, SHOWING CENSUS DIVISIONS

Source: Department of Commerce, Bureau of the Census.

1. Area and Population

This section relates to the population of the United States, its distribution, and its aracteristics. The principal source of these data is the Decennial Census of Popu-ion, a house-to-house enumeration made once every ten years beginning with 1790. e data shown here were selected chiefly from the Sixteenth and Seventeenth Censuses 940 and 1950), and from special census releases and reports, with the object of giving complete a description of the population of the United States as space permits. henever practicable, a historical series is given in order to show changes that have curred over periods of time. Most of the data presented apply to continental ited States, but some figures for Territories and possessions are included. It should noted that all State tables (tables 36–51) have been assembled near the end of the tion.

Related materials are presented in other sections of this volume. Data on house-ld composition are included in this section, but statistics of marriage and divorce e presented in section 2, Vital Statistics, Health, and Nutrition; statistics on family come are given in section 11, Income and Expenditures; and Census data on employ-ent and occupations are given in section 8, Labor Force, Employment, and Earnings. ata on the population in institutions as enumerated in 1940 are given in this section, t additional data on persons in mental institutions are given in section 2 and on pris-ers in section 5, Crime and Criminals. Tables on nativity and citizenship are cluded in this section, but related data are included in section 3, Immigration, migration, and Naturalization.

Population samples.—The use of sampling methods in the Sixteenth Census per-itted the collection of statistics on a larger number of inquiries than has heretofore en possible, the release of preliminary population statistics at an early date, and e tabulation of a great many social and economic characteristics of the population a relatively low cost.

Certain tables in this section and in the related sections mentioned above are based tabulations of samples of the population. Several samples were drawn and the gures shown were obtained by multiplying the sample results by a factor dependent on e sample size in each case. Sample B is a sample of all individuals from the 1940 opulation Schedule; Sample C and Sample W are samples of individual women 15 ars old and over from the 1940 and 1910 Population Schedules, respectively; Sample , a sample of households from the 1940 Population Schedule; and Sample F, a sample households based for some subjects on 1940 Population Schedule entries, and for her subjects on 1940 Housing Schedule entries. For Sample B, the sample size is 5 rcent. Samples C, D, and F are 5 percent in most areas, but they include 2½ per-nt samples in the most populous areas. Sample W is an 8-percent sample for the orth and the South, and about 12 percent for the West.

Exact agreement is not to be expected among the various samples, nor between em and the complete count, but the sample data may be used with confidence when rge numbers are involved, and may be assumed to indicate patterns and relation-ips where small numbers are involved. Specifically, any number of the size of a illion or over may be assumed to agree with a complete count within 1½ percent, hough most numbers of this size will agree within ¾ of 1 percent. Any number of e size of 100,000 may be assumed to agree with a complete count within 4 percent, hough most numbers of this size will agree within 2 percent. Most numbers as small 10,000 will agree within 10 percent. The sampling errors in subtotals formed by ddition of classes are covered by the same statements. More detailed statements garding the sampling errors are given in the original sources.

For years since 1940, several of the tables present statistics that are based on th Current Population Survey, conducted monthly by the Bureau of the Census. Thi survey covers a representative sample of about 25,000 households taken in selecte areas throughout the United States. A statement indicating the sampling reliabilit of estimates based on this sample is given in the Sampling Note, p. 181.

Population estimates.—Population estimates for dates after April 1940 which ar not the result of sample surveys are based on data from the 1940 Census and, in som cases, the 1950 Census; statistics and estimates of births and deaths provided by th National Office of Vital Statistics, United States Public Health Service; statistics o immigration and emigration reported by the Immigration and Naturalization Servic Department of Justice; and statistics on the armed forces provided by the Departmen of Defense. Intercensal estimates of State population are based on the same type of data and in addition make use of school statistics, war ration book registration and State censuses.

Urban and rural areas.—In the course of its history, the Bureau of the Census ha employed several definitions of urban territory.

That used for the 1950 Census classes as urban (a) places of 2,500 inhabitants o more incorporated as cities, boroughs, towns,[1] and villages; (b) the densely settle urban fringe, including both incorporated and unincorporated areas, around citie of 50,000 or more; and (c) unincorporated places of 2,500 inhabitants or more out side any urban fringe. All other territory is classified as rural.

According to the 1940 definition, the urban area was made up for the most pa of cities and other incorporated places having 2,500 inhabitants or more. In additio it included unincorporated political subdivisions with a population of 10,000 or mo and a population density of 1,000 or more per square mile; and in the States of Mass chusetts, Rhode Island, and New Hampshire, those towns (townships) which contai a village of 2,500 or more, comprising either by itself or when combined with oth villages within the same town, more than 50 percent of the total population of th town. The remaining area of the country was classified as rural. The definition o urban territory used in the 1940 Census was adopted substantially as stated above s the time of the 1910 Census and was slightly modified at later censuses.

In both the new definition of 1950 and the old definition of 1940, incorporate places of 2,500 or more inhabitants constitute the major component of urban territory The new definition differs from the old definition in substituting specially delineate urban fringes and unincorporated places of 2,500 inhabitants or more for the minc civil divisions which were specified as urban under the special rules given above.

The definition of urban territory in the Current Population Survey for Marc 1950 is similar to the 1950 Census definition with the main exception that unincor porated places of 2,500 or more inhabitants are classified as rural rather than urba

Farm and nonfarm residence.—The rural population is subdivided into the rura farm population, which comprises all rural residents living on farms, and the rura nonfarm population, which comprises the remaining rural population. The metho of determining farm and nonfarm residents used in the 1950 Census differs somewha from that used in earlier surveys and censuses. Persons on "farms" who were payin cash rent for their house and yard only were classified as nonfarm; furthermore, person in institutions, summer camps, motels, and tourist camps were classified as nonfarm This definition was also used in the March 1950 survey.

In this edition, figures by urban and rural residence for all dates prior to the 195 Census are in accordance with the old definition. Figures for 1950 are in accordanc with the new definition unless otherwise stated. For dates between 1940 and 1950, fig ures by urban and rural residence reflects the classification of areas as urban and rural i 1940. Thus, the urban total for 1949 represents the population living in 1949 in area

---

[1] Except in New England, New York, and Wisconsin, where "towns" are minor civil divisions of counti and are not necessarily densely settled centers like the towns in other States.

hich were classified as urban in 1940; it does not represent the total which would ave been classified as urban had all areas been reclassified as urban or rural on the asis of their 1949 population.

Households.—A "household," according to present usage of the Census Bureau, omprises all persons who occupy a dwelling unit, that is, a house, an apartment or ther group of rooms, or a room that constitutes "separate living quarters." A house-old includes the "related persons" (the head of the household and others in the welling unit who are related to the head) and also the lodgers, servants, or hired hands, f any, who regularly live in the house. The number of households, thus defined, s the same as the number of "private households" or "families" as used in the 1940 ensus reports. A person living alone or a group of unrelated persons sharing the ame living accommodations as partners is counted as a household.

The term "household," as used here, excludes the small number (about 80,000 in 1940) of institutions, hotels, large lodging houses, and other quasi households which re included as households in the census reports (and in figures shown in this edition) or 1920, 1910, 1890, and earlier years. The figures for 1900 and for 1930 and subsequent years, shown in this edition, are in conformance with the present usage of the erm "household" as defined above.

Family.—The term "family," as used here, refers to a group of two or more persons elated by blood, marriage, or adoption and residing together, and differs from the meaning of the term as used in the 1930 and 1940 censuses. A primary family consists of the head of a household and all (one or more) other persons in the household elated to the head. A secondary family comprises two or more persons such as guests, lodgers or resident employees and their relatives, living in a household or quasi household (other than the negligible number of such groups among inmates of institutions) and related to each other. In a household, a secondary family is not elated to the household head, but in a quasi household, a secondary family may include the head of the quasi household. This group, thus, now includes the two groups previously shown separately, "secondary family" and "family in a quasi household."

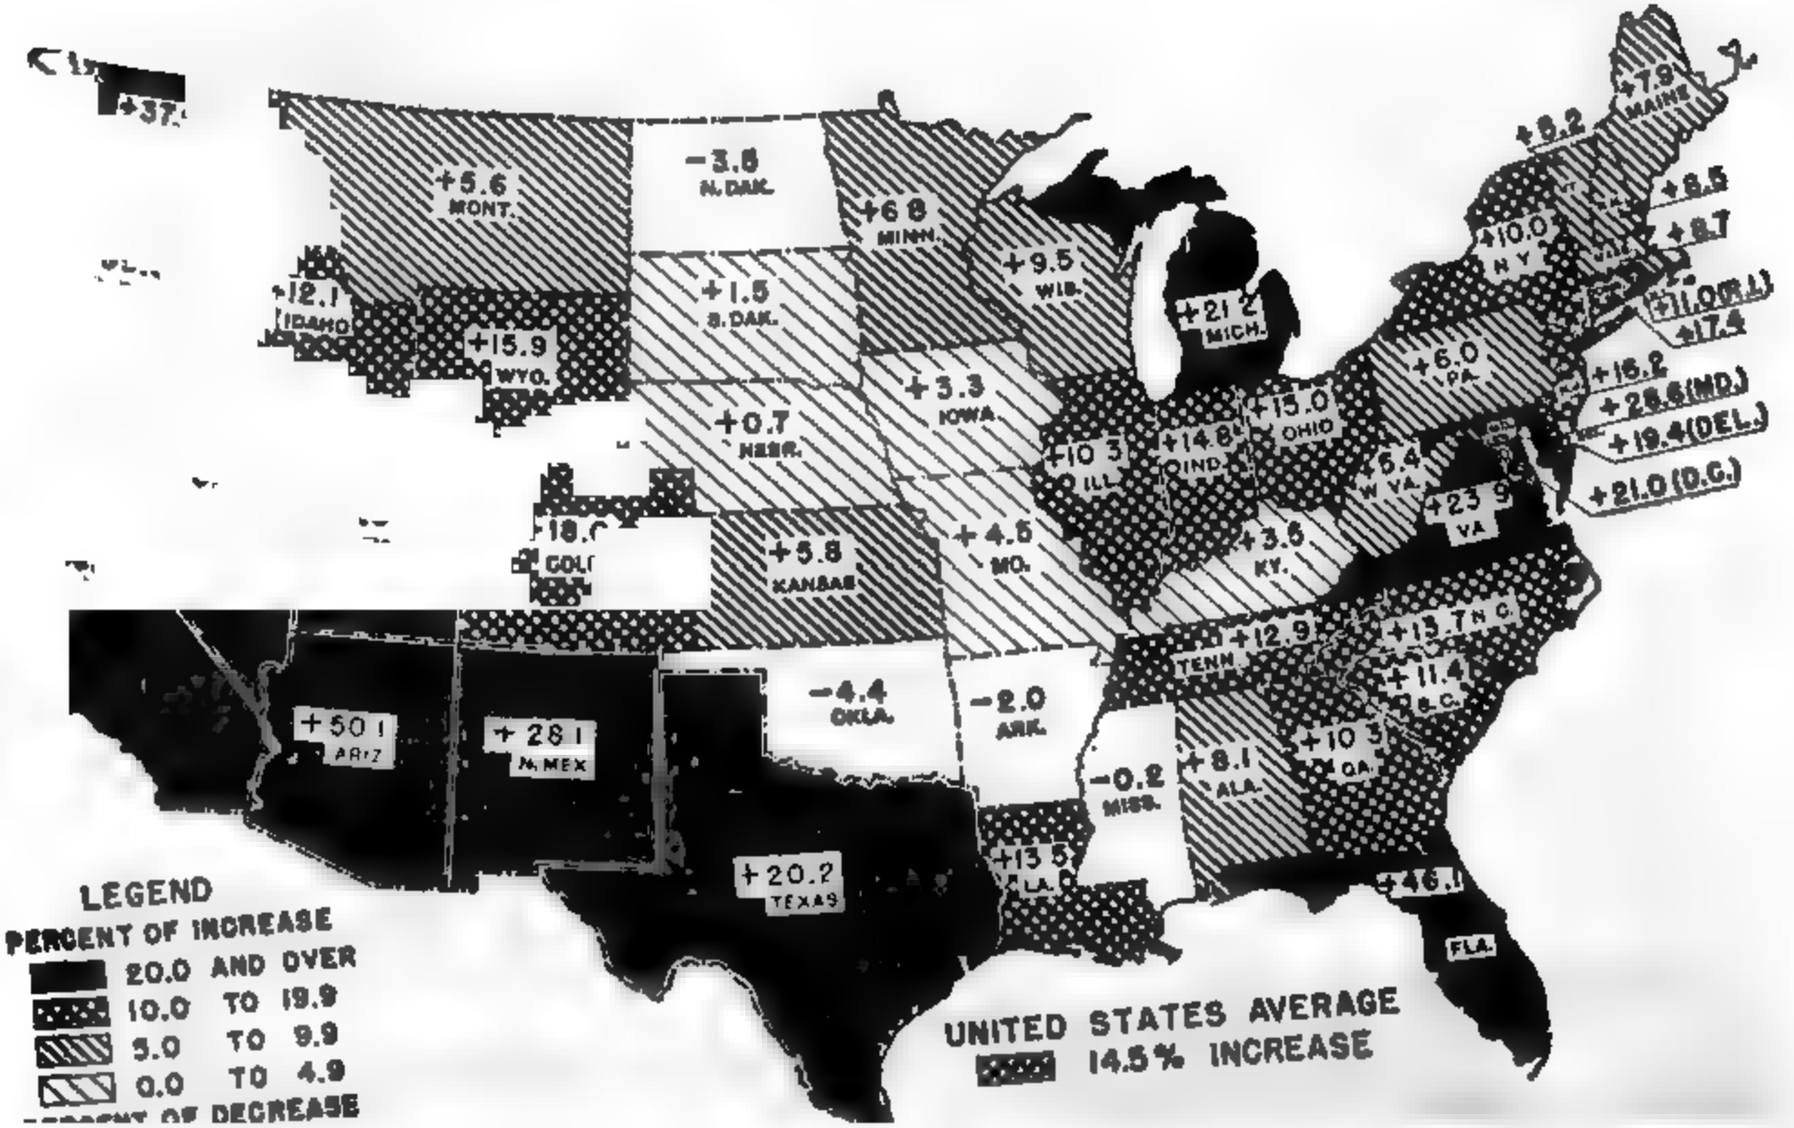
Subfamily.—A subfamily is a married couple with or without children, or one parent with one or more children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with which they live. The number of subfamilies, therefore, is not included in the number of families.

Married couple.—A married couple is a husband and his wife living together.

Unrelated individuals.—The term "unrelated individuals" as used here refers to persons (other than inmates of institutions) who are not living with any relatives. This term has the same meaning as the term "individuals not in families" used previously. A primary individual is a household head living alone or with persons all of whom are unrelated to him. A secondary individual is a person in a household or a quasi household such as a guest, lodger or a resident employee (excluding inmates of institutions) who is not related to the head or to any other person in the household or quasi household. This group now includes the categories "secondary individual" and "individual in a quasi household" used in earlier issues of the *Abstract*.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series B 24–25") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

FIG. II.—POPULATION CHANGE FOR STATES: 1940 TO 1950
[See table 28]



.—Territorial Expansion of Continental United States and Acquisitions of Territories and Possessions

ries of all territories listed under "Continental United States" were indefinite, at least in part, at time nisition. Area figures shown here represent precise determinations of specific territories which have narked upon maps, based upon interpretations of the several treaties of cession which are necessarily ible. These determinations were made by a committee consisting of representatives of various govern- agencies in 1912. Adjustments have been made in the areas as remeasured in 1940. See also *Historical cs*, series B 24–25]

No. 3.—Centers of Population: 1790 to 1950

["Center of population" is that point which may be considered as center of population gravity of the U. S. or the point upon which the U. S. would balance, if it were a rigid plane without weight and the population distributed thereon with each individual being assumed to have equal weight and to exert an influence on a centra point proportional to his distance from the point]

Year	North latitude			West longitude			Approximate location
	°	′	″	°	′	″	
1790	39	16	30	76	11	12	23 miles east of Baltimore, Md.
1800	39	16	6	76	56	30	18 miles west of Baltimore, Md.
1810	39	11	30	77	37	12	40 miles northwest by west of Washington, D. C. (in Virginia).

No. 13.—Median Age of Urban and Rural Population, by Race and Sex: 1930 and 1940

[Definition of Median.—The median may be defined as that item which is in the middle of a series arranged according to size. Thus, the median age is that age which divides a population group into two equal parts, one half being older, and one half younger, than the median. For definition of urban and rural population, see p. 2. See also *Historical Statistics*, series B 72-80]

[1] Less than one-tenth of 1 percent.
[2] Listed as Holland prior to 1910.
[3] Persons reported in 1910 as of Polish mother tongue born in Austria, Germany, and Russia have been deducted from their respective countries and combined as Poland.
[4] Turkey in Asia included with Turkey in Europe prior to 1910.
[5] Includes 4,635 persons born in Serbia and 5,363 persons born in Montenegro, which became part of Yugoslavia in 1918.
[6] Turkey in Asia included Armenia, Palestine, and Syria in 1910. Subsequent to 1910 Armenia included with "Other Asia."
[7] Newfoundland included with Canada in 1900.

[1] mber of childless women, deduct number of "mothers" from number of "total women."

Department of Commerce, Bureau of the Census; special report of Sixteenth Census, Differential 1940 and 1910—Women by Number of Children Ever Born.

No. 26.—Gross and Net Reproduction Rates, by Color, Urban and Rural Residence, and Regions: 1905 to 1910, 1930 to 1935, 1935 to 1940, 1942 to 1947, and 1944 to 1949

[Statistics for 1905 to 1910 based on Sample W, and those for 1930 to 1935 and 1935 to 1940 based on Sample C (see p statistics for 1942 to 1947 and for 1944 to 1949 based on Current Population Survey made in April 1947 and A 1949, see Sampling Note, p. 181. Urban-rural classification is in accordance with 1940 definitions; see p. 2. A reproduction rate of 1,000 means that each generation would just replace itself, if birth and death rates specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 impl potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduc rate of 1,000 means that if all women born at the beginning of a generation were to live through their reproduc period and continue birth rates existing at the time of their birth, they would barely reproduce themsel assuming no migration from outside the area. Where gross reproduction rate is less than 1,000, no improven in mortality alone would prevent a potential decline in population]

[1] For 1940 and subsequent years, includes persons returning from armed forces.
[2] For 1940 and subsequent years, includes (*a*) inductions and enlistments into armed forces, and (*b*) persons who have not moved but who are no longer in farm population because agricultural operations have ceased on the place where they are living.
[3] Positive entry indicates net gain in farm population due to beginning of farming operations on units previously not classified as farms; negative entries represent net loss due to cessation of farming operations on such units.
[4] Estimated by Bureau of Census.
[5] Not available.

No. 31.—Households, by Color of Head, With Population Per Household: 1890 to 1950

[Figures for 1890 to 1940 based on complete census. Figures for 1941 to 1945 estimated on basis of number of marriages and divorces and allowances for wartime effects on household formation. Figures for 1946 to 1950 based on Current Population Survey, see Sampling Note, p. 181. Statistics for 1900, 1930, and subsequent years represent (private) households only; those for 1890, 1910, and 1920 include the small number of hotels, institutions, and other quasi households. For definition of households, see p. 3. See also *Historical Statistics*, series B 1

Date	Households				Color of head

1950 (Mar. 15)	43,468,000	1,485,000	3.53	3.46		91.7		

[1] Computed by compound interest formula.

[2] Obtained by dividing total population by number of households (members of armed forces excluded 1941–1949); hence not strictly average size of household because about 2.5 percent of total population are members of quasi households.

[3] The number of households with a Negro as head was 1,410,769 in 1890; 1,833,759 in 1900; 2,173,016 in 1910; 2,328 in 1920; 2,803,756 in 1930; and 3,141,883 in 1940.

e: Yearbook of American Churches 1949; issued biennially under auspices of the Federal Council of the s of Christ in America.

No. 36.—Provisional Estimates of Population by States: July 1, 1940 to 1

In thousands. Includes members of armed services stationed in continental United States, but excludes overseas. Based on data from 1940 and 1950 Federal censuses, State censuses, school statistics, vital stati registrations for war ration books, immigration statistics, and data on armed forces. Supersedes estim published in Department of Commerce, Bureau of the Census, *Current Population Reports*, Series P-25, 12, 26, and 32, and in *Statistical Abstract of the United States* for prior years. Subject to revision when additi intercensal data and more detailed data from the 1950 Population Census are available. For enumerated p lation, 1790 to 1950, see table 38]

No. 37.—Population per Square Mile, by States: 1800 to 1950

For United States, population of continental U. S. has been divided by total land area. For each State or Territory, population at given census has been divided by land area as then constituted. However, 1930 figures are based on revised land areas used for 1940. Areas of Indian reservations, outside Indian Territory, are included in areas of States and Territories for all years, however, populations of reservations were not ascertained and therefore were not taken into account in computing densities prior to 1890. For other 1950 Census data, see tables 4, 5, 14, 28, 55 and 56]

DIVISION AND STATE	1800	1870	1880	1890	1900	1910	1920	1930 [1]	1940	1950

[1] Based on 1940 land-area measurement.
[2] Revised. Census of Southern States considered incomplete, but there has been no revision of State figures.
[3] Less than one-tenth of 1 person per square mile.
[4] Dakota Territory. Less than one-tenth of 1 person per square mile in 1860, 0.1 in 1870, and 0.9 in 1880.
[5] Oklahoma and Indian Territory combined. Separate data are as follows: Indian Territory 5.9 in 1890 and 12.7 in 1900; Oklahoma, 2.0 in 1890 and 10.3 in 1900.

[1] Includes persons (5,318 in 1830 and 6,100 in 1840) on public ships in service of the United States, not cred any division or State.

[2] Revised; unrevised figure is 38,558,371. Census of Southern States considered incomplete but there ha no revision of State figures, hence State figures do not add to total shown here.

[3] Includes 325,464, population of Indian Territory and Indian reservations, specially enumerated.

[4] Figure for 1860 for South Dakota represents entire Dakota Territory. Figures for 1870 and 1880 for Dakota and South Dakota are for the parts of Dakota Territory which later constituted the respective State

STATES: 1790 TO 1950

For regional totals, see *Historical Statistics*, series B 45-71]

No. 47.—In-Migrants, Out-Migrants, and Net Migration by Sex, by States: 1940

In-migrants are classified by division or State of residence in 1940; out-migrants by division or State of residence in 1935. In-migrants shown here represent "migrants between States" in table 21. See headnote, table 21. Minus sign (−) denotes net out-migration)

Division and State	Number					Percent of 1940 population

2. Vital Statistics, Health, and Nutrition

statistics.—Vital statistics, including statistics of births, deaths, marriages, rces, are compiled and published by the National Office of Vital Statistics, Health Service. Prior to July 16, 1946, this activity was carried on in the of the Census. Reports in this field are also issued by the individual State of vital statistics. Ordinarily, State publications contain more detailed data aphic and political subdivisions.

and deaths.—The national collection of mortality statistics on an annual s begun in 1900. For that year, the national death-registration area consisted tes, the District of Columbia, and a number of cities in nonregistration States. ional collection of birth statistics was begun in 1915 with 10 States and the of Columbia. Beginning with 1933, the birth and death registration areas nprised the entire United States.

following tables, births and deaths for 1940 and subsequent years are shown of residence [1] of the mother or of the decedent; those for earlier years by place rence of the birth or death.

statistics exclude fetal deaths (stillbirths), which are shown separately, and f military personnel overseas. Birth statistics include only live births.

ages and divorces.—National collections of statistics on marriages and divorces nited States were made for the years 1867–1906, 1916, 1922–32, 1937–40 and . Estimates have been made for the intervening years as well as for years l collections were not complete. At the present time, records of marriage are ıtrally in almost three-fourths of the States, and records of divorce in more e-half of the States. Marriage and divorce data in the following tables are y place of occurrence.

statistics rates.—Vital statistics rates are based upon Bureau of the Census es of the midyear population. The special situation created by the changes and disposition of the armed forces necessitated the use of different types of ion bases during the war and postwar period.[2] Briefly, birth and divorce r 1940–46 for the United States are based on the total population including s of the armed forces overseas; those for States on the civilian population in tes. Birth and divorce rates for 1947–49 and death and marriage rates for for the United States and States ore based on total population present in the cluding armed forces overseas.

idity.—Statistics on morbidity are compiled and published by the Public Health Each State health officer reports all diseases that are required by law or on to be reported in his State. The lists of diseases required to be reported the same for each State, although the most common communicable diseases ortable in all the States. Tables 95 and 96 show data on these reportable .

---

iscussion of methods of residence allocation and of significance of residence figures, see Vital Statistics of d States, 1946, Part II, pp. V–X.

discussion of the interpretation of crude rates during wartime, see *Summary of Natality and Mortality United States, 1943*, Vital Statistics—Special Reports, Vol. 21, No. 1, 1945; and *Marriage and Divorce in d States, 1887 to 1945*, Vital Statistics—Special Reports, Vol. 23, No. 9, 1946.

In addition, data on illnesses are obtained by special surveys. The most compreh sive survey in this field is the National Health Survey made in 1935–36. Reprint N 2384 from the Public Health Reports for May 29, 1942, gives a rather complete l of publications based on the National Health Survey.

Medical care.—Annual statistics of medical care on a Nation-wide basis are limit to data on hospital facilities obtained from the annual census of hospitals and insti tions conducted by the American Medical Association. Such censuses include o hospitals, sanatoriums, and related institutions registered by that organizati Therefore, a relatively large number of institutions are not included in the surv However, practically all of the large institutions in the country are canvassed with result that most of the hospital bed facilites are usually included.

An index to one aspect of medical care is also provided by the numbers of births a deaths occurring in hospitals and institutions. These data may be found in the Pub Health Service publications on vital statistics. Another aspect of medical care provided by statistics on patients in hospitals for mental disease, and in institutio for mental defectives and epileptics. Beginning with the 1947 report, the annu reports are issued by the National Institute of Mental Health, Public Health Servi Federal Security Agency; from 1926–46, the data were collected annually by the Bure of the Census.

Nutrition.—Statistics on the apparent consumption of food per capita by civili are estimated by the Bureau of Agricultural Economics of the Department of Ag culture. On the basis of these estimates, statistics on the nutritive value of the p capita food supply are computed by the Bureau of Human Nutrition and Ho Economics. These statistics are published quarterly by the Bureau of Agricultu Economics in the National Food Situation.

Statistics on Federal food distribution programs are compiled by the Producti and Marketing Administration of the Department of Agriculture and publish annually in *Agricultural Statistics*. Data on the quantity and costs of the food co modities distributed and the number of persons participating in the programs a available in this publication.

Under the provisions of Federal laws, food commodities are distributed for sch lunches and to institutions and welfare cases. Statistics on direct distributi without charge to recipients, of food commodities acquired by the Government a distributed under provisions of Section 32, Public Law 320 approved in 1935, Secti 6 of the National School Lunch Act of 1946, Public Law 471, Eighty-first Congre and commodities distributed under Section 416 of the Agricultural Act of 1949 which the recipient paid the freight from point of storage, are presented in tab 100–102. Distribution to ultimate recipients is accomplished through cooperati distributing agencies in States. Expenditures represent cost to the government the commodity as delivered to the State distributing agency and include cost purchase, handling, warehousing, and transportation charges, but exclude cost administrative expenses, except that $8.9 million expended for Section 416 co modities excludes transportation charges which were paid by recipients. Statist on the indemnity plan, which is a subsidy program to expand markets for agricultu products, maintain outlets for government-owned commodities, and support scho lunch programs, are shown in tables 100 and 102. Sponsors of school-lunch p grams are reimbursed by the government for local purchases of food on a basis quality and quantity of meals served. This program was started in 1943.

Historical statistics.—In this section, tabular headnotes (as "See also *Histori Statistics*, series B 1 and C 1–5") provide cross-references, where applicable, to *Histori Statistics of the United States, 1789–1945*. In that historical supplement to the *St tistical Abstract*, statistics are carried back year by year as far as possible. See al the historical appendix of the present issue of the *Abstract* for specific titles of seri and the earliest year shown in the supplement.

IRTHS, DEATHS, MARRIAGES AND DIVORCES AND RATES PER 1,000 POPULATION: 1900 TO 1949

:hs are for registration areas and represent registered births and deaths only; see table 59. For ese areas, see table 58. Marriage and divorce data are for the United States. For additional *rical Statistics*, series C 24, C 45, C 77–78]

No. 60.—Percent Completeness of Birth Registration, by Race and by States: Dec. 1, 1939, to Mar. 31, 1940

[Data obtained by matching special infant cards for all infants stated in the 1940 Census to have been born during period Dec. 1, 1939, to Mar. 31, 1940, with birth certificates for children born during this period. For further details, see *Studies in Completeness of Birth Registration, Part I*, Vital Statistics—Special Reports, Vol. 17, No. 18, p. 223. Data are by place of occurrence]

State	All races	White	Non-white	State	All races	White	Non-white

ed that all births in hospitals or institutions are attended by physicians.
sified as attended by "Other and not specified" persons form a somewhat greater proportion of the 1948 than in former years because of special problems in coding the person-in-attendance item in ucky, and Mississippi. The greater majority of the "Other and not specified" attendants in these ved to be midwives.
.05 percent.

[1] Deaths from deliveries and complications of pregnancy, childbirth, and the puerperium. Deaths for 1941 were classified according to sixth revision of International Lists of Diseases and Causes of Death; deaths for 1939-40 classified according to fifth revision. For 1949, 7 percent fewer deaths are assigned to maternal causes under sixth revision than under fifth.

[2] Includes only fetal deaths (stillbirths) for which period of gestation was 20 weeks (or 5 months) or more, or was not stated.

[3] Estimated. Based on a 10-percent sample of death certificates received in State vital statistics offices.

[4] Estimated.

No. 95.—Reportable Diseases—Number of Cases Reported, by Selected Causes, by Months: 1949

[Figures on number of reported cases of communicable diseases in this and following table should be interpreted with caution. Reporting of most of these diseases is known to be seriously incomplete, with degree of completeness varying from State to State. However, these figures have proved valuable to health authorities by indicating significant changes in disease incidence. They should not be interpreted as measures of total amount of illness caused by the diseases concerned]

Disease	Total	January	February	March	April	May	June	July	August	September	October	November	December

3. Immigration, Emigration, and Naturalization

Aliens or citizens arriving or departing by vessel or airplane at ports other than land border ports of the United States are recorded on passenger and crew lists or manifests by officials of the transportation companies, these lists or manifests being delivered to the Immigration and Naturalization Service of the Department of Justice. Persons going by land or air between Mexico or Canada and the United States are required to enter or depart at land border stations where they are registered by officers of the Immigration and Naturalization Service. Statistics of immigration and emigration are prepared from these and other records by the Immigration and Naturalization Service.

Immigration.—Although the reporting of alien arrivals was required at an early date in certain of the colonies and original States, the continuous record of immigration to the United States begins with the fiscal year ending September 30, 1820. Under the Act of March 2, 1819, passenger lists for all vessels arriving from foreign places were to be delivered to the local collector of customs, copies transmitted to the Secretary of State, and the information reported to Congress. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Bureau of Statistics of the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Annual reports were issued by this bureau from 1892 to 1932. From 1933 to 1940, a summary of the work of the Immigration and Naturalization Service was given in the Annual Reports of the Secretary of Labor. For 1941, the *Annual Report of the Attorney General* contained a report on immigration and naturalization. No report was published for 1942. For subsequent fiscal years, Annual Reports of the Immigration and Naturalization Service (submitted by the Commissioner to the Attorney General) were published in mimeographed form.

Since 1820 the official immigration statistics (see table 103) have changed considerably in completeness and in the basis of reporting. The early figures were for arrivals at Atlantic and Gulf coast seaports of the United States. Pacific coast arrivals were first reported in 1850. Aliens arriving at Canadian seaports en route to the United States were included after 1893. The reporting of arrivals over the land borders began in 1904 and was gradually extended up to 1908. Hawaii, Puerto Rico, and Alaska were treated as integral parts of the United States for purposes of immigration and emigration statistics beginning in 1901, 1902, and 1904 respectively. Travel between the Philippine Islands and the United States was not treated as immigration or emigration between July 1, 1898 and May 1, 1934.

Prior to 1868 arriving alien passengers were recorded, thereafter immigrant arrivals (i. e., omitting aliens coming for temporary stay). Subsequent to the passage of the Act of 1891 which increased the number of excludable classes, the basis of reporting was changed from arrivals to admissions (i. e., omitting aliens not permitted to enter the United States), except for the period 1895 to 1897, inclusive, when the reporting of arrivals was resumed.

Two classes of alien admissions are now reported, immigrant and nonimmigrant (see table 104). Included in the nonimmigrant class are aliens admitted under section 3 of the Immigration Act of 1924 (see table 110), returning resident aliens, students, and others. An immigrant alien is defined as an alien, other than a returning resident, admitted for permanent residence, under either quota or nonquota status. Nonquota

immigrants admitted comprise immigrants born in Canada, Newfoundland, Mexico, Cuba, Haiti, the Dominican Republic, the Canal Zone, and independent countries of Central and South America, and their wives and unmarried children under age 18 if accompanying or following to join such immigrants; relatives of citizens of the United States (wives, husbands, unmarried children under age 21); ministers and professors who enter solely for the purpose of carrying on their vocations, and their wives and unmarried children under age 18, if accompanying or following to join such ministers and professors; and others. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included either in the immigrant or nonimmigrant totals.

Emigration.—No official record of emigration was kept prior to July 1, 1907. Alien departures are classified as emigrant and nonemigrant (see table 104). For statistical purposes an alien emigrant is an alien resident of the United States departing with the declared intention of residing permanently in a foreign country. The nonemigrant category includes both alien residents of the United States departing for a temporary sojourn abroad, and aliens leaving the United States after a temporary stay.

Naturalization.—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization issued. Naturalization statistics were originally compiled by the Bureau of Immigration and Naturalization of the Department of Commerce and Labor, now the Immigration and Naturalization Service of the Department of Justice.

Alien registration.—The Act of June 28, 1940, required the registration of all aliens remaining in the United States (including Alaska, Hawaii, Puerto Rico, and the Virgin Islands) for a period of thirty days or longer. Aliens resident in the United States on August 27, 1940, were required to register on or before December 26, 1940. Aliens arriving subsequent to August 27, 1940, and not registered by the consul granting visas were required to register within thirty days of arrival.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series B 304") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. Also a detailed text statement indicates dates for which statistics of immigration from specific countries were first recorded. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

No. 103.—Immigration: 1820 to 1950

Data are for fiscal years ending June 30, except as noted; for periods they are totals, not annual averages. From 1819 to 1867 figures represent alien passengers arriving; for 1868 to 1891 inclusive and 1895 to 1897 inclusive, immigrant alien arrivals; for 1892 to 1894 and from 1898 to the present time, immigrant aliens admitted. See also *Historical Statistics*, series B 304]

No. 106.—Annual Quotas Allotted and Quota Immigrants Admitted, by Quota Country or Region: Years Ending June 30, 1936 to 1950

[Number of aliens admitted annually of any nationality subject to the quota law was limited by Immigration Act of 1921 to 3 percent of number of foreign-born of such nationality resident in continental United States as determined by 1910 census; and by population plan of act of 1924, to 2 percent according to 1890 census. National origins clause of 1924 act, effective July 1, 1929, provided that quota of any nationality be computed by applying to 150,000 the ratio between calculated number of inhabitants in continental United States in 1920 owing their origin to nationality concerned and the total inhabitants in the United States of all nationalities subject to quota law. (For estimates of white population by countries of origin, calculated as a basis for immigration quotas, see table 97, Statistical Abstract, 1932.) Under 1924 act, minimum quota is 100; for nonquota classes, see general note, p. 89]

[1] Persons born in colonies, dependencies, or protectorates, or portions thereof within barred zone, of European countries, who are admissible under immigration laws of United States as quota immigrants, are charged to quota of country to which such colony or dependency belongs or by which it is administered as a protectorate. Aliens who obtain visas during later part of fiscal year may be admitted in following year since visas are valid for period of 4 months. Nationality for quota purposes does not always coincide with actual nationality (Sec. 12, Immigration Act of 1924).

[2] Quota was 153,774 from 1934 to February 8, 1944, when quota of 105 Chinese, authorized by act of December 17, 1943 increased the maximum quota to 153,879. On July 4, 1946, quota for Philippine Islands was increased from 50 to 100, thereby raising total quota to 153,929. Quota was increased to 154,206 on July 27, 1949, by establishment of separate quotas of 100 each for Israel, Syria, and Lebanon, and abolishment of combined quota of 123 established for Syria and Lebanon.

[3] Number of quota immigrants exceeds quota because 50 percent of quota for future years may be mortgaged where necessary under Displaced Persons Act of 1948.

[4] For 1938 to 1945, Austrian quota included with German.

[1] Included with France.
[2] Includes 2,926 persons in 1947, 302 in 1948, 297 in 1949, and 586 in 1950 who were stateless.

Source of tables 118 and 119: Department of Justice, Immigration and Naturalization Service; Annual Report, telegram.

4. Education

Data on school attendance and on highest grade of school completed were obtained for each person in the United States as part of the 1940 Census of Population (see tables 120, 121, 124, 126–130). Annually, beginning in 1945, the Bureau of the Census has reported on school enrollment (and in 1947 on educational attainment) of the population, based on sample data obtained in the Current Population Survey (see tables 121–126, 129 and 131). The Biennial Survey of Education, conducted by the U. S. Office of Education, covers enrollment and attendance, teaching staff, finances, and other information on public education facilities at all levels, with less complete information for private schools (see tables 132–152). Public library statistics are also collected and published by this office (see table 153). Other statistical studies of the U. S. Office of Education, publications of the National Education Association, Annual or Biennial Reports of the State Departments of Education, and educational journals are the other chief regular sources of statistical materials in the field of education. Many special studies are made by research divisions of city school systems, by schools of education in colleges and universities, and by educational foundations.

Educational statistics for individuals.—The school attendance statistics are based on the replies to the enumerator's inquiry as to whether the person had attended or had been enrolled in, any regular school or college within a given period. Night schools, extension schools, or vocational schools are not included unless they are a part of the regular school system; and no correspondence schools are included.

The same census, for the first time, included a question on the formal educational attainment of each person, that is, the last full grade that the person had completed in the regular school system—public, private, or parochial school, college, or university. This question replaced the inquiry on illiteracy included in previous censuses.

The *median* year of school completed may be defined as the year which divides the population group into equal parts—one-half having completed more schooling and one-half having completed less schooling than the median. In the presentation of median year of school completed, the completion of the first year of high school is uniformly indicated by 9 and of the last year of college by 16, although there are some areas with only 7 years of elementary school.

Statistics for schools.—Working through national committees since 1910, the U. S. Office of Education, in cooperation with the State departments of education, has brought about a considerable degree of uniformity in recording and reporting educational statistics. Since about 1930, a similar movement has been in progress with institutions of higher education, the U. S. Office of Education serving as a clearing house for uniform procedures in records and reports.

The statistics presented in the *Abstract* from the Biennial Survey of Education include current national totals and summaries for a period of years. The national totals are reasonably complete for the types of education covered but data are not included for private schools of art, music, drama, etc., for private trade and vocational schools, or private correspondence schools. The introduction of the junior high school, which includes the 7th and 8th grades from the traditional elementary school and the 9th grade from the regular high school, has made it impossible to compare elementary school or high school data over a period of years except on the basis of grade enrollment, 8 grades as elementary and 4 grades as secondary. Similarly the change in status of a large number of normal schools and teachers' colleges to State colleges and universities makes comparison of normal schools and teachers' colleges over a period of years nonrepresentative of the complete teacher training field. Detailed statistics on the major fields of education are published in the reports of the Biennial Survey of Education. Information on vocational education is compiled by the U. S. Office of Education (see tables 154–156).

Data in this section relate to continental United States except as noted.

90.—Persons Attending School by Single Years of Age From 5 to 20, by Sex: 1910 to 1940

s for 1940 are based on attendance at or enrollment in any regular school or college, including night , extension schools, or vocational schools, if part of regular school system. Excludes correspondence . In the 3 prior censuses, school attendance question not restricted as to type of school or college. In uestion referred to period between Mar. 1, and Apr. 1, 1940; in 1930, to period between Sept. 1, 1929, and 1930; and in 1920 and 1910, to period between preceding Sept. 1 and census date (Jan. 1)]

Total expenditure for education (thousands of dollars) [3]	1,036,151	2,316,790	2,344,049	2,452,581	2,906,886	4,311,17
Per capita of total population	$9.80	$18.87	$17.77	$17.76	$20.78	$29.5
Per capita of population 5–17, inclusive	$37.37	$73.38	$78.65	$84.78	$100.43	$142.8
Per pupil enrolled [7]	$48.02	$89.84	$91.64	$105.04	$124.27	$178.8
Per pupil in average attendance [7]	$64.16	$108.49	$105.74	$124.68	$145.88	$204.8

[1] Census enumeration as of June 1, 1870 to 1900; Apr. 15, 1910; Jan. 1, 1920; Apr. 1, 1930 and 1940.
[2] Excluding population of Indian Territory which is not covered by public-school statistics, and also, fo 1890, population of Indian reservations. These were not enumerated at censuses prior to 1890.
[3] Current expense, capital outlays, and interest.
[4] Census estimate for July 1 (including armed forces overseas).
[5] Census estimate, excludes armed forces overseas.
[6] Beginning 1920, based on total number of teachers, supervisors, and principals.
[7] Beginning 1920, excludes data for night, summer, part-time, and continuation schools separately reported.

No. 154.—Vocational Schools and Vocational Teacher-Training Courses, Federally Aided—Number of Teachers and Students, by Class of School or Course and by Sex: Years Ending June 30, 1920 to 1949

[Institutions Federally aided are reimbursed from Federal funds provided under act known as "The Smith-Hughes Act," or the "National Vocational Education Act of 1917," and subsequent acts extending benefits of vocational education to Alaska, Hawaii, and Puerto Rico, and providing for further development of vocational education. These acts, administered by Office of Education, provide appropriations for reimbursement in part from Federal funds for expenditures by States and local communities for vocational education. Includes data for Hawaii beginning 1930, for Puerto Rico and Alaska beginning 1940]

5. Law Enforcement and Federal Courts

Criminal justice is administered in the United States for the most part by State and local officers and agencies. The United States Constitution reserves to the States the general police powers and only offenses against the United States Government or those which involve the crossing of State lines or an interference with interstate commerce can be made Federal offenses by act of Congress. Consequently, unless they occur in Federal territories or reservations, or on the high seas, or are committed by members of the armed forces, the usual criminal offenses such as murder, robbery, burglary, theft, assault, and rape are violations of State laws. There are fifty separate and distinct criminal law jurisdictions in the United States, one in each of the forty-eight States, one in the District of Columbia set up by act of Congress, and the Federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. Yet the general system of law enforcement is quite similar from State to State. Of course, there are among the States differences in detail and often substantial differences in the penalties provided for like offenses.

The administration of criminal justice can be divided into three parts. The first covers the activities of the police agencies, namely the investigation of crimes and the apprehension of persons suspected of committing them. This function involves agencies such as municipal police, county police, State police, sheriffs, constables, marshals, Federal agents, and many kinds of special officers. The second phase of the administration of criminal justice is the prosecution of those charged with criminal offenses to determine whether they are in fact guilty. The agencies concerned include the courts, justices of the peace, municipal, State and Federal grand juries, and prosecuting court officers. The third division of criminal administration is concerned with the punishment or treatment of those convicted of crime. While the courts usually determine the sentence after conviction, the administration of the penalty is carried out by prison, reformatory, jail, probation and parole officials.

Nearly all statistical data on crime and criminals are derived from the records and reports of the various agencies engaged in the administration of criminal law. Police statistics present the number of offenses reported, the number of persons arrested, and the offenses cleared by arrest. Arrest records provide data concerning sex, age, race, and other characteristics of the persons arrested and charged with crime. As the police agencies are largely local, a real problem is involved in collecting statistical data from the large number of such agencies. The Federal Bureau of Investigation obtains reports from police agencies and publishes information for the country as a whole in its semi-annual bulletin, *Uniform Crime Reports*. The great majority of urban communities are now reporting to the Federal Bureau and the reports received cover about three-quarters of the population of the United States. Information concerning offenses known to the police and the sex and age of persons arrested are shown by offense. Tables 157–160 are taken from *Uniform Crime Reports*. No centralized information is available on the police activities of the Federal agencies. Some information concerning the work of each Federal agency will be found in its respective annual report.

Court statistics for the country as a whole showing the number of persons prosecuted for criminal offenses and the outcome of the prosecutions are quite incomplete. In many States, an annual or biennial publication presents data on the criminal cases disposed of in the trial courts. This information may be published by the State Judicial Council or the Attorney General or some other State agency. The only national compilation of such information was that made by the Bureau of the Census which annually published statistical data on criminal cases disposed of in the general trial courts of

from sixteen to thirty States including the District of Columbia. The latest data collected by the Census Bureau was that for 1944. No national collection is now made.

Comprehensive information is collected on the business of the Federal courts by the Administrative Office of the United States Courts, and is published annually in the Report of the Director. Tables 161–167 are from this source.

As mentioned previously, the criminal jurisdiction of the Federal courts is limited by reservations to the States contained in the United States Constitution. For the same reason the jurisdiction of the Federal courts to hear and decide civil litigation is likewise limited. The bulk of civil litigation in the country is commenced and determined in the various State courts, and only when the United States Constitution and acts of Congress specifically confer jurisdiction upon the Federal courts may civil litigation be heard and decided by these courts. The question whether a State court or a Federal court has jurisdiction over a particular civil action is often difficult to determine, but generally speaking the Federal courts have jurisdiction over the following types of cases:

(1) Suits or proceedings by the United States; (2) Suits or proceedings against the United States; (3) Civil actions between private parties arising under the Constitution, laws, or treaties of the United States; (4) Civil actions between private litigants who are citizens of different States; (5) Civil cases involving admiralty, maritime, or prize jurisdiction; (6) All matters and proceedings in bankruptcy.

The Federal courts of original jurisdiction are known as the United States District Courts, and one or more of these courts is established in every State, Territory, or possession. Appeals from the district courts are taken to intermediate appellate courts of which there are eleven. They are known as United States Courts of Appeals. The Supreme Court of the United States is the final and highest appellate court in the Federal system of courts.

Statistics of prisoners committed to penal institutions have been collected and published for a longer period of time than have other criminal statistics. Nearly every State publishes annual data either for the whole prison system or for each separate State institution. A national compilation of data on prisoners in Federal and State prisons and reformatories was made annually by the Bureau of the Census until after the 1947 data were compiled when this work was transferred to the Bureau of Prisons. Statistical information covering persons received and discharged from State prisons and reformatories in 46 of the 48 States and from the District of Columbia and Federal prison systems was published annually in a comprehensive report, the latest of which covered the year 1946. A brief report for 1947 was included in the series, Current Population Reports, and will be the last report of this material by the Census Bureau. The Bureau of Prisons will publish 1948 and subsequent data. Tables 170–173 present data from these reports. The Federal Bureau of Prisons, in its annual report, *Federal Prisons*, provides as complete statistical information on prisoners as has been issued in this country. Tables 168 and 169 are from this source.

Information concerning juvenile delinquents and juvenile delinquency and the operation of many juvenile courts is collected and published by the Children's Bureau, Social Security Administration, Federal Security Agency.

Information on the prosecution and disposition of persons charged with misdemeanors and other minor offenses in the justice of the peace and municipal courts of the country is not compiled at the present time. Statistical data on such prosecutions may be found for some of the larger cities in the annual reports of the municipal court or of the municipal government. Likewise, there is no general compilation of statistical data on persons confined to county jails and local workhouses. The Bureau of the Census made a survey of jail prisoners for the calendar year 1933 and some information on incarcerated prisoners was published in connection with the 1940 decennial census but there is at present no regular compilation covering this field.

No. 157.—Offenses Known to the Police—Annual Trends, by Popula Groups: 1948 and 1949

No. 160.—Arrests, by Age Groups: 1949

Data from arrest records, evidenced by fingerprint cards received at F. B. I. during year, are limited to instances of arrests for violations of State laws and municipal ordinances. Excludes fingerprint cards representing arrests for violations of Federal laws or representing commitments to any type of penal institution. Data do not represent all persons arrested, as fingerprint cards are not forwarded to Washington for every individual taken into custody. Arrest records in lower age groups probably incomplete because of practice of some jurisdictions not to fingerprint youthful offenders]

No. 174.—Prisoners Executed, by Race and Offense: 1930 to 1948

[Covers all executions at hands of civil authorities and differs therefore from figures in table 170 which represent only those executed in State and Federal prisons. Excludes executions in military installations. The Army (including the Air Force) carried out 146 executions from 1942 to 1948, of which 93 were for murder (including 18 which also involved rape), 52 for rape, and 1 for desertion. There were no executions in the Navy]

6. Climate

Climatological data are gathered by the United States Weather Bureau at ab
10,000 stations. Of this number nearly 3,000 stations have autographic precipita
records, about 600 take automatic or hourly readings of a series of weather eleme
and the remainder record one observation a day. There are few records in existe
for stations before 1871, although some earlier and less detailed records began in
18th century. Data shown in these tables include long-time averages and extre
of the several elements for the vicinities indicated. Where the station has mo
but not out of the general vicinity, the data represent combined values for both
previous and the new locations.

The following tables contain data from a list of cities selected to give a gen
representation of the climate over the United States. The averages represent
arithmetic means of the period of record at the station. Relative humidity aver
are based on 3 to 4 daily observations. The number of degree days as used in t
187 is the average monthly sum of the differences between 65° and the daily m
temperatures below 65°, i. e. (65°–T°). Experience has shown that, in orde
heat buildings to a temperature of approximately 70°, the amount of fuel or
used per day is proportional to the number of degrees the average outside tempera
falls below 65°. The degree-day value is based on this assumption.

7. Public Lands and National Park System

Acquisition of original public domain.—Recognition of its sovereignty over its present continental land area was acquired by the United States Government through a series of international agreements and treaties. The United States, however, did not gain title to all of these lands by such agreements. At the time of acquisition of sovereignty over the areas involved, title to about 463 million acres rested in individual States and their political subdivisions or in private owners, which title was not relinquished to the Federal Government. Title to the remaining 1,442 million acres of land area passed to the United States and, with the exception of lands in the District of Columbia, is known as the *original public domain*. Any of such lands which the Government has not disposed of under the public-land laws, are generally referred to as *public-domain lands* or *public lands*.

In addition to the public domain, the United States Government has from time to time acquired, by purchase, condemnation, and gift, tracts of land needed for various public purposes. Such lands are often referred to as *acquired lands*, to distinguish them from public-domain lands. Complete statistics are not available as to the extent of such acquisitions.

Public-domain lands.—*Public-domain lands* or *public lands*, as used here, refers to those Federally owned lands to which the general body of public land laws apply. (See title 43, Code of Federal Regulations.) In general, it includes that portion of the *original public domain* not disposed of under the public land laws, and certain other lands declared by the Congress specifically to be *public lands*. As a general rule, it excludes *acquired lands*, as defined above. The term *Indian lands*, as used in tables 190–192, refers to that portion of the public domain lands that was ceded to the United States by Indian tribes on condition that part or all of the proceeds from their sale or other disposition would be covered into the Treasury in trust for the Indians.

Entries, selections, patents, and certifications.—The data on entries, selections, patents, and certifications refer to transactions which involve the disposal, under the public-land laws (including the homestead laws) of Federal public lands to non-Federal owners. In general, *original entries* and *selections* are applications to secure title to public lands which have been accepted as properly filed. Some types of applications, however, are not reported until the final certificate is issued.

Applications become *final entries* (perfected entries) upon issuance of a *final certificate* which is given to the applicant after he has complied fully with the requirements of the laws relating to his application. These requirements may include, in particular cases, settlement upon and improvement of the lands entered, or payment of statutory fees or purchase money. A *final certificate* passes equitable title to the land to the applicant. *Patents* are instruments which pass legal title to the lands to the applicant. *Certifications* are issued in lieu of patents in connection with certain State selections.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series F 1–7") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

FIG. VIII.—ACQUISITION OF THE TERRITORY OF CONTINENTAL UNITED STATES AND ORIGIN OF THE PUBLIC DOMAIN

No. 189.—Acquisition and Extent of Public Domain, Continental United States: 1781 to 1950

[See also *Historical Statistics*, series F 1-7]

Item	Acquisition of the original public domain			Estimated area of the public domain (selected years) [1]
	Total area	Land area	Water area	
	Acres	*Acres*	*Acres*	*Acres*
Aggregate, 1950	**1,462,466,880**	**1,442,200,320**	**20,266,240**	**412,000,000**
1912, estimate of public domain				*600,000,000*
1880, estimate of public domain				*900,000,000*
1853, Gadsden Purchase	18,988,800	18,961,920	26,880	
1850, estimate of public domain				*1,800,000,000*
1850, Purchase from Texas	78,926,720	78,842,880	83,840	
1848, Mexican Cession [2]	338,680,960	334,479,360	4,201,600	
1846, Oregon Compromise	183,386,240	180,644,480	2,741,760	
1819, Cession from Spain	46,144,640	43,242,720	[3] 2,901,920	
Red River Basin [4]	29,601,920	29,066,880	535,040	
1803, Louisiana Purchase [2]	529,911,680	523,446,400	6,465,280	
1803, estimate of public domain				*800,000,000*
1781–1802 (State Cessions)	236,826,600	233,415,680	3,409,920	

[1] Estimated from imperfect data available for indicated years.
[2] Data for Louisiana Purchase exclude area eliminated by Treaty of 1819 with Spain. Such areas are included in figures for Mexican Cession.
[3] Includes 33,920 acres subsequently recognized as part of State of Texas which is not a public domain State.
[4] Represents drainage basin of Red River of the North, south of 49th parallel. Authorities differ as to method and exact date of its acquisition. Some hold it as part of Louisiana Purchase, others maintain it was acquired from Great Britain.

[1] Includes receipts from such sources as following: Sales of public and ceded Indian lands; fees and commissions; mineral rentals, royalties, and bonuses; sales of timber; grazing fees and rentals; and land rentals. For period prior to 1861, receipts were $177,230,000.
[2] As of June 30, 1950, process of legal adjudication had not yet been completed for all grants and small changes in data for certain years may occur. For period 1802–60, total land granted to States was 96,977,000 acres. Includes grants for such public purposes as following: Educational, penal, and other public institutions and buildings; bridges, reservoirs, and other internal improvements; reclamation of swamp and arid lands; experiment stations; recreation areas; wildlife and forestry areas, military camps; and payments of bonds issued by local governments. Excludes grants to aid in construction of railroads, wagon roads, canals, and river improvements, or acreage of swamplands lost to States, for which States received indemnity in cash. Excludes data for Alaska and also 10,000 acres which is due to breakage and "less than" items.
[3] Includes homesteads. [4] Includes some classes of final entries and patents prior to 1911.
[5] Excludes commuted homesteads. [6] 1868–1870 only. [7] 1920 only.

No. 198.—Vacant Public Lands—Acreage, by States: June 30, 1900 to 1950

[Vacant public lands are those which are unappropriated and unreserved. The former represent lands not covered by an entry, the latter, lands not reserved for some public purpose, i. e., available for entry or selection under appropriate laws. Data cover vacant public lands outside Alaska withdrawn for classification in furtherance of Taylor Grazing Act and for conservation and development of natural resources. Figures exclude vacant public lands in Alaska estimated at 270,000,000 acres on June 30, 1950. For U. S. totals, see *Historical Statistics*, series F 8]

8. Labor Force, Employment, and Earnings

The various series of labor statistics covered in this section may be classified as of one of two types and these types differ somewhat in concept and purpose. One type of labor statistics is obtained by the "population approach," and includes data from the Census of Population and the Current Population Survey of the Bureau of the Census. These surveys involve an enumeration of individual persons and obtain information on employment activity from workers or members of their households. Each employed worker is counted only once, even though he may have held two or more jobs during a given period. The population approach permits a direct enumeration not only of employed persons but also of unemployed workers, the self-employed, domestic servants, service trade workers, and others who are not found on the pay rolls of any establishment.

The second type of labor statistics is obtained by the "establishment approach," and includes data from the monthly series of the Bureau of Agricultural Economics of the Department of Agriculture, and the Bureau of Labor Statistics of the Department of Labor. These data are similar to those provided by the Census of Manufactures and other industrial censuses in that they are based on reports from employers; i. e., farms, businesses, or industrial establishments. In adding together data from the reports of different employers the establishment approach counts twice or more any worker who works for two or more employers during a given pay-roll period, but permits a better analysis of such data as wages, hours, labor turn-over, and industry affiliation which can be more accurately obtained from employers' records than by inquiries directed to a worker or a member of his household. The sampling methods usually used in the collection of statistics from establishments yield estimates of employment that may be subject to some error as well as to a small downward bias arising from inadequate representation of new firms entering business. Accurate estimates are maintained, however, by periodic adjustment to "benchmark" data from tabulations of employer reports obtained in connection with social insurance programs and other sources, and by correcting current figures for selected industries for bias on the basis of past experience.

Labor force.—The labor force as now commonly defined in surveys utilizing the population approach includes persons 14 years old and over who had a job or were seeking one during a specified week. (For detailed definitions of various work status classes, see footnotes to table 216.) Population censuses earlier than 1940 used instead a concept of "gainful workers." This differed from the labor force concept in that it included all persons 10 years old and over who reported a gainful occupation, regardless of whether or not they were working or seeking work at the time of the census, and excluded in general new job seekers without previous experience in a gainful occupation. The Decennial Census of Population provides detailed data for the United States as a whole and for each State, city, and other area, including personal characteristics (sex, age, color, etc.) of the labor force, the numbers employed and unemployed, the number reporting themselves in each occupation and in each industry, and other items. The Census Bureau's Current Population Survey, a monthly enumeration of approximately 25,000 households throughout the Nation, provides current data published in *Current Population Reports—Monthly Report on the Labor Force.* Data presented include national totals, by sex and age, of the number of persons in the civilian labor force, the number employed in nonagricultural industry, the number employed in agriculture, the number unemployed, and the number of nonworkers. Also provided are data on hours of work and major occupational group of those em-

ployed and duration of unemployment of those unemployed. A statement indicatin the sampling reliability of estimates based on this sample is given in the Sampling Not p. 181.

Agricultural employment.—The establishment-type series are available for bot agricultural and nonagricultural employment. Agricultural employment estimate obtained by means of monthly mail returns from crop reporters, have been issued sinc 1909 by the Department of Agriculture.

Nonagricultural employment.—The monthly estimates of employment in non agricultural establishments prepared by the Bureau of Labor Statistics are based o voluntary reports from about 39,000 establishments in manufacturing industries an from about 104,000 establishments in selected nonmanufacturing industries, suppl mented by data from other Government agencies and adjusted at intervals to dat from tabulations of reports under social insurance programs. These estimates exclud proprietors of unincorporated businesses, self-employed persons, domestic servant and unpaid family workers, most of whom cannot be covered easily by the establis ment approach. Persons in the armed forces are also excluded. Estimates are avai able for *total* employment for 8 major industry divisions, for 21 manufacturing group for over 100 manufacturing industries, and for selected nonmanufacturing industrie Employment data as well as average weekly hours, and average weekly and hourl earnings are available for *production and related* workers in close to 200 manufacturin industries; in mining, power laundries, and cleaning and dyeing industries, and fo nonsupervisory employees and working supervisors in other selected nonmanufa turing industries.

The employment data are for all full and part-time employees who worked or receive pay for any part of the period reported.

The earnings data are gross, before pay-roll deductions and include overtime pr miums; they exclude irregular bonuses and value of payments in kind. Hours a those actually worked or paid for.

For government and certain other segments of employment, the employment repor of the Bureau of Labor Statistics are supplemented by data from the Interstate Com merce Commission, the Maritime Commission, the Civil Service Commission, th Bureau of the Census and other agencies.

Because of a major revision, continuous data for many currently published seri begin with January 1947. Continuity with data prior to 1947 has been maintaine for total employment in nonagricultural establishments and the 8 major industr divisions; for total and production-worker employment in all manufacturing, durabl and nondurable goods, the 21 major manufacturing industry groups, and the minin industries; for hours and earnings in all manufacturing, durable and nondurabl goods, and the mining industries.

Output per man-hour.—The Bureau of Labor Statistics prepares annual statisti on output per man-hour. Data are published for 20 manufacturing industries, mining industries, and all mining, 3 public utilities, and agriculture. Output per man hour refers to production, in physical units, per man-hour of work. The indexe measure the relationships between the volume of goods produced and one factor o input—labor time. The data do not measure the specific contribution of labor o capital nor do they reflect increased efficiency resulting from more economical use o fuel and materials, or more efficient integration of industries.

Labor turn-over.—Labor turn-over estimates are published monthly by the Burea of Labor Statistics for approximately 100 industries in 20 major divisions in manufac turing and for selected nonmanufacturing industries, on the basis of 6,800 reports fro cooperating establishments. Labor turn-over data are available on a continuou monthly basis from January 1930 for manufacturing as a whole. Because of th adoption of the Standard Industrial Classification beginning with final data for Decem *ber 1949,* labor turn-over rates for many individual industries and industry group *are available on a continuous* basis only from December 1949.

Work stoppages.—Statistical data on work stoppages due to labor-managemer disputes cannot be collected in the same fashion as other labor information since suc stoppages are sporadic and cannot be covered by a routine periodic reporting servic The basic measures of strike statistics as now compiled by the Bureau of Labor Stati tics are the number of stoppages, the number of workers involved, and the number man-days of idleness. Basic statistical data are obtained from the employers ar unions involved, as well as from third parties, such as State and Federal mediatic services, where possible. From the data given on the schedules, the Bureau prepar annual reports (published in the May *Monthly Labor Review* and later in bullet form) which give not only the complete and verified total figures for each month the year but also analyses on strikes by industry, State, city, and by causes, labo organizations involved, and other pertinent classifications.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical St tistics*, series D 11–31") provide cross-references, where applicable, to *Historical St tistics of the United States, 1789–1945*. In that historical supplement to the *Statistic Abstract*, statistics are carried back year by year as far as possible. See also the hi torical appendix of the present issue of the *Abstract* for specific titles of series and th earliest year shown in the supplement.

FIG. IX.—TRENDS IN THE LABOR FORCE: 1940 TO 1950

[See tables 204 and 206]

1940	110,443,129	[6] 52,148,251	47.2	42,985,704	9,162,547	13,840,000	5,040,000	36.4

[1] Figures for 1940 are revised estimates of labor force 14 years old and over during the census week; see Bureau of the Census, *Current Population Reports*, Series P-50, No. 2. Figures for prior years are for gainfully occupied 15 years old and over.

[2] See U. S. Bureau of the Census, *Supplementary Analysis of Twelfth Census*, p. 408.

[3] Includes 9,419 out of 11,130 persons for whom age was not ascertained.

[4] Final figures, after re-enumeration of Montgomery County, Maryland, in 1841.

[5] Excludes persons in Indian Territory and on Indian reservations, areas specially enumerated at that census, but for which areas no occupation statistics are available. Figures for the remaining area are corrected figures; for explanation, see analysis of occupation returns for 1890 in *Twelfth Census (1900) Special Reports*, "Occupations," pp. lxvi–lxxiii.

[6] May differ from 1940 data in other tables because of following adjustments to improve comparability: New workers have been excluded; children 10 to 13 (estimated) engaged in agricultural and nonagricultural pursuits have been included; persons on public emergency work previously in agricultural pursuits (estimated) have been included; number of persons classified in agricultural pursuits was revised as a result of occupation classification revision in 1940.

No. 204.—Employment Status of the Noninstitutional Population, by Sex: 1929 to 1950

[Thousands of persons 14 years old and over. Unemployed persons include persons looking for work and persons on public emergency work projects. Data in tables 204–206, based on Current Population Survey (see Sampling Note p. 181), are not entirely comparable with those presented in tables 202, 203, 216–221, which are based on reports of the 1940 census. For an explanation of differences, see Department of Commerce, Bureau of the Census; *Current Population Reports—Labor Force Bulletin* (Series P–50, No. 2). See also *Historical Statistics*, series D 11–21]

[1] Persons who had a job or business, but who did not work at all during entire survey week because of illness, bad weather, vacation, labor dispute, or because of temporary lay-off with definite instructions to return to work within 30 days of lay-off. Also persons scheduled to report within 30 days to new job.

[2] Nonagricultural data affected by occurrence of legal holidays in three survey weeks and are not, therefore, directly comparable with 1947 annual averages.

[3] Survey week contains legal holiday.

1950 [5]	10,348	8,040	2,308	99.00	121.00	4.45	4.50	43

[1] Data have been revised and are arithmetic means of monthly estimates of persons employed during last complete calendar week in each month ending at least one day before last of month.
[2] Weighted averages of wage rates as reported quarterly by crop reporters.
[3] Includes farm operators doing one or more hours of farm work and members of their families doing 15 hours or more of unpaid farm work during survey week.
[4] Includes all persons doing one or more hours of farm work for pay during survey week. Members of operator's families doing any farm work for cash wages are counted as hired workers.
[5] New series of wage rates begun in 1948; not entirely comparable with those of previous years.

Sampling Note

The sample used for the Current Population Survey (Monthly Report on the Labor Force) consists of approximately 25,000 households living in 125 counties and independent cities grouped in 68 areas. The chances are about 19 in 20 that the relative sampling variability of the estimated totals presented from the labor force survey are less than the following:

SEX	CIVILIAN LABOR FORCE			Not in the labor force
	Total	Employed	Unemployed	
	Percent	*Percent*	*Percent*	*Percent*
Both sexes	2	2	18	
Male	2	2	18	
Female	5	5	20	

The percentages shown in this table represent the maximum differences to be expected between totals estimated from the sample and those that would have been obtained by a complete census following the same procedures. These percentages are themselves subject to variation in different time periods, particularly as the magnitude being estimated change in level. Estimates of change from one month to the next are subject to somewhat smaller sampling variability for some of the items.

The sampling variability indicated above is illustrative of the variability that is to be expected for other subjects such as urban-rural distributions, migration, occupation, education, marital status, race, family relationships, income, etc. For specific evaluation of the sampling variability relating to these subjects, see the original releases of the Bureau of the Census.

[1] Includes (*a*) persons *at work*—persons who worked for pay or profit at any time during the week of Mar. 24–30, 1940, in private work or nonemergency Federal, State, or local government work, or assisted without pay on family farm or in a family business; and (*b*) persons *with a job but not at work*—persons not actually at work and not seeking work during the week of Mar. 24–30, 1940, but with jobs, businesses, or professional enterprises from which they were temporarily absent because of vacation, illness, industrial dispute, bad weather, or lay-off not exceeding 4 weeks with definite instructions to return to work on a specific date. The category *Employed (except on public emergency work)* includes not only employees but also proprietors, farmers, other self-employed persons and unpaid family workers.

[2] Includes persons who, during the week of Mar. 24–30, 1940, were at work on, or assigned to, public emergency work projects conducted by the Work Projects Administration (WPA), the National Youth Administration (NYA), the Civilian Conservation Corps (CCC), or State or local work relief agencies. In the interpretation of the data for persons on public emergency work, allowance must be made for the misclassification in the census returns of considerable numbers of public emergency workers. The number of persons reported in the census as on public emergency work in the United States was 2,529,606, whereas the number recorded on the pay rolls of the Federal emergency work agencies at about the time of the census was 2,906,196 excluding the NYA Student Work Program, and 3,377,978 including that program. The most common type of misclassification was the reporting of the emergency workers as *At work*. Persons on the NYA Student Work Program were very frequently returned as in school and not in the labor force. There is also evidence that a considerable number of emergency workers were classified as *Seeking work*.

[3] Includes persons without work of any sort in the week of Mar. 24–30, 1940, who were seeking work during that week. This category is composed of both experienced and new workers, the latter being persons who had not previously worked full time for 1 month or more.

[4] Includes inmates of penal and mental institutions and homes for the aged, infirm, and needy.

No. 218.—Occupation of Persons in the Experienced Labor Force and of Employed Persons (Except on Public Emergency Work), by Sex: 1940

["N. e. c." means not elsewhere classified. Persons in the experienced labor force comprise employed persons (except on public emergency work), persons on public emergency work, and workers seeking work who had formerly worked full time for 1 month or more, see footnotes on table 216. Occupation figures shown below for employed (except on public emergency work) refer to the occupation in which engaged during census week, and are based on complete census returns. Occupation figures for remaining experienced labor force groups, not shown separately in this table, refer to the occupation which the person regarded as his usual occupation and at which he was still physically able to work, and are based on Sample B, see p. 1. Figures for "Experienced labor force," therefore, represent a summation of figures for current and usual occupation based on complete census returns and Sample B, respectively]

OCCUPATION	EXPERIENCED LABOR FORCE			EMPLOYED (EXCEPT ON PUBLIC EMERGENCY WORK)		
	Total	Male	Female	Total	Male	Female

[1] Includes Government corporations. Based, for the most part, on reports of respective agencies to Civil Service Commission adjusted to improve comparability throughout period. Differs from data in tables compiled by Civil Service Commission in following respects: (1) Excludes seamen and trainees on ships contracted by U. S. Maritime Commission and substitute rural mail carriers; (2) includes temporary employees of Post Office Department hired to handle Christmas mail each year, Federal Reserve banks, and mixed-ownership banks of Farm Credit Administration.

Source: Department of Labor, Bureau of Labor Statistics. Data for executive branch based mainly on reports of Civil Service Commission. Current data published in Monthly Labor Review and in mimeographed releases.

No. 223.—Paid Civilian Employment in the Executive Branch of the Federal Government, by Area and Sex: June 1941 to 1950

[Prior to 1943, represents number on pay roll with pay on last regular pay period of month; thereafter, number i active-duty status as of last day of month. Data prior to 1944 exclude Panama Railroad Co. and Inland Wate ways Corp. Prior to 1947, excludes seamen and trainees of U. S. Maritime Commission, and beginning 194 excludes Central Intelligence Agency. See also *Historical Statistics*, series P 63 for earlier data on Washingto D. C. metropolitan area total]

[1] Average age is 40.6 years for all employees, 41.6 years for men, and 37.7 years for women. Age is determined by subtracting birth year from year 1947.

[2] Less than 0.1 percent.

[3] Pay rates represent base pay before any deductions for retirement, taxes, or bonds, but exclude overtime, bonuses, night differentials, etc. Pay rates other than annual rates are converted to annual full-time equivalent.

[4] Average length is 10.2 years for all employees, 11.3 years for men, and 7.2 years for women. Service represents all Federal employment, whether or not retirement deductions were taken from pay, and military service.

No. 238.—Indexes of Union Wage Rates and Weekly Hours in Selected Trades: 1941 to 1950

[Data for recent years cover 77 cities. From 1941 to 1942 study made as of June 1, except for building trades in 1942, made as of July 1. Since 1943 data collected as of July 1 for all trades except streetcar and bus operators for whom data are shown since 1947 as of Oct. 1, and printing data for 1948 as of Jan. 2. Relative rates are percentages which indicate changes in minimum hourly wage scales. Relative hours are percentages showing changes in straight-time weekly hours, account not being taken of loss of time from slack work or other causes nor of overtime work. Year to year changes in union scales are based on comparable quotations for each trade weighted by membership for current year. See also *Historical Statistics*, series D 152–163]

[Rates and hours for 1939=100]

YEAR	BUILDING TRADES						PRINTING TRADES					
	All building trades		Journeymen		Helpers and laborers		All printing trades		Book and job		Newspaper	
	Rate	Hours	Rate	Hours	Rate	Hours	Rate	Hours	Rate	Hours	Rate	Hours

No. 239.—Average Hours and Earnings on Construction Projects: 1935 to 1950

ITEM	1935	1937	1939	1941	1943	1945	1947	1948	1949	1950
FEDERALLY FINANCED PROJECTS [1]										
Average hours worked per month	96.7	126.1	124.7	160.3	168.1	168.8	158.8	165.8	159.1	158.0
Average monthly earnings	$63.96	$91.87	$99.39	$151.23	$193.96	$219.58	$217.83	$246.00	$259.00	$275.29
Average hourly earnings	$0.661	$0.729	$0.797	$0.943	$1.154	$1.301	$1.372	$1.484	$1.628	$1.743
PRIVATE BUILDING PROJECTS [2]										
Average hours worked per week	30.1	33.4	32.6	34.8	38.4	39.0	37.6	37.3	36.7	36.3
Average weekly earnings	$24.51	$30.14	$30.39	$35.14	$48.13	$53.73	$63.30	$68.85	$70.95	$73.73
Average hourly earnings	$0.815	$0.903	$0.932	$1.010	$1.252	$1.379	$1.681	$1.848	$1.935	$2.031

[1] Data on hours and earnings on Federal projects reported by accounting months rather than calendar months, and since pay periods are not uniform in any given month, some contractors report data for 4 weeks and others for 5. Consequently, average hours and earnings cannot be accurately computed by weeks and figures for average monthly hours and earnings tend to show certain irregularities reflecting this method of reporting.
[2] Data shown after 1947 include publicly financed projects and off-site construction workers.

Source: Department of Labor, Bureau of Labor Statistics; data on Federal projects published currently in monthly bulletin, Construction; private projects in Monthly Labor Review and in mimeographed releases.

No. 240.—Indexes of Output Per Man-Hour (Output Per Worker in Agriculture and Telegraph) for Selected Industries: 1929 to 1949

[1939 = 100. Productivity refers to output in physical units per man-hour of work (or per worker in agriculture and telegraph). Indexes of output per man-hour obtained by dividing indexes of production by indexes of man-hours. For explanation of various indexes used, see *Handbook of Labor Statistics*, 1947, p. 154. See also *Historical Statistics*, series D 213–217]

INDUSTRY	1929	1933	1937	1939	1941	1943	1945	1946	1947	1948	1949
All manufacturing:											
Output per man-hour	78.1	81.9	90.0	100.0	------	------	------	------	------	------	------
Mining: [1]											
Output per man-hour	69.9	78.8	88.0	100.0	103.9	101.5	106.1	107.0	111.1	110.9	108.3
Agriculture:											
Output per worker	91.6	89.2	105.3	100.0	106.5	115.5	120.1	120.2	115.9	130.1	133.8
Steam railroad transportation: [2]											
Revenue traffic per man-hour	75.1	83.0	95.2	100.0	115.5	150.9	139.5	129.1	135.0	133.2	131.5
Electric light and power: [3]											
Output per man-hour	54.1	68.1	89.6	100.0	123.2	182.7	182.5	160.7	167.0	171.0	------
Telephone: [4]											
Output per man-hour	------	------	88.8	100.0	99.5	97.9	98.8	94.8	94.0	93.3	99.1
Telegraph: [5]											
Output per employee	------	------	93.0	100.0	92.9	107.9	116.4	109.6	121.0	117.0	122.2

[1] For 1929 and 1933, covers almost all industries; for 1937 to 1949, represents 6 principal industries (bituminous coal; anthracite; crude petroleum, natural gas and natural gasoline; iron; copper; and lead and zinc).
[2] Refers to Class I steam line-haul railroads.
[3] Refers to privately owned utilities.
[4] Refers to Class A telephone carriers.
[5] For principal wire-telegraph and ocean-cable carriers. As satisfactory data on average weekly hours are not available before 1943, an index of output per man-hour is not presented.

Source: Department of Labor, Bureau of Labor Statistics.

No. 243.—Monthly Labor Turn-Over Rates (Per 100 Employees) in Manufacturing Industries: 1939 to 1950

[Month-to-month employment changes as indicated by labor turn-over rates are not precisely comparable to those in table 210, as the former are based on data for entire month while the latter refer to a one-week period ending nearest middle of month. Labor turn-over data, beginning in Jan. 1943, refer to wage and salary workers. The turn-over sample is not so extensive as that of the employment survey—proportionately fewer small plants are included; printing and publishing (since April 1943), canning and preserving, and several other industries are not covered]

Class of turn-over and year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Accession:												
1939	4.1	3.1	3.3	2.9	3.3	3.9	4.2	5.1	6.2	5.9	4.1	[illegible]

1950	4,843	19.2	2,410	6.9	38,800	.44	16.1	169	214	22

[1] Includes duplication where same workers were involved in more than 1 stoppage during year.

[2] "Total employed workers" includes all workers except those in occupations and professions where strikes rarely if ever occur. In general, "total employed workers" includes all employees except following groups: Government workers, agricultural wage earners on farms employing less than 6 workers, managerial and supervisory employees, and certain groups which because of nature of work cannot or do not strike (such as college professors clergymen, and domestic servants). Self-employed and unemployed persons are excluded.

[3] Obtained by multiplying average number of employed workers each year by number of days worked by most employees during year.

Source: Department of Labor, Bureau of Labor Statistics; Handbook of Labor Statistics and other records. Basic data are currently published in May issues of Monthly Labor Review.

No. 246.—Work Stoppages—Major Issues Involved and Duration: 1948, 1949 and 1950

[See headnote, table 245. Data by issues based on stoppages beginning in year; duration data based on stoppages ending in year. See also *Historical Statistics*, series D 230–238]

MAJOR ISSUES AND DURATION	NUMBER OF WORK STOPPAGES			NUMBER OF WORKERS INVOLVED[1] (thousands)			NUMBER OF MAN-DAYS IDLE (thousands)

9. Military Services and Veterans' Affairs

This section includes data on the Army, the Navy, the Air Force, and on the various aspects of government programs for veterans.

Military services.—Data are compiled from the various branches as indicated in the source notes. A summary table prepared by the Bureau of Labor Statistics, similar to their tables on employment in the section on Labor Force, is also included. For expenditures of Federal government on military services, see tables 351, 352, and 354.

Veterans' Administration.—The Veterans' Administration was established as an independent agency under the President by Executive Order 5398, July 21, 1930, in accordance with the act of July 3, 1930 (46 Stat. 1016; 38 U. S. C. 11).

The Veterans' Administration administers laws authorizing benefits for former members of the armed forces and for the dependents and other beneficiaries of deceased former members of such forces. The Veterans' Administration benefits available under various acts of Congress include: Compensation for service-connected disability or death; pension for non-service-connected disability or death, emergency officers' retirement pay; vocational rehabilitation for service-connected disability; education and training; guaranty or insurance of home, farm, and business loans and, under certain conditions, direct home loans; readjustment allowances for unemployment or self-employment; U. S. Government and National Service Life Insurance; hospitalization; domiciliary care; outpatient medical and dental care for service-connected disability; prosthetic and other appliances; special housing for certain seriously disabled veterans; automobiles or other conveyances for certain disabled veterans; World War I adjusted service certificates; a guardianship program for the protection of estates derived from Veterans' Administration benefits paid to incompetent or minor beneficiaries; burial allowances; and burial flags.

[1] Excludes pay of retired and inactive reserve personnel.
[2] Prior to March 1944, includes persons on induction furlough; prior to June 1942 and after April 1945, includes Philippine Scouts.
[3] Covers Navy, Marine Corps, and Coast Guard. Includes missing personnel and personnel in hands of enemy.
[4] Covers Navy, Marine Corps, and Coast Guard. For Navy proper and Coast Guard, includes cash payments for clothing allowance balances.
[5] Includes men's share of family allowances but excludes Government's contribution. Represents actual expenditures for Army through April 1947 and for Coast Guard for all periods. Other data represent estimated obligations based on monthly personnel count.
[6] Represents Government's contribution. Excludes men's share.
[7] Includes leave payments of $716,313,000 in 1946, $1,526,227,000 in 1947, $37,127,000 in 1948, $939,000 in 1949, and $140,000 in 1950 (representing face value of bonds and cash payments) to enlisted personnel discharged prior to Sept. 1, 1946, for accrued and unused leave, and to officers and enlisted personnel then on active duty for leave accrued in excess of 60 days.
[8] Data for January–June only. Starting July 1950, data restricted.
[9] Family allowances included under pay roll.

Source: Department of Labor, Bureau of Labor Statistics. Current data restricted.

No. 249.—Military Personnel on Active Duty: 1922 to 1950

[Includes National Guard, Reserve, and retired Regular personnel on extended or continuous active duty. Warrant officers and flight officers are included under officers. Enlisted data include West Point cadets, Annapolis midshipmen and other officer candidates. Excludes Coast Guard]

[1] Includes Philippine Scouts; excludes contract surgeons. Data for 1922–47 include personnel in Army Air Forces and its predecessors (Air Service and Air Corps). For 1948 and 1949 includes Air Force personnel assigned to Army command; excludes Army personnel assigned to Air Force Command. 1950 figures consist entirely of Army Department personnel, since Air Force Department personnel no longer assigned to U. S. Army organizations.

[2] Nurse Corps included with officers.

[3] Includes field clerks in 1922–25.

[4] Number of women in services 1922 to 1940 relatively small.

[5] 1948 and 1949 includes Army personnel assigned to Air Force Command; excludes Air Force personnel assigned to Army command. No Air Force personnel assigned to Army command in 1950.

[6] Included in Air Force.

[7] Included in Army.

[1] Includes $259,000 for payments to participants in yellow fever experiments, 1932–50.

[2] War of the Revolution, $70,000,000; War of 1812, $46,218,000; Indian Wars, $105,119,000; Mexican War, $61,740,000; unclassified, $16,513,000.

[3] Includes actual net expenditures of $69,963,000 for 1948 and a cumulative adjustment for prior years of $225,716,000.

[4] Amount transferred by voucher to NSLI fund for payment of claims traceable to extra hazards of military or naval service and certain direct payments.

[5] Represents payments made on adjusted service certificates and amounts reimbursed to U. S. Government Life Insurance fund on account loans made from that fund.

[6] Includes expenditures from funds allotted under National Recovery Act of 1933 and P. W. A. Act of 1938.

[7] Includes salaries and other administrative costs, such as travel, transportation, communication, printing, and office equipment. Also includes fees for counseling of veterans, reimbursements to States for administrative expenses, and expenditures under Federal Tort Claims Act. Medical, hospital, and domiciliary services are included beginning with fiscal year 1932; expenditures for State and Territorial homes are included beginning with fiscal year 1934.

[8] Includes expenditures for medical, hospital, and domiciliary services prior to fiscal year 1932 and for National Home for Disabled Volunteer Soldiers and State and Territorial homes prior to fiscal year 1934; payments for subsistence, tuition, supplies, and equipment under Public Law 16; burial allowances; automobiles and other conveyances for disabled veterans; vocational training (World War I); allotments and allowances; marine and seamen's insurance; operation of Civil Service and Canal Zone retirements and disability systems to Aug. 31, 1934; and other miscellaneous expenditures.

[9] Includes actual net expenditures of $304,933,000 for 1948 and a cumulative adjustment for prior years of $69,935,000.

[10] Includes $2,634,537,000 distributed as special dividends.

10. Social Security and Related Programs

(Data in this section relate to continental United States, Alaska, and Hawaii, except as noted)

Broadly considered, "social security" includes (1) all public provisions for payments to individuals on an insurance or similar basis to compensate for part of the wage loss resulting from old age, sickness, disability, unemployment, or death (social insurance and related programs); (2) assistance, or payments on a needs basis, to persons with inadequate income (public aid); and (3) medical and hospital care and services to individuals to improve their health, earning power, and welfare (health and medical services and other welfare services).

The *Social Security Bulletin* carries current data on many of these programs, and summarizes annual data for them in an annual Statistical Supplement. See also source notes to the tables in this volume for publications giving more detailed data and analyses of the figures and information on administrative factors that may affect them.

SOCIAL INSURANCE FOR INDUSTRIAL AND COMMERCIAL WORKERS

The two social insurance programs established by the Social Security Act provide protection against wage loss resulting from old age or death (Federal old-age and survivors insurance) or unemployment (Federal-State unemployment insurance). In addition, three States—Rhode Island, California, and New Jersey—administer cash benefits for workers covered by the State unemployment insurance law who suffer a wage loss because of temporary sickness; payments under a New York sickness benefits law on the workmen's compensation pattern, administered by the Workmen's Compensation Agency, became payable on July 1, 1950. These insurance programs cover employment in industry and commerce. Some State unemployment insurance laws, however, limit coverage to workers in firms with a specified minimum number of employees in a specified number of weeks in a year. The coverage of old-age and survivors insurance was broadly extended by the 1950 amendments to the Social Security Act. In general, the coverage extensions became effective on January 1, 1951. The newly covered groups include employees of nonprofit institutions under specified conditions, certain employees of State and local governments under voluntary agreements negotiated between the States and the Federal Security Administrator, most Federal civilian employees who are not under a Federal retirement system, most self-employed persons other than farm operators and certain specified professional people, household workers in private homes and farm workers who are "regularly" employed as defined by law. Employment outside the continental United States and in the Virgin Islands and Puerto Rico is covered on the same basis as employment within continental United States. A revised definition of the term "employee" extends coverage to many persons as employees. The major groups still excluded are self-employed farmers and specified professional persons, and farm and domestic workers who are not "regularly" employed.

Old-age and survivors insurance (tables 269–276) provides monthly retirement benefits to fully insured workers, as defined below, at age 65 or over and supplementary monthly benefits to their wives aged 65 or over and dependent children under age 18. Benefits may be paid at age 65 to the dependent husband of a retired woman beneficiary who was currently insured at the time of her entitlement. Monthly survivor benefits are payable to certain dependents of fully or currently insured workers—

children under age 18, and widows who have in their care a child beneficiary of the deceased insured worker. In some cases, the divorced wife of the deceased worker may qualify for survivors benefits if she has their child in her care. If the deceased worker was fully insured, survivor benefits are payable to his widow at age 65. The dependent widower of a deceased woman worker who was both fully and currently insured at her death, may qualify for a widower's benefit at age 65. If the worker died fully insured and leaves no widow, widower or unmarried child immediately or potentially eligible for benefits, benefits are payable to parents aged 65 or over who were chiefly dependent on him. A lump sum is paid to the spouse who was living with the worker at the time of death or, if there is no such spouse, as reimbursement for burial expenses to a person or persons equitably entitled to such payment. Survivor benefits were also established in 1946 for survivors of World War II veterans who die within 3 years of their discharge from military service, if pension or compensation is not payable by the Veterans' Administration with respect to the death of the veteran.

A worker is fully insured if he has at least 1 quarter of coverage—earned at any time after 1936—for every 2 calendar quarters that have elapsed since the end of 1950 (or since attainment of age 21 if later) and before the quarter in which he attains age 65 or dies (with a minimum of 6 such quarters of coverage), or if he has at least 40 quarters of coverage. A quarter of coverage is a calendar quarter in which a worker receives wages of at least $50 or, after 1950, is credited with at least $100 of self-employment income. A worker is currently insured if he has at least 6 quarters of coverage within the period of 13 quarters ending with the quarter of death or entitlement to retirement benefits.

Monthly benefits and lump-sum payments are based on the worker's average wage as legally defined. Under the 1950 amendments, World War II veterans are entitled to wage credits of $160 for each month of military service during the war period, unless a benefit based in whole or in part on such service becomes payable by a Federal agency other than the Veterans' Administration. Benefits are suspended for any month in which the beneficiary, or the person on whose wage record benefits are based, was under age 75 and earned wages of more than $50 in covered employment or was charged with net earnings from self-employment of more than $50. Covered workers and their employers each pay contributions of 1.5 percent on the worker's wages, not counting amounts above the first $3,600 in a year. The rate is scheduled to rise by steps until it reaches 3.25 percent each in 1970. Self-employed persons pay 1.5 times the employee rate. An amount equal to the contributions collected is appropriated for deposit in the old-age and survivors insurance trust fund, from which benefits and administrative costs are paid. The wage credits of a worker—the amounts of wages and self-employment income up to a maximum of $3,600 a year—are recorded in individual employee accounts maintained by the Bureau of Old-Age and Survivors Insurance.

State unemployment insurance laws (tables 277–281) pay benefits to unemployed covered workers who meet the qualifying conditions specified in the State law. In most States, a waiting period of 1 week must be served before payments begin. Benefits are payable for a maximum number of weeks, amounting to 20 in 22 States, 26 in 13 States at the end of 1950 but ranging from 12 to 25 weeks among the others. In theory, weekly benefit amounts represent about 50 percent of wages, but the maximum limits on individual payments, which range from $15 to $27 under the several State laws, cut down the proportion for many workers in many States. Eleven States take account of the unemployed worker's dependents in determining the amount of benefits payable to him. Four States now pay benefits to workers whose unemployment is caused by sickness.

The standard rate of contributions payable by employers for unemployment insurance is 2.7 percent of wages paid, not counting amounts above the first $3,000 a year paid to an employee. In two States, employees also contribute for unemployment

insurance. All States adjusted employer contribution rates in 1950 in accordan with "experience rating," which is based in general on the extent to which the employees have drawn benefits. The Federal Government imposes a Federal unem ployment tax on employers of eight or more in industry or commerce; against th Federal tax, employers credit, up to 90 percent of their Federal liability, contributio they have paid under the State law or would have paid if they had been assessed at th standard rate. Contributions collected by States are deposited to State accoun in the Federal unemployment trust fund, from which States withdraw amounts needed for benefit payments. The Federal Government makes grants to States to cove the necessary administrative costs of State systems that meet statutory Feder requirements.

In the four States which have temporary disability programs, employees pa contributions for these benefits. Other States which now collect or in the past hav collected employee contributions for unemployment insurance may use that money t finance cash sickness benefits.

SOCIAL INSURANCE FOR RAILROAD WORKERS

The social insurance programs under the Railroad Retirement Act and Railroa Unemployment Insurance Act cover employees of railroads (including the Railwa Express Agency and the Pullman Company) subject to part I of the Interstate Com merce Act, affiliated companies such as refrigerator-car loan companies performi services connected with railroad transportation, organizations such as railroad an traffic associations maintained by two or more covered employers, and standa railway-labor organizations, national in scope. These programs are administered b the Railroad Retirement Board, which publishes operations data in its *Month Review* and *Annual Report*.

Retirement and survivor benefits (tables 286 and 288).—The Railroad Retireme Act provides retirement annuities for aged or disabled workers and monthly an lump-sum survivor benefits to survivors of deceased workers. Old-age annuities a payable at age 65 or over, or at reduced rates (full rates for women employees) age 60 to 64 after 30 years of service. Total and permanent disability annuities a payable at age 60, or after 10 years of service; and occupational disability annuiti at age 60, or after 20 years of service, provided the employee is connected with th industry. Retirement is not compulsory.

The present maximum annuity is $144 a month; the minimum, the least of th following: $60, $3.60 times the years of service, or the average monthly compensatio whichever is least, provided the employee has at least 5 years of service and a conne tion with the industry.

Monthly benefits are paid to a qualified widow at age 65 or over; to a widow under 65 if she has in her care dependent, unmarried children of the employee wh are under 18 years of age; to such children themselves; and to dependent parent at age 65 if the employee left no widow or children. In addition, a lump-sum death benefit, in effect a funeral benefit, is payable when there are no survivo eligible for monthly benefits at the time the employee dies.

Funds for the retirement and survivor system come from a tax on compensation (ex clusive of earnings over $300 a month) authorized under the Railroad Retirement Ta Act. The tax, divided equally between the employer and the employee, is 12 percen and is scheduled to rise to the maximum of 12½ percent in 1952.

Unemployment and sickness benefits (tables 287 and 288).—The Railroad Unem ployment Insurance Act provides benefits for unemployment and sickness (includi maternity) payable in a benefit year (July 1–June 30) to any employee who earned least $150 in covered employment in the "base year" (the calendar year preceding th beginning of the benefit year). Benefits, ranging from $1.75 to $5.00 per day, depen

ing upon the employee's base year earnings, are payable for each day of unemployment or sickness over 7 in the first 14-day registration period, and for each day over 4 in subsequent registration periods, up to a maximum of 130 days in a benefit year for each type of benefit.

The unemployment insurance program is financed entirely by contributions from covered employers, paid directly to the Board. The contribution rate for any year depends upon the balance in the unemployment insurance account and may vary from ½ to 3 percent of payrolls (exclusive of individual earnings in excess of $300 a month). Since January 1, 1948, the minimum rate has been in effect.

RETIREMENT SYSTEMS FOR FEDERAL GOVERNMENT EMPLOYEES

One contributory retirement system for Federal civilian employees and two non-contributory systems (for special classes of employees) are administered by the Civil Service Commission. In addition, there are separate retirement systems, some contributory and others noncontributory, in operation for the armed forces and special classes of Federal employees.

The Civil Service Retirement Act, as passed in 1920 and amended subsequently, provides for age, optional, disability and discontinued service annuities for employees in the executive, judicial, and legislative branches of the United States Government not subject to another retirement system, except those employees excluded by executive order because the tenure of employment is intermittent or of uncertain duration. It also covers those employees in the municipal government of the District of Columbia not subject to special retirement systems for teachers, firemen, and policemen. The amendment of Feb. 28, 1948, provided annuities for the widows and minor children of deceased employees, and, under certain conditions, to the survivors of deceased annuitants. Approximately 1,670,000 employees were subject to this act as of June 30, 1950. The employee contribution rate, computed on base pay, has been 6 percent since July 1948. The rate had been 5 percent from July 1942–June 1948, 3½ percent from July 1926–June 1942, and 2½ percent from August 1920–June 1926.

The act does not require specific payments from the Government as employer but implies that the Government will furnish the amounts necessary to finance the fund and to continue the act in full force and effect. Appropriations have been made annually by the Congress to the fund since the fiscal year 1929.

WORKMEN'S COMPENSATION

All States now have programs providing protection against work-connected injuries and deaths. In addition to the State laws, there are Federal workmen's compensation laws covering employees of the Federal Government, private employees in the District of Columbia, and longshoremen and harbor workers. Most of the State workmen's compensation laws exempt such employments as agriculture, domestic service and casual labor; the majority exempt employers who have fewer than a specified number of employees. Occupational diseases, or at least specified diseases, are compensable under most laws.

In general, compensation is based on a proportion of wages; for total disability the proportion is commonly between three-fifths and two-thirds. However, all laws place a maximum amount on the weekly benefit payment—including dependents' allowances, the maximum is $25 or more in most laws, with 11 as high as $35 or more. In most States, total payments to injured workers or to survivor families are limited as to time, amount, or both. All compensation acts require that medical aid be furnished to injured employees; in about one-third of the laws, there are either duration or cost limitations—or both—on the amount of medical benefits provided.

To ensure that compensation will be paid when due, workmen's compensation laws require that a covered employer obtain insurance or give proof of his qualifications to carry his own risk (self-insurance). In most of the States the employer is permitted to insure with private insurance companies, but in 7 of the 18 States which have State insurance funds, employers are required to insure their risks in the State fund.

Total payments of all types of insurers for compensation and medical benefits, by States and for the years 1940 to 1949, appear in table 289. Of the 1949 total of $570 million, an estimated $185 million was in the form of medical aid, about $333 million in cash benefits to injured workmen, and the remaining $52 million in periodic or lump-sum payments to survivor families.

PUBLIC ASSISTANCE

Public assistance (tables 290–292) is provided through five major programs, all administed by the States and localities. Payments to four groups of needy persons—the aged, the blind, the permanently and totally disabled, and children whose need arises from certain causes—are financed in part from Federal funds granted to States under the Social Security Act. The program for aid to the permanently and totally disabled, established under the Social Security Act Amendments of 1950 (Public Law 734) became effective October 1, 1950. Aid to other needy persons is furnished for the most part through general assistance, toward which the Federal Government makes no contribution. In addition, one State aids dependent children, and three aid blind persons, without Federal funds.

To receive a Federal grant for assistance payments and administrative expenses under any of the four programs established by the Social Security Act, a State must have a plan approved as meeting the requirements of the Federal act. Each State establishes the conditions under which needy people may receive assistance and determines how much they shall get. The maximum amount in which the Federal Government will share is $50 for old-age assistance, aid to the blind, and aid to the permanently and totally disabled and, for aid to dependent children, $27 for one needy adult with whom the child is living beginning October 1950 under Public Law 734), $27 for the first child and $18 for each additional child in a family. The Federal Government pays three-fourths of the first $20 of the average monthly assistance payment for aged, blind, and permanently and totally disabled recipients and three-fourths of the first $12 for each eligible person in an aid to dependent children case plus one-half the remainder of matchable expenditures. For all three programs the Federal share of the cost of State administration is one-half the sums expended.

HEALTH AND WELFARE SERVICE

Programs providing health and welfare services are aided through grants to States for maternal and child-health services, services for crippled children, child-welfare services, vocational rehabilitation and public health services, and hospital construction. The Children's Bureau, a part of the Social Security Administration, administers the first three of these programs; the others are administered by the Office of Vocational Rehabilitation and the Public Health Service, both units of the Federal Security Agency.

FIG. XI.—SOCIAL SECURITY OPERATIONS: 1942 TO 1950

[**Old-age and survivors insurance:** Beneficiaries actually receiving monthly benefits (current payment status) and amount of their benefits during month. **Unemployment insurance:** Average weekly number of beneficiaries for the month and gross benefits paid during the month under all State laws. **Public assistance:** Recipients and payments under all State programs]

[1] Excludes refunds of employee contributions to employees leaving service.

[2] State unemployment insurance and employment service programs, reconversion unemployment benefit program for seamen, and administrative expenditures of Bureau of Employment Security.

[3] Includes benefits paid by private plans under State law provisions in Calif. and N. J.

[4] Represents pensions, annuities, burial awards, and readjustment allowances and estimated administrative expenditures for nonmedical services; excludes expenditures from Govt. life insurance fund.

[5] Includes expenditures for medical services, approximately $165 and $175 million in 1948 and 1949, respectively. Includes payments by employers and private insurance carriers of benefits payable under public law.

[6] Excludes administrative expenditures. [7] Old-age assistance, aid to blind, and aid to dependent children.

[8] Excludes: All medical expenditures (both health services and research) of military establishment and Atomic Energy Commission; health services provided in connection with primary and secondary public education; medical services included under public aid programs above; medical care included under workmen's compensation program above; international health activities; professional training of nurses, physicians, etc.; and expenditures for medical services and research subordinate to performance of other functions such as those of Dept. of Agriculture, Tennessee Valley Authority, Civil Aeronautics Authority, etc.

[9] Excludes expenditures for domiciliary care by Veterans' Administration and expenditures in institutions for chronic care (other than mental and tuberculosis), both included under institutional and other care below. Includes hospital and out-patient care in public institutions and expenditures for maintenance and improvement of existing facilities.

[10] Federal includes cost of hospital planning and surveys; State and local, new construction only.

[11] Includes expenditures of U. S. Public Health Service except: International activities, National Institutes of Health, medical and hospital care and hospital construction, professional education and training. Includes expenditures of Food and Drug Administration.

[12] Includes all community health and sanitation expenditures except those in connection with schools and public welfare and those classified elsewhere as health and medical services.

[13] Federal includes expenditures under Maternal and Child Health and Crippled Children's programs and war-time program, Emergency Maternity and Infant Care. State and local includes only required matching of Federal grants under Maternal and Child Health and Crippled Children's programs.

[14] Medical care and service expenditures under Vocational Rehabilitation Act.

[15] Includes all expenditures (except education and training) of U. S. Public Health Service National Institutes of Health and estimated amounts appropriated by State and local governments for medical research.

[16] Includes only in-service training under auspices of National Institutes of Health, other units of U. S. Public Health Service, Children's Bureau. Excludes professional training of nurses, physicians, etc., and expenditures in State-supported medical schools.

[17] Expenditures under Vocational Rehabilitation Act other than for medical services.

[18] Veterans' Administration programs for vocational rehabilitation, automobiles and other conveyances for disabled veterans, and housing for paraplegic veterans.

[19] American Printing House for the Blind, Columbia Institute for the Deaf, Naval Home, veterans' homes, U. S. Soldiers' Home, and domiciliary care of veterans.

[20] Funds are also available from private organizations and payments from parents; in 1948 these nongovernmental funds amounted to $161 million, and in 1949 to $182 million.

[21] Excludes estimated $40–$50 million expended for care of children in foster homes.

[1] Average monthly number, except as otherwise noted.

[2] Includes number and amounts of benefits paid to wives aged 65 and over and to dependent minor children living beneficiaries entitled to supplementary benefits. For 1949, average number of wives aged 65 and over 360,779 and for dependent minor children of living beneficiaries, number was 29,368; payments certified to th groups amounted to $62,331,000 and $4,387,000, respectively.

[3] Includes a small but unknown number and amount of disability and survivor beneficiaries and benef Beneficiaries represent number in a specific month of year, varying according to system.

[4] Benefits for fiscal year (usually ending June 30); beneficiaries for last month of fiscal year. Data for 1948 a 1949, preliminary.

[5] Under Veterans Administration. Retirement data only for veterans of Spanish-American War, Boxer I bellion, and Philippine Insurrection. Lump-sum payments are for burial of deceased veterans.

[6] Less than 50. [7] Not available.

[8] A small but unknown amount of lump-sum death payments included with monthly survivor payme Disability benefits exclude payments for medical care. 1949 data preliminary.

[9] Benefits payable in Rhode Island beginning April 1943, in California beginning December 1946, and in N Jersey beginning January 1949. Includes private-plan benefits in California and New Jersey and private-p beneficiaries in California. Maternity data included for Rhode Island. Number represents average wee number of beneficiaries.

[10] Temporary disability benefits first payable July 1947. Includes maternity data. Number represents av age number of beneficiaries during 14-day registration period.

[11] Average weekly number.

[12] Allowances under the Servicemen's Readjustment Act, beginning September 1944 for unemployment all ances (beneficiaries represent average weekly number) and beginning November 1944 for self-employment all ances (beneficiaries, average monthly number).

[1] Benefit is subject to no deduction or only to deduction of fixed amount which is less than current month's benefit.

[2] Including both old and new benefit rates.

[3] Including net adjustments for 1944-1949. Benefit is terminated when a beneficiary dies or loses entitlement to a benefit for some other reason. Adjustments result from operation of maximum and minimum provisions, recomputations, and from other administrative actions. Terminations only are shown for 1950.

[1] Measured by employer's pay period employment as defined in note 4.

[2] An employer is a legal entity, such as a corporation, partnership, or single ownership, for which a single tax return is filed.

[3] Data not available.

[4] Total number of persons employed during one specified pay period by employers reporting taxable wages for selected quarter, namely, last pay period in March 1938 and September 1939–42, and pay period ending nearest middle of March 1945–48, respectively.

[5] Wages paid by employers for covered employment during specified quarters, excluding wages over $3,000 paid by any one employer to any one employee in a calendar year.

[1] Distribution by type estimated. Supplementary benefits are paid to entitled wives and children of retired (primary) beneficiaries. Survivor benefits are paid to the following survivors of deceased insured workers: Aged widows, children, younger widows with child beneficiaries in their care, or dependent aged parents.

[2] Payable with respect to workers who died after December 1939, if no survivor could be entitled to monthly benefits for month in which worker died.

[3] Exceeds number of deceased workers with respect to whose wage records payments were certified.

No. 276.—Old-Age and Survivors Insurance—Sample (1 Percent) of Workers With Wage Credits at Some Time in 1937–48, by Cumulative Wage Credits in 1937–48, Insurance Status January 1, 1949, and Age Group

[1-percent sample of all workers with wage credits identified for posting by July 1949; only partly adjusted for duplication of workers with more than 1 account. Includes workers who died during period 1937–48 and workers who became entitled to primary insurance benefits before January 1, 1949. Age represents age at birthday in 1948. Since data are derived from a sample they are subject to a sampling variation which may be large when figures shown are small. Because of mechanical processes and extent of adjustments for delayed wage records data may differ slightly from corresponding data in other published tables. Data corrected to Nov. 30, 1950]

[1] A worker who is fully insured as of a given date (in this table, Jan. 1, 1949) is one who has had at least 6 calendar quarters of coverage and not less than 1 such quarter for each 2 calendar quarters elapsed after 1936 or after quarter in which he attained age 21, whichever is later, and up to but excluding quarter in which he died, attained age 65 or given date, whichever first occurred. A worker who is currently insured as of a given date is one who has had at least 6 quarters of coverage during the period consisting of the quarter of the date, or the quarter in which he died, and the 12 quarters immediately preceding such quarter. Uninsured workers are those who have some wage credits but are neither fully nor currently insured as of given date. A quarter of coverage is a calendar quarter in which the worker has been paid not less than $50 in taxable wages.

[2] Total includes 6,722 workers of unreported age not shown separately, of whom 324 were fully insured, 16 currently insured only, and 6,238 uninsured. Total excludes 48 workers for whom information was incomplete with respect to the characteristics reported in this table.

[3] No workers in sample cell. [4] Inapplicable under provisions of the Social Security Act.

No. 289.—Workmen's Compensation Payments, by States: 1940 to 1949

[Estimated by Social Security Administration. Payments include net cash and medical benefits paid by private insurance carriers (compiled from the Spectator, Premiums and Losses by States of Casualty, Surety, and Miscellaneous Lines), net cash and medical benefits paid by State funds (from the Spectator and State reports; estimated for some States), and cash and medical benefits paid by self-insurers plus the value of medical benefits paid by employers carrying workmen's compensation policies that do not include the standard medical coverage (estimated from available State data). Data are for calendar years, except for a few States with State funds and for Federal employees, for which fiscal year data were used. Benefit payments made under Longshoremen's and Harbor Workers' Compensation Act and under Defense Bases Compensation Act are included in data for States in which payments are made]

Hawaii	2,469	4,009	11,871	111	4,059	6,219	940	3,306	44	1,909

[1] Partly estimated; total not as large as sum of State figures because of adjustment for 2 States. See footnote 5.
[2] Excludes some cases and local funds not administered by State agency.
[3] Estimated.
[4] Excludes cases receiving assistance in kind only and, for a few counties, cases receiving cash payments.
[5] Includes unknown number of cases receiving medical care, hospitalization, or burial only.
[6] Represents program administered without Federal participation.
[7] Excludes estimated duplication between programs; 2,051 cases were aided by county commissioners and 6,051 cases under program administered by State Board of Public Welfare.

[1] The States classified as having substantially complete coverage reported 90 percent or more of children served. Those classified as incomplete reported less than 90 percent of children served.

[2] The children reported as in institutions represent only those children served by workers attached to State or local public welfare agencies and not all children receiving institutional care.

[3] Includes a number of children for whom whereabouts are unknown.

[4] Not computed because of incomplete report.

[5] Less than 0.5 percent.

[6] State achieved substantially complete reporting coverage during quarter ending June 1950.

[1] Through June 30, 1940, data relate entirely to employees retired voluntarily or involuntarily under vario age and length of service requirements and to employees with at least 5 years of service who became totally d abled for the position occupied prior to eligibility for retirement. Beginning Jan. 1, 1940, employees may elec joint and survivor annuity, and beginning Feb. 29 1948, widows and minor children of deceased employees a annuitants are eligible for survivor annuities under certain conditions; number of survivor annuities in force of June 30 increased from 26 in 1941 to 17,071 in 1950. Beginning Jan. 24, 1942, employees with at least 5 years servi who separate voluntarily or involuntarily prior to eligibility for retirement may obtain deferred annuity at a 62; such annuitants increased from 5 as of June 30, 1942, to 27,446 as of June 30, 1960. Excludes annuities pu chased by voluntary contributions.

[2] Data relate to refunds of amounts to employees' credit in fund paid to employees not eligible for an annui or, if eligible, elected to take a refund.

[3] Data relate to refunds of amounts to employees' credit paid to designated or other beneficiaries of employe who died while in service or after separation.

[4] Data relate to refunds of balance of amount to annuitants' credit at time of death paid to designated or oth beneficiaries of annuitants. Includes refunds to disability annuitants, whose entitlement to an annuity w terminated, and unexpended balances paid upon termination of survivor annuities.

[5] Due to adjustments, number in force at end of fiscal year does not in all cases equal number certified less nu ber terminated in that year, plus number in force at end of preceding fiscal year.

11. Income and Expenditures

The income statistics in this section are of two fundamental types: First, those which provide data on aggregate amounts (national income and national product data) and second, those which provide data on the distribution of families or persons by size of their income (size distribution data). The former are represented by tables 302–310. These statistics are compiled primarily by the Office of Business Economics of the Department of Commerce and are based on a wide variety of data from government and private sources. The statistics representing the latter type of income data (tables 311–323) are derived from sample surveys of income conducted by several different agencies. Since these surveys were taken at different times and for different purposes, they differ somewhat in the definitions of income and the income-receiving unit. In addition to the income data, expenditures and savings of families and single persons have been included in this section.

Nation's economic budget.—The Nation's Economic Budget is designed to give a synoptic picture of the economy. (See table 302.) It shows the magnitudes of income and expenditure of major economic groups, net additions and absorption of saving by these groups, and the gross national product or income. Statistics relating to the private sectors of the economy are based on the "National income and product" accounts of the Department of Commerce, while the Federal Government account is based mainly on "Cash receipts from the public" and "Cash payments to the public" as computed by the Bureau of the Budget. Federal cash receipts and payments represent a consolidation of the United States budget with the Government trust and corporation accounts in which intragovernmental and noncash transactions have been eliminated. State-local cash receipts and payments are based on the national income and product series but are rearranged to approximate a cash basis.

The gross national product or income includes all those receipts or payments arising from current production. Receipts or payments involving only transfers of claims are omitted in totaling the sector accounts to arrive at the gross national product or income. Business receipts include corporate retained earnings plus inventory valuation adjustment and capital consumption allowances of all business. Government cash loans to the "rest of the world" are considered as a transfer payment and have been entered as a receipt in the international account. However, unilateral transfers or grants to foreign countries are included as a direct expenditure for goods and services of either consumers or government and are netted out of the international account.

The adjustments for receipts relating to gross national product are required to attain equivalence between national income and product. They include the statistical discrepancy and the operating surplus of Government enterprises less subsidies. Other adjustments arise from the fact that the basis of accounting for the income and product series differs from that used in Government cash receipts and payments, particularly in the timing of receipts or payments, and that the cash concept of Government operations is somewhat more inclusive than that incorporated in the income and product series.

A fuller explanation of the Nation's Economic Budget may be found in the Annual Review of the Council of Economic Advisors, included in the *Economic Report of the President to Congress.*

Aggregate income.—The aggregate income statistics presented in tables 303–310 are of three general types: gross national product or expenditure, national income (by

distributive shares and by industrial origin), and income payments to individuals by States. **Gross national product** is the market value of the output of goods and services produced by the Nation's economy, before deduction of depreciation charges and other allowances for business and institutional consumption of durable capital goods. Other business products used up by business in the accounting period are excluded. The Nation's economy in this context refers to the labor and property supplied by residents of the Nation. Gross national product comprises the purchases of goods and services by consumers and government, gross private domestic investment, and net foreign investment. Gross national product differs from national income mainly in that no allowance is made for depreciation or for indirect business taxes, both of which items constitute expenses in the computation of business net incomes.

National income is the aggregate earnings of labor and property which arise from the current production of goods and services by the Nation's economy. Thus, it measures the total factor costs of the goods and services produced by the economy. The Nation's economy in this context refers to the labor and property supplied by residents of the Nation. Earnings are recorded in the forms in which they accrue to residents of the Nation, inclusive of taxes on those earnings.

National income originating by industry is the sum of factor costs incurred by the industry in production. Hence, it is the net value added to production by the industry, measured at factor costs.

Personal income is the current income received by persons from all sources, inclusive of transfers from government and business but exclusive of transfers among persons. Not only individuals (including owners of unincorporated enterprises), but nonprofit institutions, private trust funds, and private pension and welfare funds are classified as "persons".

Income payments to individuals is a measure of income received from all sources during the calendar year by residents of each State. It comprises income received by individuals in form of (1) wages and salaries, after deduction of employees' contributions to social security, railroad retirement, railroad unemployment insurance, and government retirement programs; (2) proprietors' incomes, representing net income of unincorporated establishments, including farms, before owners' withdrawals; (3) property income, consisting of dividends, interest, and net rents and royalties; and (4) "other" income, which includes public assistance and other direct relief; labor income items such as work relief, government retirement payments, veterans' pensions and benefits, workmen's compensation, and social insurance benefits; mustering-out payments to discharged servicemen; family-allowance payments and voluntary allotments of pay to dependents of military personnel; enlisted men's cash terminal leave payments; and State government bonuses to veterans of World War II. For discussion of distribution by State, see headnote, table 310.

Size distribution of income.—The statistics on the size distribution of income presented in tables 311–323 are based on data collected in various field surveys of income which have been conducted since 1939. The primary purpose of these field surveys was to show the distribution of families or persons by income levels rather than the aggregate amounts of income received by these families. Whereas the aggregate income data provide an indication of the level of total purchasing power, the field survey size distribution data, by showing the numbers and kinds of families and persons in each income bracket, provide an indication of the distribution of purchasing power in the population. In each of these field surveys trained enumerators interviewed representative samples of the civilian noninstitutional population with respect to the income received by the respondents or their families during the previous year.

The income represented in tables 316–323 is consumer money income, defined as the sum of civilian money wages and salaries; net farm entrepreneurial income; net nonfarm entrepreneurial income from business or profession; interest, dividends, and periodic income from estates and trusts; rents and royalties; armed forces pay of per-

sons living in private households at the time of the survey; dependency allotments and contributions from members of the armed forces; veterans payments; social security payments, unemployment and workmen's compensation, pensions and assistance and miscellaneous items such as periodic contributions for support from persons not in the household, periodic payments from insurance policies or annuities, and alimony. The income is for the calendar year and is before deduction of income taxes (except for 1944 Bureau of Labor Statistics data in table 315) or social security taxes. Nonmoney items of income are not covered. None of the aggregate income concepts (gross national product, national income, or personal income) is comparable with consumer money income. The nearest approximation is personal income.

Expenditures and savings.—The Bureau of Labor Statistics most recent survey of family income, expenditures, and savings on a Nation-wide basis is for the year 1944. The Survey of Prices Paid by Consumers in 1944 was based on a sample of 1,700 families and single persons in 28 metropolitan districts and 20 cities with populations under 50,000 outside of metropolitan districts. These places were selected to represent (with respect to region, State and city size) all cities in the United States with a population of 2,500 or more.

For this study a family is defined as a group of persons dependent on a common or pooled income for the major items of expense and usually living in the same household. A single person is one who lives alone or with unrelated people in a private home, lodging house, or hotel. Since 1945, the Bureau has made similar surveys of family expenditure in three cities each year to obtain data necessary to check the prices and weighting patterns used in the consumers' price index; 1945 expenditure data were obtained for Birmingham, Ala.; Indianapolis, Ind.; and Portland, Oreg. (see *Monthly Labor Review*, June 1948); 1946 data for Milwaukee, Wis.; Scranton, Pa., and Savannah, Ga. (available upon request to the Bureau of Labor Statistics); 1947 data for Washington, D. C.; Manchester, N. H.; and Richmond, Va. (see *Monthly Labor Review*, April 1949); 1948 data for Denver, Colo.; Detroit, Mich.; and Houston, Tex. (see *Monthly Labor Review*, December 1949); and 1949 data for Memphis, Tenn. (see *Monthly Labor Review*, June 1951).

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series A 117–133") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

No. 303. Gross National Product or Expenditure in Current Dollars 1929 to 1950

[In millions of dollars. For definition of gross national product, see text, p. 256. See also *Historical Statistic* series A 101-116]

Item	1929	1933	1939	1943	1945	1946	1947	1948	1949	1950 [1]
Gross national product	103,828	55,760	91,339	194,338	215,210	211,110	233,264	259,071	255,578	279,80
Personal consumption expenditures	78,761	46,346	67,466	102,244	123,079	146.907	165.570	177,446	178,832	190.80
Durable goods	9,362	3,503	6,729	6,824	8,472	16,573	21,369	22,868	23,841	29,20
Nondurable goods	37,742	22,254	35,258	60,970	74,886	85,849	95,142	100,887	98,541	101,60
Services	31,657	20,589	25,479	34,450	39,721	44,485	49,059	53,691	56,450	59,90
Gross private domestic investment	15,824	1,306	9,917	5,709	10,733	28,726	30.187	43,124	33,028	49,40
New construction [2]	7,824	1,142	4,899	2,549	3,934	10,291	13.904	17.716	17,268	21,80
Producers' durable equipment	6,438	1,783	4,577	4,082	7,545	12,328	17,080	19.893	19,473	23.40
Change in business inventories	1,562	−1,619	441	−922	−746	6.107	−797	5,515	−3,713	4,10
Net foreign investment	771	150	888	−2,245	−1,438	4,561	8,895	1,923	422	−2,50
Government purchases of goods and services	8,472	7,958	13,068	88,630	82,836	30.916	28,612	36,578	43,296	42,10
Federal	1,311	2,018	5,157	81,223	74,796	20,946	15.784	20,990	25,339	22,70
War [3]	1,344	2,022	1,258	80,384	75,923	21,177	17,079	21,521	25,740	22,90
Nonwar [3]			3,908	1,480	1,031	2,469				
Less: Government sales [4]	33	4	9	641	2,158	2,700	1,295	531	401	20
State and local	7,161	5,940	7,911	7,407	8,040	9,970	12,828	15,588	17,957	19,40

[1] Preliminary; represents later estimate than in tables 302 and 306.

[2] Includes construction expenditures for crude petroleum and natural gas drilling; and, for 1939-49, majo additions and alterations to residential buildings, profit margins of residential builders, residential land develop ment costs, settlement and allied charges, engineering and architectural fees, and value of construction of a fe minor types of nonresidential structures.

[3] Classification of purchases of goods and services into war and nonwar conforms, in general, to Daily Treasur Statement classification of general and special account expenditures. War purchases include also that part o capital formation of government enterprises attributable to war activities. Government contributions to Nationa Service Life Insurance Fund are classified as war; all other government contributions for social insurance, as nonwar.

[4] Consists of sales abroad and domestic sales of surplus consumption goods and materials.

No. 306.—Gross Private Domestic Investment and its Components: 1929 to 1950

[In billions of dollars. Consists of acquisitions of newly produced capital goods by private business and nonprofit institutions and of value of change in volume of inventories held by them; covers all private new dwellings, including those acquired by owner-occupants]

CLASS	1929	1933	1939	1943	1945	1946	1947	1948	1949	1950 [1]
Gross private domestic investment, total [2]	15.8	1.3	9.9	5.7	10.7	28.7	30.2	43.1	33.0	48.5
Nonfarm producers' plant and equipment, total [3]	9.8	2.3	5.7	4.6	6.7	15.5	20.3	23.4	22.5	26.9
Equipment [4]	5.6	1.6	4.0	3.5	6.3	10.7	14.6	16.7	16.1	20.2
Construction [3 4]	4.2	.7	1.7	1.1	2.4	4.8	5.7	6.7	6.4	6.7
Farm equipment and construction [5]	1.1	.3	.8	.9	1.4	2.4	3.8	4.6	4.7	6.4
Residential construction (nonfarm) [3 6]	2.8	.3	2.7	1.0	1.1	4.0	6.3	8.6	8.3	12.4
Other private construction [7]	.5	.1	.2	(8)	.2	.6	.7	1.0	1.3	1.5
Net change in business inventories	1.6	−1.6	.4	−.9	.7	6.1	−.8	5.5	−3.7	2.4
Nonfarm	1.8	−1.3	.3	−.5	.6	6.3	1.4	4.4	−3.1	2.9
Farm	−.3	−.3	.1	−.4	−.1	−.2	−2.2	1.2	−.6	−.6

[1] Estimates by Council of Economic Advisers; based on incomplete data.
[2] Items for 1945 and earlier years are not comparable with those for later years.
[3] Total producers' durable equipment less "farm machinery and equipment" and farmers' purchases of "tractors" and "business motor vehicles." These figures assume that farmers purchase 85 and 15 percent, respectively, of all tractors and motor vehicles used for productive purposes.
[4] Industrial buildings, public utilities, gas- and oil-well drilling, warehouses, office and loft buildings, stores, restaurants, and garages. Includes hotel construction prior to 1946 only.
[5] Farm construction (residential and nonresidential) plus "farm machinery and equipment" and farmers' purchases of "tractors" and "business motor vehicles." (See footnote 3.)
[6] Includes construction of hotels, tourist cabins, motor courts, and dormitories since 1946 only.
[7] Includes religious, educational, social and recreational, hospital and institutional, miscellaneous nonresidential, and all other private.
[8] Less than 50 million dollars.

Source: Department of Commerce, Office of Business Economics (except as noted). Published in Economic Report of the President, January 1951.

No. 307.—National Income by Distributive Shares: 1929 to 1950

[In millions of dollars. For definition of national income, see text, p. 256. See also *Historical Statistics*, series A 117 133]

TYPE OF SHARE	1929	1933	1939	1943	[illegible]	1946	1947	[illegible]	[illegible]	1950 [1]

No. 309.—National Income by Industrial Origin: 1929 to 1949

[In millions of dollars. National income (for definition, see text, p. 256) originating in each industry is the sum of factor costs incurred by the industry in production. Hence, it is not value added to production by industry, measured at factor costs]

Industrial division	1929	1933	1939	1943	1945	1946	1947	1948	1949
All industries, total	87,385	39,584	72,532	169,686	182,691	180,286	198,688	223,486	216,631

No. 310.—Income Payments to Individuals, by States: 1929 to 1949

["Income payments to individuals" is a measure of income received from all sources during the calendar year by the residents of each State. For six States and the District of Columbia, however, totals shown below are not strictly measures of income received by residents. Totals for District of Columbia, New York, and Maine are too high—and those for Maryland, Virginia, New Jersey, and New Hampshire too low—in terms of measures of total income received by residents. Estimates shown here for D. C. include income paid out to residents of Maryland and Virginia employed in D. C., but exclude income of D. C. residents employed in these 2 States. Estimates for New York include income paid to residents of New Jersey employed in New York, but do not include income of New York residents employed in New Jersey. Similarly, estimates for Maine include income paid to residents of New Hampshire employed in Maine. In computation of per capita income for these 7 States, income totals shown here were first adjusted to a residence basis before division by population. Following are amounts (in millions) of adjustments for 1949: District of Columbia, −445; Maryland, +235; Virginia, +220; New York, −490; New Jersey, +480; Maine, −16; New Hampshire, +16. For definition of income payments to individuals, see text, p. 256]

No. 311.—Percent Distribution of Family Liquid Assets and Saving, by Income Groups: 1949

[National estimate based on sample interview survey of 3,069 families, defined as all (one or more) persons living in same household and related by blood, marriage, or adoption. Universe covered is population of U. S. residing in private households during interview period, which was January through March 1950. Following groups are excluded: (1) Members of armed forces living at military reservations; (2) residents of hospitals and in religious, educational, and penal institutions; and (3) floating population, that is, people living in hotels, large boarding houses, and tourist camps. For liquid asset holdings of individuals and businesses, see table 446, p. 401]

ANNUAL 1949 MONEY INCOME BEFORE TAXES	Liquid assets [1]	Positive saving [2]	Negative saving [2]	Net saving [2]
All income groups	100	100	100	100
Under $1,000	5	1	26	−33
$1,000–$1,999	7	3	16	−14
$2,000–$2,999	11	8	14	(3)
$3,000–$3,999	14	13	12	14
$4,000–$4,999	12	13	9	17
$5,000–$7,499	18	21	16	30
$7,500 and over	33	41	7	86

[1] Liquid assets include all U. S. Government securities, checking accounts, savings accounts in banks, postal savings, and shares in savings and loan associations and credit unions held at time of survey in early 1950. Currency is excluded.

[2] Positive saving comprises the saving of all family units with money incomes in excess of expenditures, negative saving comprises the dissaving of all family units with expenditures in excess of money incomes, and net saving (plus or minus) is positive saving less negative saving for all family units combined. The survey does not undertake to measure directly consumer expenditures and taxes but measures the saving of each family by obtaining detailed information on the changes in the various asset and liability items that make up each unit's balance sheet of saving. The saving of each unit during the year is computed by subtracting algebraically the total change in its liabilities (plus or minus) from the total change in its assets (plus or minus). Positive saving results from a larger increase in assets than in liabilities or a larger decrease in liabilities than in assets. The reverse is true for negative saving. The more important asset and liability items for which information is obtained are changes in liquid asset holdings, changes in consumer indebtedness, net sales or purchases of stocks and bonds, payments on life insurance premiums, payments to retirement funds, net sales and purchases of houses, payments on house mortgages, house improvements, and investment or withdrawal of investment in unincorporated businesses. Capital gains or losses are excluded from saving.

[3] Less than one-half of 1 percent.

[1] Estimated liability on Federal income tax, excluding tax on capital gains. Tax liability was not obtained directly from interviews or from tax returns, but from comprehensive data on family composition and income obtained in connection with Consumer Finances Surveys. For method of estimating, see *Federal Reserve Bulletin*, Aug. 1950, pp. 961–962.

No. 313.—Percent Distribution of Spending Units Having Specified Characteristics, by Amount of Net Worth, Early 1950

[Net worth is defined as difference between total selected assets and total debt reported in interviews during January–March 1950. Selected assets include liquid assets (U. S. Government securities, checking accounts, savings accounts in banks, postal savings, and shares in savings and loan associations and credit unions), owner-occupied homes and farms, other real estate, farm machinery, crops and livestock, automobiles, interests in unincorporated nonfarm businesses and privately held corporations, and common and preferred stock in corporations open to investment by the general public. Liabilities include all forms of debt other than charge accounts. For method of computing net worth, see *Federal Reserve Bulletin*, December 1950, pp. 1610–1611. Net worth figures should be considered as minimum estimates because of omission of assets such as currency, corporate bonds, reserve value of life insurance policies, consumer durable goods other than automobiles, jewelry, etc., and because of under-reporting of assets covered]

Characteristic of spending unit	All cases		Amount of net worth					
	Number	Percent	Negative	$1–$999	$1,000–$4,999	$5,000–$24,999	$25,000 and over	Not ascertained

No. 315.—Average Money Income, Expenditures and Savings of Families and Single Persons in Cities, by Income Class: 1944

[Estimates based on sample survey of 1,700 consumer units in cities of 2,500 inhabitants or more. Data relate to all civilians except inmates of institutions. Families are defined as economic units of two or more persons contributing to or mainly dependent on a common or pooled income. Single persons are those who live alone or as lodgers or servants in private homes, rooming houses or hotels]

[1] Family size based on equivalent persons, with 52 weeks of family membership considered equivalent to 1 person; 26 weeks equivalent to 0.5 person, etc.

[2] Earner defined as a family member that worked for pay (as wage or salary worker or on his own account) at any time during year.

[3] Personal taxes (income, poll and personal property) have been deducted from money income. Total money income may be obtained by combining amounts shown for both items. Inheritances and large gifts are not considered current income; inheritances and gift taxes excluded from personal taxes.

[4] Includes expenditures for alcoholic beverages.

[5] Includes rents for tenant-occupied dwellings and for lodging away from home and current operation expenses of home owners. Excludes principal payments on mortgages on owned homes.

[6] Value of bonds purchased less those cashed.

[7] Represents differences between income and expenditures plus net war bond purchases and insurance premium payments. Includes amounts deducted for social security, retirement plans, etc., not available separately.

No. 316.—Distribution of Families and Unrelated Individuals in Households, by Total Money Income, Urban and Rural: 1946 to 1949

[Based on samples of population residing in households only. Excludes small number of families and individuals residing in quasi households (hotels, large rooming houses, etc.). "Family" not used here with same meaning as in 1940 census. It refers to a group of two or more related persons residing in same household. "Unrelated individual" is used to refer to a person living alone or with persons not related to him. See source for evaluation of sampling reliability]

No. 317.—Percent Distribution of Primary Families and Unrelated Individuals With Wage or Salary Income, by Wage or Salary Income and Receipt of Nonwage Income, Urban and Rural: 1939 to 1949

[Based on samples of population residing in households only. Excludes small number of families and individuals residing in quasi households (hotels, large rooming houses, etc.). "Primary family" refers to head of household and all persons related to him. A "primary individual" refers to household head who has no relatives living with him. These terms were not used in 1940 Census. Wage or salary income includes all money received in compensation for work or services performed as employees, including commissions, tips, piece-rate payments, bonuses, Armed Forces pay, etc., as well as receipts commonly referred to as wages or salaries. It excludes value of income in kind, such as living quarters, meals, clothing, etc. A primary family was considered to have other income if any person 14 years of age and over in family had $50 or more of income from sources other than money wages or salaries]

No. 323.—Median Wage or Salary Income of Persons 14 Years of Age and Over with Wage or Salary Income, by Color and Major Industry Group, by Sex: 1939 and 1949

[Data based on sample (see source for evaluation of sampling reliability), and restricted to persons who were wage or salary workers at time of survey. Wage or salary income includes all money received in compensation for work or services performed as employees, including commissions, tips, piece-rate payments, bonuses, armed forces pay, etc., as well as receipts commonly referred to as wages or salaries. Excludes value of income in kind, such as living quarters, meals, clothing, etc. In 1940 census persons were classified as with or without other income on basis of answers to inquiry as to whether $50 or more of income was received from sources other than money wages or salaries. A similar classification was made in 1949 data by comparing amounts of money wage or salary income and total money income. In addition, farmers were classified as with nonwage income on the assumption that they had at least $50 of income in kind. Median wage or salary income based on number of persons reporting $1 or more of wage or salary income. For definition of median, see headnote, table 13, p. 13

Color and major industry group	Both sexes		Male		Female	
	1939	1949	1939	1949	1939	1949

12. Prices

The indexes issued by the Bureau of Labor Statistics have been, since the beginnin of the century, the major source of price statistics in summarized form. This agenc prepares weekly and monthly indexes of wholesale prices, a daily index based o spot market prices of 28 commodities; indexes of food prices at retail in 56 larg cities; and indexes of consumers' prices for moderate-income families in 34 large citie

The **wholesale price index** measures average changes in commodity prices of abou 900 commodities at the primary market level—usually the level at which th commodity is first sold commercially in substantial volume. The prices are ordinaril those charged by representative manufacturers or producers to the types of distributor or industrial consumers who are characteristic buyers of the product. Whereve feasible the prices are f. o. b. point of production or sale. In the case of some com modities, prices quoted in organized commodity markets are used.

The index measures completely the price changes of only the 900 commodities (an others that are closely related) which are specifically defined for pricing both physicall and in terms of market structure. It is not an over-all measure of the "general pric level" or of "the purchasing power of the dollar"—it does not include all classes o commodities (real estate, securities, services, etc.) which are factors in the "gener price level."

Commodities are priced in terms of a given specification at stated terms of trad Most of the commodities are represented by a single quotation. Since 1934, in com puting the index the price of each article is weighted by the quantities marketed durin the years 1929–1931, except for agricultural commodities. For agricultural com modities, average market sales in the years 1929, 1930, and 1931 are used. Indexe are computed for 10 major commodity groups, 49 subgroups and 5 economic groups.

Beginning with 1921, in computing indexes for commodity groups, articles fallin under more than one group are included under each classification. For exampl articles produced on the farm which reach the consumer practically unchanged i form, such as potatoes, milk, and eggs, are included among both farm products an foods. Duplication also occurs between the metals and metal products and buildin materials groups. However, in computing the index for all commodities, such articl are counted only once.

The table "Wholesale Prices of Important Commodities: 1929 to 1949" shown in th 1950 edition of the *Abstract* (table 333) has been omitted from this edition. Th Bureau of Labor Statistics suggested that this table be deleted inasmuch as problem of changing specifications and comparability make the indicated historical comparison very difficult and comparatively meaningless. Few, if any, of the commodities in cluded in this table have remained comparable from 1929 to 1949.

The **consumers' price index** measures average changes in retail prices of goods rents and services, weighted by quantities bought in 1934–36 by families of wage earners and lower-salaried clerical workers in large cities, whose annual income averaged $1,524 in 1934–36. It does not measure changes in the total amount familie spend for living or relative differences in prices or living costs between cities. The lis of items priced for the index includes approximately 200 goods and services. Fo many goods a number of different articles or qualities of articles are included in th index. Sales taxes are reflected wherever applicable, but income taxes, social securit deductions, and bond deductions are not included. Since March 1943, food indexe have been based upon changes in food prices in 56 cities. From September 194

through June 1947, consumers' price indexes were computed monthly for 21 cities, and in March, June, September, and December for 13 additional cities; beginning July 1947, indexes have been computed monthly for 10 cities, and once every 3 months for 24 additional cities according to a staggered schedule. Since July 1947, the following schedule has been in effect:

Food prices and indexes, for 56 cities each month;
Fuel prices and indexes for 34 cities each month;
Commodities (other than food and fuel) and services indexes for 10 cities monthly and for 24 additional cities quarterly on a rotating cycle;
Rents quarterly for 34 cities, on a rotating cycle;
All items and group indexes for 10 cities monthly, and for 24 additional cities quarterly on a rotating cycle;
National indexes (average of large cities) for all items and groups, monthly, based upon prices in the cities surveyed and estimated changes in the unpriced cities.

The weights used in calculating the index are based on studies of actual expenditures by families of wage-earners and lower-salaried workers. A study conducted in 1917–19 provided the weights used from 1913 to 1935. Since 1935 the index has been based on 1934–36 expenditure patterns.

The retail food price indexes presented in this section for periods from January 1935 to March 1943 are based on the distribution of expenditures as shown by the 1934–36 study of expenditures of wage earners' and lower-salaried clerical workers' families. In March 1943, the weights for this index were revised to take account of changes in food purchases due to wartime shortages and rationing. In January 1946, these wartime weight adjustments were eliminated and certain other revisions made in the calculating procedures. The indexes are computed from prices of 54 foods for the period from January 1935 to March 1943, 61 foods for the period March 1943 to June 1947, and 50 foods thereafter. Aggregate costs of these foods in each of 56 cities (51 cities prior to March 1943), weighted to represent total purchases, have been combined for the United States with the use of population weights. Indexes for all periods prior to January 1935 are converted from indexes computed for corresponding periods on the 1923–25 base.

The Bureau of Agricultural Economics prepares currently **indexes of prices received for farm products and of prices paid by farmers.** (See text, p. 596.)

In comparing the **movement of the indexes of consumers' prices and of the prices paid by farmers** for commodities bought for family living (table 681), it should be noted that the consumers' price index includes rents and other services and the farm index does not, and that the list of commodities included in the two indexes and their geographic coverage differs because farm family buying differs considerably from that of city families, and farm and city workers are located in different parts of the country.

A number of **privately compiled indexes of wholesale and retail prices** provide some groupings not found in the official indexes. For example, the National Industrial Conference Board prepared current indexes for both a prewar and a wartime budget. Special purpose indexes have not been included in this section.

The user of price indexes is reminded that the margin of error in price statistics due to unrecorded changes in quality, in discounts, and in undercover charges is greater in war than in peacetime.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series L 15–25") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

No. 326.—Wholesale Prices—Indexes, All Commodities and by Economic Classes: 1930 to 1950

[**Figures in column heads indicate current number of quotations.** Indexes of National Bureau of Economic Research are weighted arithmetic means for 680 price series, weights being based upon average value of production in 1927 and 1931. For method of computing Department of Labor index, see general note, p. 276. For Department of Labor publications in which data appear, see source note, table 325]

YEAR	DEPARTMENT OF LABOR 1929=100				NATIONAL BUREAU OF ECONOMIC RESEARCH 1929=100				
	All commodities	Raw materials	Semi manufactures	Manufactured products	All commodities	Producers' goods	Consumers' goods	Durable goods	Nondurable goods [1]

[1] Perishable and semidurable.

[2] Sum of number of quotations for producers' and consumers' goods and for durable and nondurable goods is greater than number of all commodities owing to duplication of certain price series in classifications. For example, identical price quotations on flour are used in both producers' goods and consumers' goods.

No. 327.—Indexes of Spot Market Prices of 28 Commodities: 1939 to 1950

[**August 1939=100.** Figures in column heads represent number of commodities. Index is computed daily; represents unweighted geometric average of daily price quotations of 28 commodities, traded on organized exchanges. The index is much more sensitive to changes in market conditions than is monthly or weekly wholesale price index]

PERIOD	General Index	IMPORT AND DOMESTIC		Domestic agricultural	FOODSTUFFS AND INDUSTRIAL	
		Import commodities	Domestic commodities		Foodstuffs	Raw industrial
	(28)	(11)	(17)	(7)	(11)	(16)

No. 339.—Annual Average Unit Values of Important Articles Imported: 1923 to 1949

[Values required by law to represent values *in foreign markets* whence exported to United States. "Ton" signifies long ton of 2,240 pounds except where otherwise specified. Averages obtained by dividing total value of imports of specified article by total quantity. Where, as in some commodities considerable price variations may exist between different grades, methods of packing, etc., and proportions of grades, etc., may vary from year to year, such averages may show actual price movements only roughly]

Year	Cheese, per pound	Fish, cured, per barrel (200 pounds)		Hides and skins, per pound		Wheat, per bushel	Bananas, per bunch	Cocoa, per pound	Coffee, per pound	Tea, per pound

13. Elections

The conduct of elections in the United States for Federal, State, and local offices an on State and local issues, is regulated by State laws or, in some cities and a few counties by local charters. An important exception is that the United States Constitution pre scribes the basis of representation in Congress and the manner of electing the Presiden of the United States and grants to Congress the right to regulate the times, places, an manner of electing Federal officers. Almost all of the more than 155 thousand govern mental units in the United States conduct elections at various intervals—annua biennial, quadrennial, or longer—for different types of offices and other purposes. N regular and complete system exists for reporting either the number of elections hel or the numbers of votes cast for the multitude of candidates, except for Federal office and in most States, for State offices. Few States require central reporting on loca elections. The numbers of governments holding elections and the numbers of voter participating vary between Presidential and the intervening Congressional electio years, and between even-numbered and odd-numbered years.

The tables in this section give summary data, by State, on elections to Feder offices. The number of registered voters in 1942 in each city of 25,000 inhabitants o more is given in the Cities Supplement to the Statistical Abstract.

Historical statistics.—In this section, tabular headnotes (as "See also *Historica Statistics*, series P 27–31) provide cross-references, where applicable, to *Historica Statistics of the United States 1789–1945*. In that historical supplement to th *Statistical Abstract*, statistics are carried back year by year as far as possible. See als the historical appendix of the present issue of the *Abstract* for specific titles of serie and the earliest year shown in the supplement.

No. 341.—Vote for Presidential Electors, by Major Political Parties: 188 to 1948

[See also *Historical Statistics*, series P 27–31]

No. 344.—Apportionment of Congressional Representation, by States, From Adoption of Constitution to 1950

[Until 1940, population for apportionment purposes excluded Indians not taxed and, until 1870, two-fifths of slaves. In 1940, all Indians were held subject to Federal taxation. Until 1850, apportionment ratios chosen arbitrarily; 1850 to 1900, ratios were apportionment population of U. S. divided by number of Representatives; from 1910 on, apportionments computed from priority lists, not from ratios. No apportionment in 1920. For discussion of apportionment methods, see S. Doc. No. 304, 76th Cong., 3d sess., "A Survey of Methods of Apportionment in Congress," by Edward V. Huntington. See also *Historical Statistics*, series P 57-61, which shows apportionment totals under Apportionment Act, *excluding* Representatives assigned after apportionment (footnote 7 below)]

[1] To be effective in 1953.
[2] Number of Representatives not to exceed 1 for each 30,000 inhabitants.
[3] See headnote.
[4] Membership increased from 233 to 234 by act of July 30, 1852 (10 Stat. L. 25). See note 7.
[5] Membership increased from 233 to 241 by act of Mar. 4, 1862 (12 Stat. L. 353). See note 7.
[6] Membership originally fixed at 283 but increased to 292 by act of May 30, 1872 (17 Stat. L. 192). One Member assigned to Colorado after apportionment.
[7] Assigned after apportionment.
[8] Included in apportionment act in anticipation of Statehood.
[9] Included in the 20 Members originally assigned to Massachusetts but credited to Maine after its admission as a State, Mar. 15, 1820 (3 Stat. L. 555).

No. 346.—Vote for United States Representatives, by Major Political Parties, by States: 1948 and 1950

[In each State, totals represent the sum of votes cast in each Congressional District, except as follows. In New Mexico and North Dakota, no representatives were elected from districts, but more than one was elected from the State at large; in these States, each party total represents votes cast for that candidate of the party receiving highest vote. In Delaware, Nevada, Vermont, and Wyoming only one representative is elected. In Connecticut and Ohio, representatives are elected by district except one, who is elected at large; the at-large vote is not reflected in this tabulation. In numerous States, one or other of the major parties had no candidates in some districts. In those cases where votes of a party, as such, are cast in endorsement of a candidate of another party, the votes are here counted as for the endorsing party. See also notes below]

14. Federal Government Finances

The Government's proposed budget for the ensuing fiscal year is transmitted to the Congress by the President in January, and contains the President's recommendations for budget appropriations and other authorizations for the maintenance of the various departments and establishments. It includes estimates to carry out both existing laws and proposed legislation. Data from *The Budget of the United States Government* for the fiscal year ending June 30, 1952, are presented in tables 352–357. The Treasury Department publishes a *Digest of Appropriations* each year, which summarizes appropriation legislation enacted by the Congress, and also publishes yearly the *Combined Statement of Receipts, Expenditures and Balances*, which is an abstract of the books of the Treasury relating to all of the receipt and appropriation accounts of the Government.

The day-to-day financial operations of the Federal Government are reflected in the *Daily Statement of the United States Treasury*, which covers all of the receipts and expenditures of the Government, including those arising under public debt operations and also exhibits a *Statement of the Public Debt*, as of the end of the month and on the first working day of the next month. The *Treasury Bulletin*, a monthly publication, contains analytical material on fiscal operations and related Treasury activities. The *Annual Report of the Secretary of the Treasury* is a convenient summary of yearly data relating to somewhat broader fields, and, in addition, contains texts of most of the public documents relating to fiscal policy and operations. The *Annual Report of the Commissioner of Internal Revenue* gives a detailed account of tax collections by kind of tax and by geographic area.

Two other special aspects of Federal finances are dealt with in the *Circulation Statement of United States Money* (monthly) and *Prices and Yields of Public Marketable Securities . . .* (monthly), both issued by the Treasury Department. See tables 421, 422, and 478, pp. 382, 383, and 420.

Data from income tax returns are compiled by the Bureau of Internal Revenue of the Treasury Department. This Bureau's annual report, *Statistics of Income, Part 1*, is compiled from data reported on individual income tax returns, taxable fiduciary income tax returns, Federal estate tax returns, and gift tax returns. *Statistics of Income, Part 2*, also published annually, presents data from corporation income and declared value excess-profits tax returns, corporation excess-profits tax returns, and personal holding company returns. Data from these reports appear on pages 319–335, 437–439, and 443.

ACCOUNTS THROUGH WHICH TREASURY OPERATIONS ARE EFFECTED

All receipts of the Government are covered into the general fund of the Treasury from which all expenditures are made. Receipts and expenditures are classified in the Treasury's records according to the class of accounts through which operations are effected. Transactions are segregated in order to exhibit separately those effected through general and special accounts, as contrasted with those effected through trust accounts. A brief description of the items handled through these accounts is as follows:

1. General accounts.—Money represented in the general accounts may be withdrawn from the Treasury only in pursuance of appropriations made by Congress. The principal sources of general account receipts are income taxes, miscellaneous internal revenue, social security taxes, taxes upon carriers and their employees, customs duties, and miscellaneous receipts, such as proceeds from the sale of surplus property.

There are five classes of appropriations payable through the general accounts of th Treasury, namely: (a) one-year appropriations, which are available for incurring obli gations only during a specified fiscal year; (b) multiple-year appropriations, which ar available for incurring obligations for a definite period in excess of one fiscal year (c) continuing (no year) appropriations, which are available for incurring obligation until the appropriation is exhausted or until the object for which appropriated ha been accomplished; (d) permanent-specific appropriations, which are fixed amount provided for each of a series of years by permanent legislation, without annual actio of Congress; and (e) permanent-indefinite appropriations, which are indefinite amount (so much as may be necessary) provided by permanent legislation without annua action of Congress, such as the indefinite appropriation to cover interest on the publi debt.

2. Special accounts.—Receipts in these accounts are generally funds received unde special authorization of law which may be expended only for the particular purpose specified therein, and not for general purposes. The larger items are those receipt for the reclamation fund, Alaska Railroad fund, and receipts under the Mineral Leasin Act, under the Department of the Interior, and the national forest funds, under th Department of Agriculture.

3. Trust accounts.—Trust account receipts are those received for the benefit o individuals or groups of individuals and are to be used for the purposes specified i the trust, and are not, therefore, available for general expenditures. An example of trust account is the Federal old-age and survivors insurance trust fund, to whic amounts equivalent to the receipts from the taxes on employment levied for the suppor of old-age benefits are automatically appropriated.

BASIS OF TABLES

A number of different bases are used in compiling data relating to Federal finances as explained below, and the basis used is noted at the head of each table.

Daily Treasury Statement.—Most tables at present dealing with Federal fisca affairs are compiled on the basis of the *Daily Treasury Statement.* This statemen is compiled from the latest daily financial reports received from Government depos itaries and Treasury offices holding Government funds, and, because of the prompt ness with which the information is obtained and made public, it has come into genera use as reflecting the Government's finances and the condition of the Treasury from day to day. Effective with the beginning of the fiscal year 1947 expenditures o several departments and establishments serviced by the Division of Disbursement, Treasury Department, are reported in the *Daily Treasury Statement* on the basis o checks issued. A clearing account is provided to take care of outstanding checks. Beginning July 1, 1948, such expenditures are reported as of the day on which checks are issued in payment of obligations, through the use of teletype facilities.

During the fiscal year 1950, an important change was made in the *Daily Treasury Statement* in the method of reporting interest on the public debt. Commencing November 1, 1949, interest on the public debt is reported as an expenditure when such interest becomes due and payable, as distinguished from the previous practice of showing the expenditure on the basis of interest paid by the Treasurer. In order to take care of the transition in the basis of reporting, the expenditures for interest in the fiscal year 1950 represent not only the interest which became due and payable during that year but also the interest for prior years which had not been presented as of June 30, 1949, for payment by the Treasurer.

Other tables are on bases reflecting the accounts or statistics of the various Treasury offices compiling them for the definite period under review. Such other bases are the following:

Public debt accounts.—Tables on this basis reflect the audited accounts of the Bureau of the Public Debt for the actual transactions of the period under review.

Warrants issued.—Warrants issued (receipts) by the Secretary of the Treasury for *all moneys received by the* Treasurer of the United States represent, as provided by

law, the formal covering of receipts into the Treasury. Warrants issued (expenditures) by the Secretary of the Treasury represent charges against appropriations provided by law. Moneys are disbursed by the Treasurer of the United States upon such warrants. Some warrants do not represent actual payments to claimants but are merely advances of funds to disbursing officers for the payment of Government obligations. Expenditures compiled on this basis necessarily include unexpended balances to the credit of disbursing officers.

Checks issued.—This basis, more than any other, reflects the real expenditures of the Government since it relates to expenditures made on the basis of checks drawn by disbursing officers.

Collection basis.—Statements showing receipts on this basis are compiled from reports received by the various administrative offices from collecting officers in the field, such as actual collections recorded on their books by collectors of internal revenue and collectors of customs but without regard to the time of deposit of such collections to the credit of the Treasurer.

Further details with respect to Treasury accounting bases and procedures are shown on pages 351–353 of the *Annual Report of the Secretary of the Treasury* for the fiscal year 1949.

Public and private debt.—Data from a special study on debt by the Office of Business Economics of the Department of Commerce are presented in this section. (See table 378.) These data are published annually in the *Survey of Current Business.*

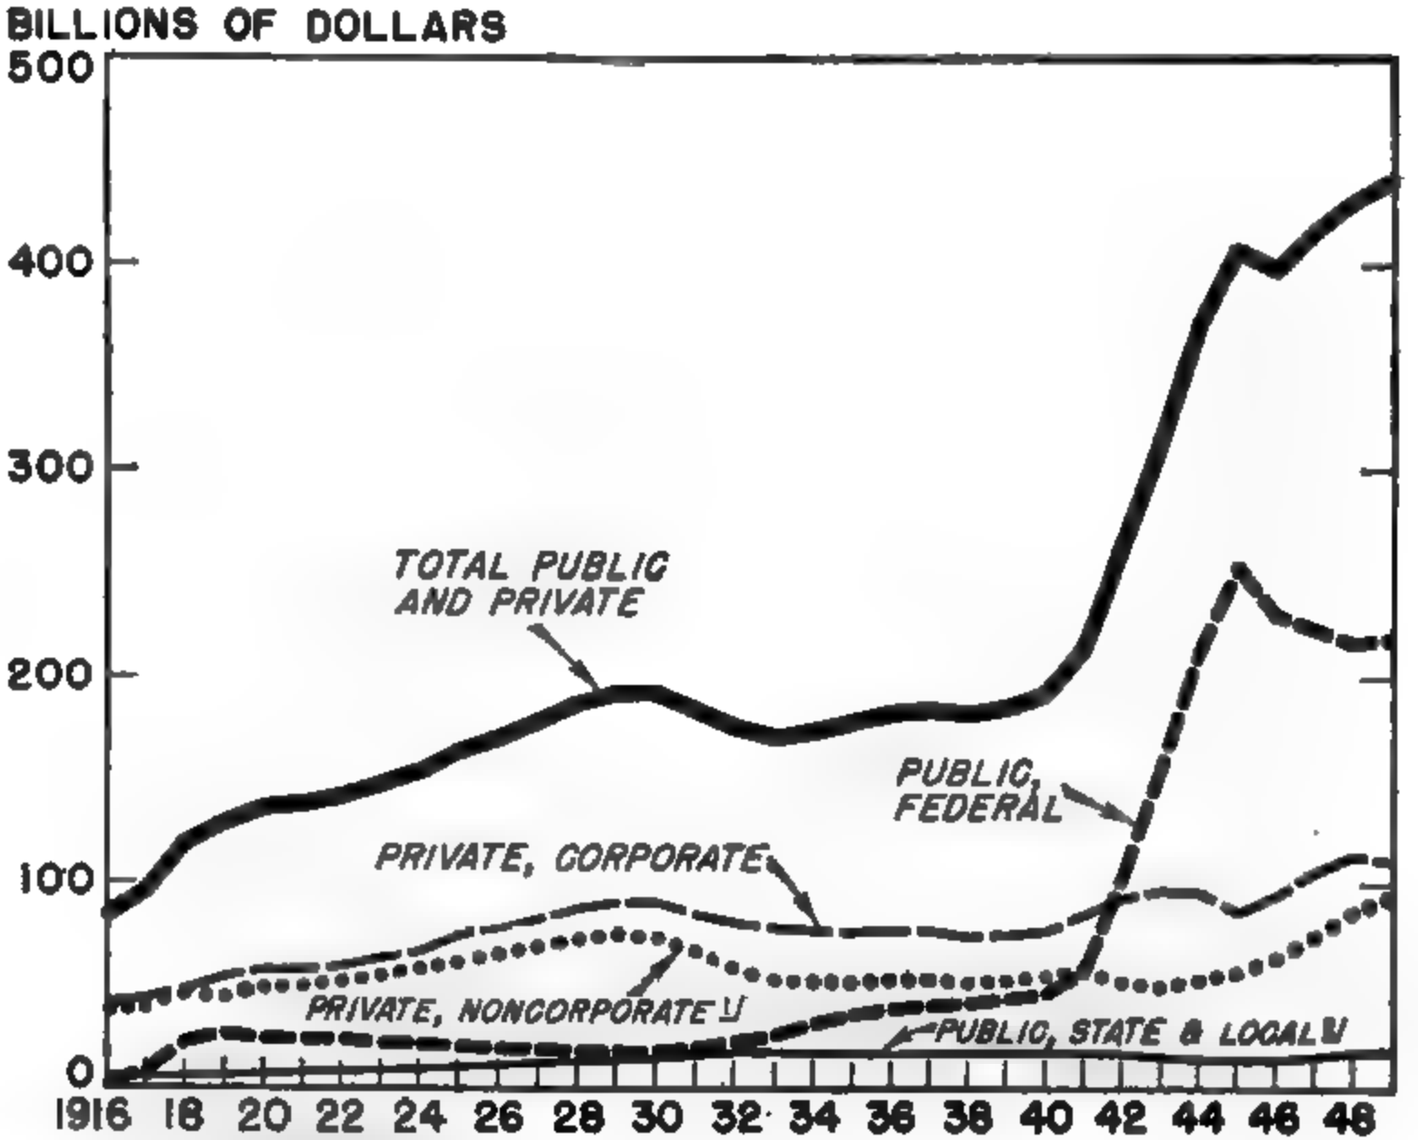
Gross debt, as defined in this study, consists of all classes of legal indebtedness except the following: (1) Deposit liability of banks and the amount of bank notes in circulation; (2) value of outstanding policies and annuities of life insurance carriers; (3) short-term debts among individuals and unincorporated nonfinancial business firms; and (4) nominal debt of corporations, such as bonds which are authorized but unissued or outstanding but reacquired.

Net public and private debt outstanding is a comprehensive aggregate of indebtedness of borrowers after elimination of certain duplicating governmental and corporate debt. This measure of indebtedness provides a more significant indication of trends in debt structure than does gross debt, since effects of nominal changes in financial practices and organization are largely removed. To obtain net figures, gross or total debt is adjusted for specific types of duplications pertaining to the following sectors of the economy: (1) Federal Government and its corporations and agencies generally; (2) State and local governments treated as a single entity; and (3) within the corporate area, those affiliated but legally distinct corporations which operate under a single management, treated here as a unit. In the noncorporate private area, data are gross throughout with no adjustments for duplications.

The net debt concept for each of the four sectors can be summarized as follows: Federal Government net debt is that owed to all other sectors of the economy except the Federal Government proper and its corporations and agencies; State and local government net debt is that owed to all other economic entities except State and local governments; corporate net debt is that owed to all other entities (including corporations) except to corporate members of an affiliated system; and private noncorporate net (or gross) debt is summation of all forms of legal indebtedness except that among individuals and unincorporated nonfinancial business firms. Data represent balances of debts outstanding at end of calendar years, except data for State and local governments which are for June 30 of each year.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series P 109) provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945.* In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

FIG. XVI.—NET PUBLIC AND PRIVATE DEBT, BY MAJOR COMPONENTS: 1916 TO 1949
[See table 378]



1 Data represent individual and noncorporate private debt.
2 Data are for June 30 of each year.

350.—Receipts and Surplus or Deficit of the Federal Government: 1789 to 1950

sands of dollars. On basis of warrants issued through 1915, thereafter on basis of daily Treasury state-
s except as noted. General, special, emergency, and trust accounts combined through 1930; thereafter,
accounts excluded. For explanation of bases and accounts, see general note, p. 301. See also *Historical*
tics, series P 89-98]

[1] Excludes debt retirements and beginning 1931, refunds of receipts and capital transfers.

[2] Excludes civil expenditures under War and Navy Depts. in Washington through 1915. Subsequent to 191 includes all expenditures made by Dept. of Army (including rivers and harbors and Panama Canal) and Dept. o Navy. Dept. of Army includes expenditures of Dept. of Air Force from funds made available prior to 1949. Ex penditures of Dept. of Air Force for 1949 were $1,690,461,000, and for 1950, $3,520,633,000.

[3] On basis of warrants issued through 1930; thereafter, on basis of checks issued. Expenditures for Indians ex clude interest accounts, which are included in trust fund expenditures beginning 1940. Veterans' pensions repre sent expenditures under appropriation "Army and Navy pensions," administered by Veterans' Administration

[4] Includes civil expenditures under War and Navy Depts. in Washington through 1915, expenditures of Office o Secy. of Defense, unavailable funds charged off under Act of June 3, 1922, expenditures for "Govt. corporation (wholly owned), etc. (net)" beginning 1932, and expenditures for Indians and veterans' pensions beginning 1949

[5] Represents gross debt as of end of each period; e. g., 1800, 1810, etc.

[6] Years ending Dec. 31 through 1842; average for 1789–1800 begins Mar. 4, 1789; average for 1841–50 is for Jan. 1 1841–June 30, 1850. See note 5 concerning gross debt.

[7] Included in all other.

[8] For comparability with earlier years, all transactions relating to Foreign Economic Cooperation Trust Fund (amounting to $3,000,000,000) have been consolidated with budget expenditures.

Source: Treasury Department, Annual Report of the Secretary; annual and current data published in Daily Statement of the U. S. Treasury.

). 352.—Federal Government Expenditures by Organization Unit: 1943 to 1950

ons of dollars. For years ending June 30. Expenditures reported on a checks-issued basis, adjusted in o daily Treasury statement basis (which is partly checks issued and partly checks paid). This table es budget expenditures and trust account expenditures and investments. "Budget" receipts, expendi- and authorizations, as used in this and following tables, are mainly those of general and special accounts. mportant exceptions are appropriations from general fund to Federal old-age and survivors trust fund funds of receipts, both of which are excluded from expenditures and deducted from receipts. Budget litures also include net transactions (expenditures minus receipts) of wholly owned Government cor- ons and enterprises; omitted from both expenditures and receipts are transfers of capital between wholly Government corporations and the United States Treasury, and debt transactions of Government en- es (expenditures from public debt authorizations are included; see also table 355). Figures in early years ot been revised to reflect recent changes in organizational structure.]

: Bureau of the Budget; the Budget of the United States Government.

No. 353.—Receipts From and Payments to the Public by the Federal Government: 1929 to 1950

[In billions. For years ending June 30. Receipts from and payments to public exclude intragovernmental financial transactions but include operations of trust accounts as well as budget accounts of Federal Government. This table therefore shows flow of money on cash basis between Federal Government as a whole and the public. Net borrowing or repayment of borrowing from the public excludes borrowing by Treasury from Federal trust accounts and Government corporations, and also excludes certain types of public debt transactions like issuance and redemption of armed forces leave bonds. The public is defined to include individuals; banks (including Federal Reserve and Postal Savings System); businesses; private corporations; State, local and foreign governments; and international organizations. For additional explanation, see 1952 Budget, pp. 950–951, headnote to table 352, and general note, p. 301]

85.—Budget Appropriations and Other Authorizations for Federal Agencies, by Organization Unit: 1950

[ons of dollars. For year ending June 30. The Budget total of "new obligational authority" represents new authorizations enacted for any fiscal year for Federal agencies to incur obligations. This total in- "net new appropriations," "reappropriations," "contract authorizations," and "authorizations to expend ublic debt receipts." "Net new appropriations" represent total of all appropriations less appropriations l to liquidate prior year contract authorizations. "Reappropriations" continue available in the succeed- al year the unused balance of an appropriation which would otherwise expire for obligation purposes. act authorizations" permit placement of specific obligations or contracts but require subsequent appro- ns to "liquidate" them (i. e., to authorize withdrawal of funds from Treasury in payment of obligations). orizations to expend from public debt receipts" authorize use of proceeds of Treasury borrowing to finance types of Government programs. See also general note, p. 301, and headnote to table 352]

No. 363.—Individual and Taxable Fiduciary Income Tax Returns—Summary: 1925 to 1948

[Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, unaudited except to insure proper execution. Under revenue laws, the filing requirements applicable to individuals (citizens or residents of the United States), for the years shown, are as follows: (1) Single, or married and not living with husband or wife: for 1925 and 1930, net income of $1,500 or over; 1935, $1,000 or over; 1940, gross income of $800 or over; (2) Married and living with husband or wife: for 1925 and 1930, combined net income of $3,500 or over; 1935, $2,500 or over; for 1940, combined gross income of $2,000 or over; (3) For 1945–47, every individual with gross income of $500 or over; and for 1948, $600 or over; for refund purposes, returns are also required with respect to gross incomes under $500 for 1945–47, or under $600 for 1948; from which taxes have been withheld. (For 1925–35, returns are required to be filed by individuals having gross income of $5,000 or over if single, or married and not living with husband or wife; or having combined gross income of $5,000 or over if married and living with husband or wife; regardless of net income.) *Data for returns showing no net income or no adjusted gross income, filed in accordance with these provisions, are not included in statistics given here.* Fiduciaries are required to file returns on same basis as single individuals except that a return is required for every estate or trust of which any beneficiary is a nonresident alien and, beginning 1938, for every trust having net income of $100 or over. Partnership net profit or net loss is reported on individual returns of copartners according to their shares. See also *Historical Statistics*, series P 144–147]

ITEM	1925	1930	1935	1940	1945	1946	1947	1948 (prel.)
Number of returns, total [1] thousands	4,171	3,708	4,575	14,665	49,751	52,600	54,800	51,746
Taxable do	2,501	2,038	2,111	7,505	42,651	37,916	41,579	36,411
Nontaxable do	1,670	1,670	2,464	7,161	7,100	14,685	13,221	15,334

Total tax [3] do	735	477	657	[4] 1,496	17,050	16,076	18,076	15,442
Average per return: [5]								
Income	$5,249	$4,887	$3,259	$2,495	$2,418	$2,554	$2,743	$3,173
Tax	$176	$129	$144	$102	$343	$306	$330	$298
Tax per capita of total population [5]	$6.35	$3.87	$5.14	$11.32	$128	$114	$126	$105
Percent of population filing returns [5]	3.60	3.01	3.58	11.10	37.43	37.43	38.05	35.27
Taxable fiduciary returns: [1]								
Number thousands	(1)	(1)	(1)	(1)	114	122	110	101
Total income millions of dollars					857	1,066	974	987
Total tax do					176	205	173	176

[1] Taxable fiduciary returns included with individual returns through 1940, shown separately thereafter.

[2] *Net income* (*shown for 1940 and prior years*) is total income less statutory deductions, but before deduction of exemption or credits allowable in computing amount subject to tax. *Adjusted gross income* (*shown for 1945–48*) is defined as gross income minus allowable trade and business deductions, expenses of travel and lodging in connection with employment, reimbursed expenses in connection with employment, deductions attributable to rents and royalties, certain deductions of life tenants and income beneficiaries of property held in trust, and allowable losses from sales of property.

[3] Tax tabulated for 1940 and prior years is before deduction of credits for tax paid at source and tax paid to a foreign country or possession of United States, while tax for 1945–48 is after deduction of such credits.

[4] Includes defense tax.

[5] For individual returns only, 1945 and later years.

Net loss	215	183	235	283	290	286	4
Sales or exchanges of property other than capital assets: [9]							
Net gain	66	65	123	99	108	107	2
Net loss	74	71	68	68	83	82	1
Annuities and pensions [10]	180	195	231	226	293	293	------
Income from estates and trusts [11]	930	956	1,120	1,239	1,322	1,307	15
Miscellaneous income [12]	612	612	768	665	768	748	19
Total tax	16,347	17,226	16,281	18,249	15,618	15,442	176
Number of returns (thousands)	47,012	49,865	52,722	54,910	51,847	51,746	101

[1] See note 2, table 363.

[2] Salaries, wages, commissions, etc., include annuities, pensions, and retirement pay not reported in schedule for annuities and pensions, but exclude wages of not more than $100 per return from which no tax is withheld, reported on Form W–2 for 1944–47, and on Form 1040A for 1948. (See note 12.)

[3] Dividends received exclude amounts received through partnerships and fiduciaries; exclude amounts not exceeding $100 per return reported on Form W–2 for 1944–47 and on Form 1040A for 1948. (See note 12.)

[4] Interest received includes interest on notes, mortgages, bank deposits, corporation bonds before amortization of bond premium, and taxable and partially tax-exempt interest on Government obligation before amortization of bond premium; also includes, when received through partnerships and fiduciaries, partially tax-exempt interest on Government obligations and partially tax-exempt dividends on share accounts in Federal savings and loan associations. Excludes amounts not exceeding $100 per return reported on Form W–2 for 1944–47 and on Form 1040A for 1948. (See note 12.)

[5] Net profit from rents and royalties is excess of gross rents over depreciation, repairs, interest, taxes, and other rent expenses and excess of gross royalties over depletion and other royalty expenses. Conversely, net loss from these sources is excess of expenses over gross receipts.

[6] Net profit from business is excess of gross receipts over business expenses and net operating loss deduction due to net operating loss from business, partnership, and common trust funds for two preceding years. Conversely, net loss from business is excess of business expenses and net operating loss deduction over gross receipts from business.

[7] Partnership profit or loss excludes partially tax-exempt interest on Government obligations, dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942, and net gain or loss from sales of capital assets. In computing partnership profit or loss, charitable contributions are not deductible nor is the net operating loss deduction allowed.

[8] Capital assets consist of all property held by taxpayer *other than* (1) stock in trade or other property held primarily for sale to customers, or (2) kinds of property specified in note 9. Net gain or loss reported is a combination of current year capital gains and losses to be taken into account (including those from partnerships or common trust funds in which taxpayer participates) and capital loss carry-over from the years 1942–47, inclusive, not previously deducted. Allowable net loss is limited to amount of such loss, or to net income (adjusted gross income if taxed under Supplement T) computed without regard to gains and losses from sales of capital assets, or to $1,000, whichever is smallest. For details as to portion of gains and losses taken into account, description of capital loss carry-over, and special treatment of certain gains and losses, see Statistics of Income, Part 1.

[9] Sales of (1) property used in trade or business of a character which is subject to allowance for depreciation, (2) Government obligations issued on or after Mar. 1, 1941, on a discount basis and payable, without interest, within 1 year from issue, and (3) real property used in trade or business.

[10] Income shown from annuities and pensions is only the taxable portion of amounts received. Amounts received to extent of 3 percent of cost are reported annually, until aggregate of amounts received and excluded from income equals cost. Thereafter, entire amounts received are taxable and must be included in income. Annuities, pensions, and retirement pay from which tax is withheld may be reported as salaries and wages.

[11] Income from estates and trusts excludes partially tax-exempt interest on Government obligations and dividends on Federal savings and loan association shares issued prior to Mar. 28, 1942. Such income is reported in partially tax-exempt interest.

[12] Miscellaneous income includes all taxable income not accounted for elsewhere in this table; also includes wages not subject to withholding, dividends, and interest, not exceeding in total $100 per return reported on Form W–2 for 1944–47 and Form 1040A for 1948.

No. 366.—Individual Income Tax Returns, by Family Relationship: 1943 to 1948

[Money figures in thousands of dollars. See headnote, table 363]

Family relationship	1943	1944	1945	1946	1947	1948 [1]
Number of returns	43,506,553	46,919,590	49,758,991	52,609,470	54,799,936	51,745,697
Joint returns of husbands and wives	22,231,629	24,042,777	24,566,056	26,332,777	26,010,512	29,484,845
Separate returns of husbands and wives:						
Men [2]	1,778,379	1,828,559	1,932,840	2,062,824	2,542,288	1,146,292
Women [2]	2,042,144	2,037,356	1,993,196	2,041,965	2,690,948	1,247,711
Separate community property returns:						
Men [3]	965,929	632,924	1,029,782	1,055,573	1,594,446	228,359
Women [3]	936,666	642,285	995,066	989,978	1,643,794	228,087
Heads of families 1943:						
Men [3]	1,268,241					
Women [3]	1,558,534					
Not heads of families 1943, and returns of single persons 1944–48:						
Men [3]	5,421,119	7,489,589	8,790,401	10,591,162	10,767,013	10,405,679
Women [3]	7,313,912	10,246,100	10,423,650	9,536,891	9,550,935	9,004,724
Net income (1943); adjusted gross income (1944–48) [4]	99,209,962	116,714,736	126,301,131	134,330,006	150,295,275	164,173,861
Joint returns of husbands and wives	57,323,889	68,814,105	68,726,636	77,003,356	82,321,452	118,549,475
Separate returns of husbands and wives:						
Men	7,723,044	8,932,900	9,405,380	10,672,264	12,202,471	3,390,462
Women	3,838,856	4,516,423	4,541,274	5,121,373	6,190,606	2,435,848
Separate community property returns:						
Men	3,279,514	2,663,921	4,050,276	4,574,918	7,117,655	942,193
Women	3,167,591	2,586,072	3,735,452	4,246,183	5,979,593	934,978
Heads of families 1943:						
Men [3]	2,836,538					
Women [3]	2,519,820					
Not heads of families 1943, and returns of single persons 1944–48:						
Men [3]	6,808,275	14,035,945	14,526,588	17,759,551	20,266,550	21,066,176
Women [3]	9,712,335	15,165,369	15,315,523	14,952,367	16,216,945	16,854,765

[1] Preliminary.

[2] An unequal number of returns of husbands and wives results from use of sampling in certain income areas, from the fact that some returns lack sufficient information to identify the family relationship, and from deferment of filing returns by members of the armed forces.

[3] Single persons or married persons not living with husbands or wives.

[4] See note 2, table 363.

No. 370.—Corporation Income Tax Returns—Summary: 1925 to 1948

[Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, prior to audit adjustments or other changes made after the returns were filed, as the result of carry-backs, relief granted under section 722 of the Internal Revenue Code, recomputation of amortization of emergency facilities, or renegotiation of war contracts. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, and charitable organizations not operating for profit. Returns of inactive corporations are excluded from these tabulations, except as noted. In comparing data over a period of years, changes in law must be taken into consideration, especially discontinuance for 1934–41 of privilege of filing consolidated returns (except by railroad corporations and their related holding or leasing companies and, in 1940–41, by Pan American trade corporations) and the restoration of this privilege in 1942. See source publications for effect of changes on statistical items. For other corporation data based on income tax returns, see pp. 437–439 and 443. See also *Historical Statistics*, series P 152–164]

[Money figures in millions of dollars]

Adjusted excess profits net income	----	----	----	912	8,368	1,474	----	----

[1] Preliminary.

[2] Total compiled receipts consist of gross sales (less returns and allowances), gross receipts from operations (where inventories are not an income-determining factor), all interest received on Government obligations (less amortizable bond premium), other interest, rents, royalties, excess of net short-term capital gain over net long-term capital loss, excess of net long-term capital gain over net short-term capital loss, net gain from sale or exchange of property other than capital assets, dividends, and other taxable income. Total compiled receipts exclude nontaxable income other than tax-exempt interest received on certain Government obligations.

[3] Net income (or deficit), in general, represents taxable income less allowable deductions, except that for 1925 and 1930, and for 1940–47, amount shown is before deduction due to net operating loss of prior years. (For amounts of such deductions, see table 504, p. 438). Beginning 1936, dividends received on stock of domestic corporations are included in taxable income. For 1936 and later years, contributions or gifts are deductible in arriving at net income and are limited to 5 percent of net income before deduction.

[4] Includes defense tax.

[5] Tax repealed.

[6] Tax repealed. Amount shown for 1946 consists only of prorated tax for 1945 portion of fiscal year returns ending in July–November 1946.

[7] Number of returns with no net income, for 1925, includes returns of inactive corporations, not available separately.

[8] For tax reported, see above.

A corporation is classified industrially according to the business reported on the return. When diversified ivities are reported, the classification is determined by the industry which accounts for the largest percentage of al receipts.

For changes in classification affecting comparability of data, see "Statistics of Income for 1938, Part 2."

Less than $500,000.

No. 378.—Corporation Income Tax Returns—Number of Returns, Total Paid, by Industrial

[Money figures in thousands of dollars.

Line number	Major industrial groups [1]	Total number of returns [2]	Returns with net income	
			Number of returns	Total compiled receipts [3]
1	**All industrial groups**	587,683	282,531	343,273,851
2	**Mining and quarrying**	10,101	4,954	5,532,864
3	Metal mining	1,765	224	922,150
4	Anthracite mining	184	102	457,092
5	Bituminous coal, lignite, peat, etc.	1,965	1,371	2,216,763
6	Crude petroleum and natural gas production	3,915	2,191	1,364,725
7	Nonmetallic mining and quarrying	1,642	1,045	579,557
8	Mining and quarrying not allocable	630	21	12,174
9	**Manufacturing**	115,796	74,612	171,416,744
10	Food and kindred products	11,175	7,300	29,005,471
11	Beverages	3,427	1,927	4,475,420
12	Tobacco manufactures	250	129	2,796,496
13	Cotton manufactures	978	617	4,338,874
14	Textile-mill products, except cotton	5,217	3,553	6,858,101
15	Apparel and products made from fabrics	14,165	9,257	7,089,046
16	Leather and products	3,143	1,984	3,008,591
17	Rubber products	661	388	3,369,994
18	Lumber and timber basic products	3,778	2,681	3,044,943
19	Furniture and finished lumber products	6,099	3,972	3,149,481
20	Paper and allied products	2,570	2,087	5,617,782
21	Printing and publishing industries	12,243	8,789	5,317,103
22	Chemicals and allied products	7,854	4,577	13,224,389
23	Petroleum and coal products	602	407	14,968,960
24	Stone, clay, and glass products	4,253	2,760	3,522,149
25	Iron, steel, and products	9,083	6,462	18,294,496
26	Nonferrous metals and their products	4,414	2,614	5,033,236
27	Electrical machinery and equipment	3,092	1,716	7,690,761
28	Machinery, except transportation equipment and electrical	9,005	5,893	12,406,988
29	Automobiles and equipment, except electrical	1,209	820	11,214,901
30	Transportation equipment, except automobiles	1,194	552	2,236,531
31	Other manufacturing	6,974	3,767	2,941,261
32	Manufacturing not allocable	4,411	2,131	1,814,773
33	**Public utilities**	25,325	14,857	23,954,434
34	Transportation	17,878	10,673	14,599,521
35	Communication	4,286	2,119	2,734,834
36	Other public utilities	3,161	2,066	5,720,079
37	**Trade**	181,381	133,192	115,730,631
38	Wholesale	57,333	41,380	56,499,556
39	Commission merchants	8,413	5,412	3,193,018
40	Other wholesalers	48,920	35,968	53,306,538
41	Retail	100,982	75,157	49,854,715
42	General merchandise	6,687	5,318	13,765,796
43	Food stores, including market milk dealers	7,561	4,522	10,019,503
44	Package liquor stores	2,302	1,595	257,095
45	Drug stores	4,708	3,551	1,050,278
46	Apparel and accessories	13,689	10,446	4,773,003
47	Furniture and house furnishings	7,685	6,145	1,998,609
48	Eating and drinking places	12,864	6,306	1,322,238
49	Automotive dealers	16,299	14,426	8,609,052
50	Filling stations	1,849	1,206	422,541
51	Hardware	2,913	2,548	467,088
52	Building materials, fuel, and ice	8,562	7,173	2,053,751
53	Other retail trade	10,151	7,369	2,483,074
54	Retail trade not allocable	5,712	4,550	2,032,687
55	Trade not allocable	23,066	16,655	9,376,360

[1] A return is required of every citizen or resident alien who transferred by gift during calendar year to any one donee property exceeding $3,000 in value or who, regardless of value, made a gift of future interest in property. A nonresident alien is similarly required to file a return if gift consists of property situated in the United States.

[2] An exclusion is allowed of the first $3,000 of gifts, except gifts of future interest in property, made to any one donee during calendar year.

[3] The specific exemption of $30,000 less the sum of amounts allowed in prior years may be taken in one year or spread over a period of years, at option of donor. A nonresident alien donor is not entitled to this exemption.

No. 375.—Federal Estate Tax Returns—Summary: 1931 to 1945 and 1947

[All money figures in thousands of dollars. An estate tax return is required to be filed (1) for estate of every citizen and resident alien who died (a) in period Sept. 9, 1916, through 10:24 a. m., Feb. 26, 1926, or in period 5 p. m. June 6, 1932, through Aug. 30, 1935, the value of whose gross estate exceeds $50,000; (b) in period 10:25 a. m., Feb. 26, 1926, through 4:59 p. m., June 6, 1932, the value of whose gross estate exceeds $100,000; (c) in period Aug. 21, 1935, through Oct. 21, 1942, the value of whose gross estate exceeds $40,000; and (d) on or after Oct. 22, 1942, the value of whose gross estate exceeds $60,000; and (2) for estate of every nonresident alien who died (a) prior to Oct. 22, 1942, any part of whose estate is situated in U. S., at date of death, and (b) on or after Oct. 22, 1942, only if gross estate situated in U. S., at date of death exceeds $2,000. The estate of an individual who died after 5 p. m., June 6, 1932, is subject to 2 Federal estate taxes—basic tax and additional tax. Basic tax is computed at rates provided by Revenue Act of 1926, which rates are embodied in Internal Revenue Code as basic estate tax. Additional tax is excess of tentative tax computed at rates provided by act in force at date of death, over basic tax]

[1] Net taxable estate for 1933 and subsequent years is net estate for additional tax plus regular net estate for returns filed under the 1926 and prior acts. Tax shown is total net estate tax liability—the sum of net basic tax and net additional tax—and includes defense tax (10 percent of net tax) effective only for estates of individuals who died in period June 26, 1940, through Sept. 20, 1941.

[2] Excludes returns for estates of nonresident citizens who died prior to May 11, 1934.

[3] Includes returns for estates of nonresident citizens who died prior to May 11, 1934.

[4] No data compiled for 1946.

[1] Net estate classes are based on amount of net estate for additional tax plus specific exemption. (See note 2.)

[2] The specific exemption tabulated (a) for estates subject to additional tax is $60,000 under 1942 act; $40,000 under 1941, 1940, and 1935 acts; $50,000 under 1934 and 1932 acts, and (b) for estates subject to earlier acts is $100,000 under 1926 act, and $50,000 under 1924 and prior acts.

[3] Represents excess of total amount of funeral and administration expenses, debts of decedents, mortgages and liens, and support of dependents, over value of property includible in gross estate subject to claims.

[4] Excess of gross estate over allowable deductions, exclusive of specific exemption.

[5] Net estate after deducting specific exemption of $100,000, except for returns filed under 1924 or prior acts for which specific exemption is $50,000.

[6] Applies only to estates of individuals who died subsequent to June 6, 1932.

[7] Credits for (a) estate, inheritance, legacy, or succession taxes paid to States, etc., and (b) gift taxes paid to the Federal Government.

[1] Figures for 1800–50 are as of Jan. 1.
[2] Revised in accordance with Bureau of Census estimated population for continental United States as of July 1 of each year beginning 1850.
[3] Excludes bonds issued to Pacific railways and Navy pension fund.
[4] Includes old demand notes; U. S. notes (gold reserve deducted since 1900); postal currency and fractional currency less amounts officially estimated to have been destroyed; and also deposits held by Treasury for various purposes. Excludes gold, silver and currency certificates, and Treasury notes of 1890 for redemption of which an exact equivalent of the respective kinds of money or bullion was held in the Treasury.
[5] Less than $500,000. [6] Includes old Treasury (war) saving securities for 1925.

Savings bonds			(5)	2,600	40,700	47,100	48,800	49,90
Other securities	(5)	(5)	(5)	7,500	16,300	16,100	17,800	17,30
Miscellaneous investors [7]	(5)	(5)	(5)	700	8,900	9,100	10,000	10,20

[1] Holdings of commercial banks and mutual savings banks for 1925 to 1935 are reported book values, and holdings of residual investors therefore deviate from par values in these years. U. S. savings bonds, Series A–F, included at current redemption value.
[2] Includes all securities issued or guaranteed by U. S. Government, but excludes guaranteed securities held by the Treasury.
[3] Includes Postal Savings System.
[4] Consists of commercial banks, trust companies, and stock savings banks in United States and in Territories and insular possessions. Figures exclude securities held in trust departments.
[5] Not available separately. Combined totals of these items as follows: 1925, $13,874,000,000; 1930, $9,097,000,000 and 1935, $11,511,000,000.
[6] Comprises trust, sinking, and investment funds of State and local governments and their agencies, and Territories and insular possessions.
[7] Includes partnerships and personal trust accounts.
[8] Includes savings and loan associations, dealers and brokers, corporate pension funds, nonprofit institutions and investments of foreign balances and international accounts in this country.

[1] Includes partnerships, personal trust accounts. [2] Exclusive of banks and insurance companies.
[3] Comprises trust, sinking, and investment funds of State and local governments, Territories, and possessions.
[4] Includes savings and loan associations, non-profit associations, corporate pension trust funds, dealers and brokers, and investment of foreign balances and international accounts in this country.
[5] Data on daily Treasury statement basis. Since data exclude noninterest bearing debt, they differ slightly from those in table 390. Includes special issues to Federal agencies and trust funds, and excludes guaranteed securities held by Treasury.
[6] Includes Electric Home and Farm Authority notes, Federal intermediate credit bank debentures, Federal National Mortgage Association Notes, home loan bank debentures, War Finance Corporation bonds (World War I), and joint stock land bank bonds. Includes Federal land bank bonds only through June 30, 1946; on June 27, 1947, the U. S. proprietary interest in these banks ended. Excludes stocks and interagency loans.
[7] Less than $50 million. [8] Excludes obligations of the Philippine Islands after June 30, 1946.

No. 382.—Interest-Bearing Securities Issued by All Governmental Units in the United States—Estimated Amounts Outstanding, by Tax Status and Issuer: 1913 to 1950

[U. S. Govt. data on basis of public debt accounts prior to 1920; beginning 1920, on basis of Daily Treasury Statement. "Total amount outstanding" of securities of the several issuers differs from gross indebtedness of the issuers in that former excludes noninterest-bearing debt. "Total privately held securities" differs from net indebtedness of borrowers in several additional respects. Former derived by deducting from total amount of interest-bearing securities outstanding the amount of such securities held by Federal agencies, Federal Reserve Banks, and by public sinking, trust, and investment funds. Net indebtedness derived by deducting from gross indebtedness an amount equivalent to total volume of sinking fund assets of respective borrowers with no allowance for any other public assets. For exception to par value, see table 381]

[Par value. In millions of dollars]

Amount due United States from central branch Union Pacific R. R. on account of bonds issued (Pacific R. R. Aid Bonds Acts, approved July 1, 1862, July 2, 1864, and May 7, 1878):

Principal	1,60
Interest	1,49
Total	3,09

[1] Reconstruction Finance Corporation funds.

[2] Issued to United States as of July 1, 1948, a receipt for $1 as evidence of ownership of the Corporation by United States. Remainder of capital stock, $6,999,999 included in surplus.

[3] Excludes net payments from Treasury, or transfer of assets authorized by law, for which no formal receipts or other evidences of payments are held by Secretary of the Treasury in stock and nonstock corporations amounting to $1,212,517,000.

[4] Excludes $64,963,000, shown under bonds and notes. This sum represents funds borrowed from Treasury.

[5] Figures are as of May 23, 1950, at which time this activity was transferred to Housing and Home Finance Agency.

[6] Excludes $1,281,136,000 shown under bonds and notes. This sum represents funds borrowed from Treasury

15. State and Local Government Finances and Employment

Sources.—Statistics in this section are from the Bureau of the Census, Departmen of Commerce. Most of the tables are based upon recent reports in the regular Censu series on *State Finances*, *City Finances*, *Governmental Finances in the United State* and *Government Employment*. Some of the statistics here are from the most recen decennial Census of Governments, which related to the year 1942 and was designe to obtain and report basic data concerning all governmental units in the Unite States. A descriptive leaflet, *Census Bureau Publications on Governments*, is issue annually by the Bureau. Summary series of data based on annual and decenni Census reporting for years up to 1946 are available in the publication, *Historic Review of State and Local Government Finances.*

Compilation of data.—Financial statistics of States and large cities (those ove 250,000 population) which appear in this section were mainly compiled by repr sentatives of the Bureau of the Census directly from official accounts and records these governments, with the advice and assistance of local officers and employee Financial data for other local governments were compiled from audits, reports tabulations available in State offices or obtained from the individual units by ma canvass. State and local employment data were also obtained by mail canvas The Federal Government amounts which appear in certain tables relating to all leve of government are based upon data supplied to the Census Bureau by other Feder agencies.

Relation to State and local records.—Nation-wide statistics on governmenta finances and employment must be compiled and presented in accordance with unifor concepts and categories, rather than according to the highly diverse terminolog organization, and fund structure of individual governments. Accordingly, financi statistics which appear in this section for particular States and large cities, althoug based upon their official records and reports, will not agree directly with specif amounts in such original sources except where particular segments of the gover ment's accounts conform explicitly with standard Census reporting categories.

Terminology.—Financial statistics in this section relate primarily to "gener government," as distinct from operation of enterprises and the finances of gover mental trust and sinking funds. The terms "general revenue," "general expenditure and "general debt" are applied accordingly. All tax amounts, however, are reporte as general revenue; any tax collections deposited directly into trust or sinking fun are therefore included in general revenue and, as contributions to trust funds or pr vision for debt retirement, respectively, in general expenditure. As reported her revenue excludes receipts from borrowings, and expenditure includes provision f debt retirement. The Census reports from which the various tables are draw include detailed definitions of concepts and terminology.

Fiscal years.—Unless otherwise stated, financial data in this section relate to th fiscal years of the respective governmental units, as summarized in table 388. Feder and State government amounts are for fiscal years ending on June 30 of the ye specified, except for 6 States with earlier closing dates—3 in the same calendar ye and 3 in the latter part of the preceding calendar year. Local government figur are for fiscal years ending in the specified calendar year except for the few units whi close their fiscal years in the succeeding January.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series P 188–201") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

No. 388.—Fiscal Year Endings of State and Local Governments, by Month and by Type of Government

[Data chiefly as of 1945]

Type of government	Number of governments	Month in which fiscal year ends											
		Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Total	[1] 155,115	436	1,967	8,373	3,356	240	104,069	3,812	6,565	1,439	[redacted]	143	24,544

[1] Includes Federal Government and 48 State governments.
[2] Incorporated places having more than 2,500 inhabitants.
[3] The City and County of San Francisco in California and the City and County of Denver in Colorado are counted as cities and not as counties.
[4] Following counties are counted only as cities because they are wholly or very largely consolidated with cities indicated: Orleans Parish with New Orleans City; Suffolk County with Boston City; Bronx, Kings, New York, Queens, and Richmond Counties, with New York City; Philadelphia County with Philadelphia City.
[5] Counties not organized as local governments.
[6] County areas of Armstrong, Shannon, Todd, Washabaugh, and Washington are unorganized as counties and are attached for administrative purposes to neighboring counties.

[1] Omits revenue and expenditure of incorporated places having less than 2,500 inhabitants, school districts overlying such places, townships, and special districts.
[2] Not available
[3] A nonsegregable amount of capital outlay is included in "operation."
[4] Contains contributions to enterprises and to retirement and other trust funds for 1942. Other data refer only to contributions to retirement funds.
[5] Included in operation; amounts not separable.
[6] Comprises only school and highway grants; other grants included in "operation."
[7] Less than $500,000.
[8] Pension payments of city corporations and overlying local governments of cities having 30,000 inhabitants or more, originally included in "operation."

Long-term	89,771	71,387	[10] 18,384	3,104	15,314	1,911	9,167	221	1,575	2,440
Short-term	6,523	5,604	[10] 919	163	770	59	256	29	93	333
Net long-term	87,789	71,387	16,402	2,569	13,832	1,762	7,980	216	1,475	2,400

[1] Sources: Revenue, U. S. Treasury Department, Combined Statement of Receipts, Expenditures, and Balances of the U. S. Government, Fiscal Year Ended June 30, 1942, pp. 25–31; other data, special compilation by Bureau of Accounts, U. S. Treasury Department. Adjustments made in Federal data to conform to Bureau of Census classifications for reporting State and local government finances.

[2] Represents only those school districts classified by Census Bureau as independent units of government. School figures for other local governments are included with figures for those governments.

[3] Each of these Federal-State-local totals and State-and-local totals is less than the sum of amounts shown separately for the several components, because totals exclude duplicating intergovernmental fiscal aid.

[4] Included in "Earnings and miscellaneous."

[5] Omits $94 million for debt retirement reported by U. S. Treasury because payment is only nominally an expenditure and is not a charge against revenue.

[6] Included in "Other" public safety.

[7] Includes $21,111 million for war activities.

[8] Less than $0.5 million.

[9] For cities having populations over 100,000 only. Data for other local governments not available.

[10] Total is less than sum of "State" and "Local" because of exclusion of debts incurred by States for loans to local governments, which duplicate local government obligations held by States.

Source: Department of Commerce, Bureau of the Census; (Federal data) Governmental Finances in the U. S., 1942, and (State and local data) Revised Summary of State and Local Government Finances in 1942. Revisions published in 1948 reports on government finances.

No. 394.—Federal, State, and Local General Revenue, by Source: 1942 to 1949

[In millions of dollars. See also *Historical Statistics*, series P 138–192]

1949			[3] 1,800	1,760	3,749	1,138	954	1,528	150

[1] Excluding duplicating intergovernmental aid: Federal-State-local totals include no aid receipts; State-local totals include only aid received from Federal Government.

[2] Amounts, as derived from Treasury Dept. and Bureau of Budget sources, adjusted and arranged in accordance with Bureau of Census uniform classification of State and local government finances.

[3] Federal aid paid to State and local governments during its specified fiscal year, taken as being substantially equivalent to Federal aid received by such governments during their respective fiscal years in the absence of comprehensive post-1942 data as to aid received by local governments direct from Federal Government.

No. 395.—Federal, State, and Local Tax Revenue, by Type: 1942 to 1949

[1] Includes excess profits tax as well as normal tax and surtax; also includes unjust enrichment tax, prior to 1948.

[2] Includes those collections of railroad unemployment insurance tax credited directly to Railroad Retirement Board and shown in Budget of U. S. Government as trust account receipt.

[3] Computed on basis of estimated population (149,215,000) of continental United States, including armed forces overseas, as of July 1, 1949.

No. 398.—Summary of State and Local Government Finances, by State Area and Level of Government: 1942

[State-and-local aggregates of general revenue and general expenditure are less than the sum of "State" and "Local," because they exclude duplicating intergovernmental aid, i. e., that between State and local levels of government. Thus, both national and State-area aggregates for "Aid received" represent aid from only the Federal Government. See also *Historical Statistics*, series P 188–200, for total general revenue and total general expenditure of all State and local governments]

[In thousands of dollars]

No. 406.—Debt of State Governments Outstanding at End of Fiscal Year, by States: 1950

[**In thousands of dollars.** 1950 data are preliminary. Data are for State fiscal years ending on June 30, except for 6 States with earlier closing dates (in same calendar year—May 31 for Pa., March 31 for N. Y., and Wash.; in previous calendar year—Sept. 30 for Ala. and Wyo., Aug. 31 for Texas). For these States, gross debt as of June 30, 1950 was as follows: Ala., $49,073,000, N. Y., $919,466,000, Pa., $804,715,000, Texas, $55,454,000, Wash., $96,476,000, and Wyo., $2,934,000]

16. Banking and Finance

MONEY AND BANKING

Banking and monetary system.—Collection of banking and monetary statistics in the United States has been conditioned by the development of our banking and monetary system. Banks in this country are organized under the laws of both the States and the Federal government. "National" banks organized under Federal law, passed in 1863, are supervised by the Comptroller of the Currency, and State-chartered banks are supervised by officials of the respective States. The Federal Reserve System was established in 1914 to exercise central banking functions, some of which are shared with the United States Treasury. The Reserve System includes national banks and such State banks as voluntarily join the System. The Federal Deposit Insurance Corporation, established on January 1, 1934, insures each deposit account up to $10,000 in banks which are members of the Federal Reserve System and in such nonmember banks as join the insurance fund.

Condition of banks.—Statistics showing the condition of banks are collected by the various agencies responsible for the supervision of banks. Subdivision of the field among these agencies and the increasing adoption of practically uniform report schedules has made it possible for these agencies to compile the data with little duplication.

The Comptroller of the Currency, who has charge of the supervision of national banks, has collected condition reports since 1863 from these banks from three to six times annually and has tabulated and published summaries of these reports, showing the principal assets and liabilities, that is, total loans, United States Government securities, other securities, reserves, bankers' balances, interbank deposits, other demand deposits, and time deposits. National bank statistics are published in detail in the *Abstract of Reports of National Banks* (usually three times a year). The call report data are also published in the annual reports of the Comptroller although the detailed break-down of assets and liabilities is slightly different than in the abstracts.

After the Federal Reserve System was established in 1914, State bank members of the Federal Reserve System began to submit to the Federal Reserve banks their statements of condition at the same time and in substantially the same form as national banks. These have been consolidated by the Federal Reserve Board with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the Federal Reserve System, and are published in detail by the Board of Governors of the Federal Reserve System in the *Member Bank Call Report* (usually three times a year) and in summary form in the *Federal Reserve Bulletin*. *Banking and Monetary Statistics*, which was published in 1943 by the Board of Governors of the Federal Reserve System, makes available in one volume and on a uniform basis statistics of banking, monetary, and other financial developments. The statistics generally cover the period beginning with 1914.

Since the establishment of the Federal Deposit Insurance Corporation in 1934, insured banks not members of the Federal Reserve System have been reporting their condition for the end of June and December in the same manner as member banks, and consolidation of all these reports gives totals for all insured banks, which include nearly all commercial banks in the country. Beginning with June 30, 1947, a revised all-bank series is being tabulated twice a year by the Federal Deposit Insurance Corporation, replacing the three series previously compiled by the three Federal banking supervisory agencies. Data for noninsured banks are obtained largely through the cooperation of State banking officials. A monthly series, based on the

new all-bank series, is prepared and published by the Board of Governors of the Federa Reserve System.

Statistics of the Postal Savings System, which is under the management of th Post Office Department and which performs certain banking functions, are availabl monthly in the *Federal Reserve Bulletin* and annually in the *Report of Operations the Postal Savings System.*

Currency.—Currency, including coin and paper money, represents a relatively sma part of the total media of exchange in the United States, as most money payments a made by check. All currency is now issued by the Federal Reserve Banks and th Treasury.

"Currency in circulation" or "money in circulation" (official *Treasury Circulatio Statement*) refers to all coin and paper money outside the Treasury and Federa Reserve Banks, with the exception of gold and silver coin known to have been exporte and, beginning with January 31, 1934, all gold coin. It includes all coin and pape money held by the public in the United States whether in current active use or hel idle—also some currency which strictly speaking, is not a part of the money suppl in the hands of the public, that is, cash in vaults of commercial and savings bank currency lost or destroyed, and currency carried abroad by travelers and not appea ing in the official gold and silver export figures. The Federal Reserve Board derive a monthly figure for "currency outside banks" by subtracting from the Treasur "circulation" figure an amount representing vault cash held by commercial an mutual savings banks, and this figure more nearly approximates true circulatio Historical data on the stock of money and money in circulation may be found in th *Annual Report of the Secretary of the Treasury.*

Government credit agencies.—Except for the Federal land banks, Federal inte mediate credit banks, and a few other agencies, including the war emergency organiza tions, most of the credit agencies of the United States Government were created i 1932–34 to meet specific financial problems precipitated by the depression. At th present time, there are over 30 agencies, including the Reconstruction Finance Co poration, various agricultural lending institutions, insurance agencies, home mortgag and housing agencies, and certain agencies in liquidation.

There are several lending agencies which are part of, or are supervised by, th United States Department of Agriculture.

The Commodity Credit Corporation is the financial agency used in carrying ou price support, supply, and related activities of the Department of Agriculture. A one means of effectuating the price support program, the corporation makes non recourse loans to farmers, farm cooperatives and to some dealers and processors o farm commodities. Also it guarantees non-recourse loans for such purposes made b commercial banks and other institutions. Collateral for CCC loans are agricultura commodities which may be redeemed upon repayment of the loan.

The Rural Electrification Administration was established on May 11, 1935. I makes loans, with preference to nonprofit and cooperative organizations and to publi bodies, to cover full cost of constructing power lines and other electric facilities t serve persons in rural areas who are without central station electric service. In 194 the agency received authority to make loans to extend or improve rural telephon service. The Congress annually determines the amount of funds REA may lend.

The Farmers' Home Administration which was established in 1946 merged th functions of the Farm Security Administration and the Emergency Crop and Fee Loan Division of the Farm Credit Administration. The FHA is authorized to provid both long- and short-term credit for farmers who cannot get the loans they need a prevailing rates and terms in their communities from banks, cooperative lendin agencies, or other similiar sources. This agency is also authorized under certai

conditions to insure long-term farm mortgage loans made by private lenders. The amount of loans which FHA may make or insure is determined annually by Congress which appropriates funds for the direct loans.

The Farm Credit Administration supervises a system of lending institutions, the general purpose of which is to provide long- and short-term credit to farmers and farmers' cooperative associations on a sound credit basis through coordinated cooperative credit facilities. In contrast to other Federal credit agencies, for the most part this system does not lend Government funds; its lending operations are financed principally from the sale of securities of the land banks and intermediate credit banks in the investment market. The system at the end of December 1950 included 12 Federal land banks and 1,211 national farm loan associations which provide long-term farm mortgage credit, 12 production credit corporations which supervise 500 production credit associations making short-term loans, 13 banks for cooperatives which extend credit to farmers' cooperative associations, and 12 Federal intermediate credit banks which discount agricultural loans. Also, it includes the Federal Farm Mortgage Corporation which is servicing and liquidating the emergency farm mortgage loans made by the Land Bank Commissioner from 1933 to 1947.

Statistics on the principal assets and liabilities of Government credit agencies are published quarterly in the *Daily Statement of the United States Treasury*. Quarterly statements showing the assets and liabilities of Government corporations and sources and uses of funds for these agencies are published in the monthly *Treasury Bulletin*. Series of yearly, quarterly, and monthly statistics relating to operations of Government credit agencies are available also in the annual and other reports of individual agencies and the annual reports of the Secretary of the Treasury.

Private credit agencies other than banks.—In addition to commercial banks, savings banks, and Government credit agencies, there are a considerable number of other types of credit agencies in the United States. The most important of these are savings and loan associations, insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies. Statistics of savings and loan associations are collected by the Home Loan Bank Board. Statistics on loans, investments, cash, etc., of life insurance companies are collected and published principally by the Spectator Company, which also publishes statistics on other types of insurance. Federal credit unions are under the supervision of the Bureau of Federal Credit Unions of the Federal Security Agency and statistics on them are compiled and published by that organization. These data are combined with information on credit unions other than Federal by the Bureau of Labor Statistics and published in the *Monthly Labor Review*. (See tables 472 and 473.) Consumer credit statistics are published currently in the *Federal Reserve Bulletin*.

SECURITIES MARKETS AND CORPORATIONS

New issues and retirement of securities.—Current statistical information on new issues of securities has been provided for many years by the *Journal of Commerce* (since 1906), the *Commercial and Financial Chronicle* (since 1919) (see table 487) and the Standard and Poor's Corporation (since 1924). The statistics of the *Commercial and Financial Chronicle*, the most detailed and most widely used of the aforementioned series, include, in addition to domestic and foreign corporate issues and State and local government securities, the issues of independent agencies of the United States Government, and the issues of foreign governments and their subdivisions. The series does not include detailed information on the uses of the proceeds of new issues, showing totals only for refunding and all other purposes.

A more comprehensive series of new issues with detailed information on the intended uses of net proceeds has been compiled by the Securities and Exchange Commission on a monthly basis beginning with January 1934. (See tables 485 and 488.) This series is published monthly in the *Statistical Bulletin* of the Securities and Exchange Commission, the *Federal Reserve Bulletin*, and the *Survey of Current Business*.

In addition, the Commission has been compiling statistics since 1933 on the volum of retirements of corporate securities and changes in security holdings of institutiona groups and the public by type of issue. The Commission has been publishing dat on the cost of flotation of securities registered under the Securities Act of 1933.

Individuals' saving.—The Securities and Exchange Commission releases quarterl detailed estimates of individuals' saving showing the increase in certain selected asset held by individuals less the increase in their debt, exclusive of gains or losses fron revaluation of assets. In addition to total saving, these figures show the component contributing to it, such as changes in securities, cash, insurance, consumers' indebt edness, etc. A continuous series starting with 1940 is published quarterly in a specia release and in the Commission's *Statistical Bulletin.* (See table 445.) Annual estimate prior to 1940 were published in the *National Income Supplement to the Survey of Cur rent Business*, July 1947, and in the issue of September 1949. The Home Loan Banl Board compiles statistics on changes in selected types of individual long-term savings (See table 444.) The Board of Governors of the Federal Reserve System release annual data covering the distribution of liquid assets and positive, negative, and ne savings of families, by income groups. These estimates are based on the Board' Survey of Consumer Finances, a nation-wide interview survey of private households (See table 311, p. 265.)

Trading in securities.—(See tables 477, 480, 481, 483.) Monthly figures on th total value and volume of securities sold on each of the national securities exchange have been published since October 1934 by the Securities and Exchange Commission These figures, reported in connection with the fees paid under Section 31 of the Securi ties Exchange Act of 1934, include all sales effected on exchanges except, since Marc 1944, United States Government issues. They cover odd lots as well as round lots The Commission also publishes figures on the total daily volume of trading in stock on the New York Stock Exchange and the New York Curb Exchange, showing shor sales and several categories of member and nonmember purchases and sales.

Prior to 1934, the only available statistical data on the volume of trading in securi ties were the daily figures on the number of shares and the principal amount of bond reported sold on the New York Stock Exchange and on most of the other securitie exchanges. "Reported" volume of stock sales on the New York Stock Exchang represents sales in round lots reported on the ticker and does not include certain type of round-lot transactions such as stopped sales, private sales, split openings, cros transactions, and errors of omission which ordinarily amount to from five to ten per cent of total round-lot sales on the Exchange.

Security price averages.—(See table 476.) A number of indices of security price are published regularly. Among the most widely known are the Dow-Jones aver ages, which provide a continuous series of common stock prices on a daily basi since 1897. This series is now based on 65 common stocks divided into 30 industrial 20 railroad, and 15 public utility stocks. Indices of the Standard and Poor's Corp oration, available since 1918, are based on the Wednesday closing prices of approx imately 400 stocks. The Securities and Exchange Commission compiles an index o weekly closing prices of 265 stocks listed on the New York Stock Exchange, com prising 29 industry classifications. These indices are published in the Commission's *Statistical Bulletin.*

Liquid asset holdings of individuals and businesses.—The Board of Governors of the Federal Reserve System prepares annual estimates of the amount of currency demand deposits, time deposits, shares in savings and loan associations, and U. S Government securities held by individuals and businesses. Separate estimates are shown for financial and nonfinancial corporations, unincorporated businesses, other individuals, and trust fund holdings. The series, published in the *Federal Reserv Bulletin*, gives semi-annual figures from December 1939 to December 1946 and annua figures thereafter. (See table 446.)

INSURANCE

Insurance statistics.—There are no complete statistics of insurance for the United States as a whole. Individual States collect statistics on insurers operating within their respective jurisdictions; organizations representing certain classes of insurers, or of insurance, collect statistics for those classes; insurance publishers gather the only statistics approaching comprehensiveness. This situation arises primarily from the fact that the regulation of insurance and the collection of primary information on insurance are in the hands of the various States, Territories, and the District of Columbia. While insurance is now largely subject to Federal regulation, the Federal Government has not exercised its power nor has it taken any steps to collect comprehensive statistics of insurance on a national basis. Basic theory and practice are parallel throughout insurance, but application of theory and details of practice, including vocabulary, differ enormously by class of insurance and by class of insurer. Sound combination or comparison of figures is often difficult or impossible.

Types of insurance.—Insurance is traditionally classified as life, fire and marine, and casualty. With some overlapping between classes, an insurer is authorized to write insurance falling in one of these three classes, though there is now a tendency in the direction of permitting insurers, other than life, to write all kinds of insurance except life. *Life insurance* and *marine insurance* are each fairly homogeneous, the one having to do with life contingencies, and the other with losses connected with transportation. *Fire insurance*, as such, offers protection against loss by fire, but insurers in that business write several allied classes of insurance, principally against loss by windstorm, by damage to motor vehicles, by damage to aircraft, by sprinkler leakage, by earthquake, and by riot. *Casualty insurance* is a miscellaneous class, the principal subclasses of which are liability insurance (protecting against loss due to claims for damages) and workmen's compensation insurance (protecting an employer against loss due to his obligations under a workmen's compensation law). (See section 10, Social Security.) Casualty insurers also write several unrelated kinds of insurance, including fidelity and surety bonds.

Types of insurer.—The principal classes of insurer are stock companies and mutual companies or associations. Of less importance are fraternal insurers, reciprocal exchanges, Lloyds, State funds, and savings banks. *Stock companies* are corporations owned and controlled by stockholders, usually for the purpose of making profits. *Mutuals* are owned and controlled by insured members for the purpose of meeting their insurance needs at cost. *Fraternal insurers* emphasize social purposes as well as insurance; *reciprocal exchanges* are organizations of individual insureds operating through an attorney-in-fact; *Lloyds* are groups of individuals writing insurance in syndicates; *State funds* are insurers operated by individual States and are almost entirely devoted to writing workmen's compensation insurance either as exclusive insurers or in competition with private insurers; *savings banks* write life insurance in three States.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series N 172–178") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

No. 422.—Money Stock and Money in Circulation, by Kind, June 30: 1930 to 1950—Continued

[In thousands of dollars]

KIND	1930	1935	1940	1945	1948	1949	1950
Money in circulation, total	4,521,963	5,567,093	7,847,501	26,746,439	27,902,859	27,492,910	27,156,29
Gold coin [2]	357,236						
Gold certificates	994,841	117,167	66,793	52,064	45,158	42,565	40,77
Silver dollars	38,629	32,308	46,020	125,178	156,940	163,894	170,18
Silver certificates	386,915	701,474	1,581,602	1,860,689	2,060,869	2,060,852	2,177,25
Treasury notes of 1890	1,200	1,182	1,163	1,150	1,146	1,145	1,14
Subsidiary silver	281,231	295,773	384,187	788,283	918,691	939,568	964,70
Minor coin	117,438	125,125	108,977	291,996	348,112	355,316	360,89
United States notes	288,389	295,417	247,887	322,587	321,486	316,688	320,78
Federal Reserve notes	1,402,066	3,222,913	5,163,284	22,867,459	23,600,323	23,209,437	22,760,28
Federal Reserve Bank notes	3,206	81,470	22,373	527,001	353,499	308,821	273,79
National bank notes	650,779	704,263	165,155	120,012	99,236	92,524	86,48

[1] Totals involve duplication to extent that United States notes and Federal Reserve notes, included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 excluded, since they are complete duplications of equal amounts of gold or silver held as security therefor and included in totals.

[2] By proclamation of the president dated Jan. 31, 1934, weight of gold dollar reduced from 25.8 to 15 5/21 grains of gold, 0.9 fine. Hence, value of gold based on $35 per fine ounce beginning June 1934; theretofore, based on $20.67 per fine ounce.

[3] Gold Reserve Act of 1934, which was culmination of gold actions of 1933, vested in United States, title to all gold coin and gold bullion. Gold coin was withdrawn from circulation and formed into bars. Gold coin ($257,000,000) shown on Treasury records as being then outstanding was dropped from monthly circulation statement as of Jan. 31, 1934.

No. 423.—Bank Debits and Deposit Turnover: 1919 to 1950

[All figures in millions of dollars. Figures represent debits or charges on books of reporting member and nonmember banks of Federal Reserve System to deposit accounts of individuals, firms, and corporations, and of United States, State, county, and municipal governments, including debits to savings accounts, payments from trust accounts, and certificates of deposit paid. Excludes debits to accounts of other banks or in settlement of clearinghouse balances, payment of cashier's checks, charges to expense and miscellaneous accounts, corrections, and similar charges. See also *Historical Statistics*, series N 76–79]

No. 424.—Bank Clearings at Principal Cities: 1920 to 1950

[In millions of dollars. Comparability of figures for different years is affected by tendency toward consolidation of banks, eliminating former clearings between 2 or more banks. Debits to individual account (table 423) are a better measure of volume of payment. Cities listed in order of importance according to clearings in 1950. See also *Historical Statistics*, series N 86–89]

[1] Coinage of domestic gold coin discontinued in 1933.

No. 427.—Silver—Prices, Bullion Value, and Ratio to Gold: 1840 to 1949

[London price converted to basis of ounce 1.000 fine and converted to American money at par of exchange through 1930; from 1931 through 1944, at current rate of exchange; beginning 1945, (London price) reported on basis of ounce 0.999 fine and converted to American money at current rate of exchange. Commercial ratio computed on basis of London quotations through 1914; thereafter, on basis of New York average price. Beginning 1934 monetary value of gold is $35.00 per fine ounce, as against $20.67+ in previous years. Value of fine silver (371¼ grains) in dollar computed on basis of London quotations through 1917; thereafter, on basis of New York average price. See also *Historical Statistics*, series N 183–184, for data on commercial ratio to gold and value of silver in dollar]

[All figures, except "Commercial ratio to gold," expressed in dollars]

No. 428.—All Active Banks—Principal Assets and Liabilities, by Class of Banks: 1834 to 1949

[Includes banks in Alaska, Hawaii, Puerto Rico, Philippine Islands (through 1941), and beginning with 1935, those in Virgin Islands and with 1936, those in Canal Zone, Guam (except 1942-44), and American Samoa. Data for banks other than national for earlier years are not as of June 30 and are incomplete, especially through 1885. Figures for mutual savings banks include some stock savings banks for years prior to 1910 and also a few in several more recent years. Private banks are not included prior to 1890; statistics for private banks, except for 1935, cover only banks under State supervision and those voluntarily reporting; for 1935 they include also private banks which submitted reports to the Comptroller of the Currency under provisions of the Banking Act of 1933. See also *Historical Statistics*, series N 19-34, and N 43-48]

[1] Reciprocal interbank demand balances with banks in the U. S. are reported net, beginning 1942.
[2] Acceptances of other banks and bills of exchange or drafts sold with endorsements are excluded for national and State banks beginning with 1920 and for other banks beginning with 1929.
[3] Securities borrowed excluded for national banks beginning with 1933 and for other banks beginning with 1929. Not reported separately for prior years.
[4] Includes lawful reserve and exchanges for clearing house. Beginning 1936, excludes cash items not in process of collection.
[5] Beginning 1934, includes capital notes and debentures for banks other than national.
[6] Interest, taxes, and other expenses accrued and unpaid are excluded for national banks beginning with 1920 and for other banks beginning with 1929.
[7] Figures for national banks represent national bank circulation only; comparatively small amounts of State bank notes outstanding for 1870 to 1910, for which national banks converted from State banks or merged with State banks assumed liability, are not included in the figures for national banks or for all banks.
[8] Capital only.
[9] U. S. Government securities only.
[10] Includes State bank circulation outstanding.
[11] Includes loan and trust companies, and with some exceptions (see headnote), stock savings banks.
[12] Figures given under capital for 1935 include capital stock of one stock savings bank (see headnote).

[1] Beginning with 1942, taxes on net income, previously included in expenses, are reported separately, and recurring depreciation on banking-house furniture and fixtures, previously included in losses and charge-offs, is included in expenses.
[2] Includes interest on capital notes and debentures beginning 1933, when first issued.
[3] Prior to 1949, averages of amounts reported for every call date in year and final call date in preceding year. For 1949 averages of amounts reported for call dates at beginning, middle, and end of year were used, plus the last-Wednesday-of-the-month figures for the 10 intervening months.
[4] Not available on the 13-month basis used for all member banks.

[1] Both direct and guaranteed obligations.

[2] Prior to Dec. 31, 1935, excludes balances with private banks to extent that such balances were reported in "Other assets." Prior to Dec 31, 1933, excludes time balances with domestic banks which then amounted to $62,000,000 and which, prior to that time, were reported in "Other assets." Beginning June 30, 1942, excludes reciprocal bank balances which on Dec. 31, 1942, aggregated $513,000,000.

[3] Beginning with 1940, includes U. S. Treasurer's time deposits, open account.

[4] Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection and, prior to Dec. 31, 1935, less cash items reported on hand but not in process of collection.

[5] Central reserve city banks only.

[1] For rates for 1914 to 1921, see Statistical Abstract 1928, table 249; for 1922 to 1932, Statistical Abstract 1933, table 232; for 1933 and 1934, Statistical Abstract 1942, table 268. For rates on industrial advances authorized by sec. 13b of Federal Reserve Act, which are not shown in this table, see source.

[2] Rediscounts of notes, drafts, and bills eligible for discount under Federal Reserve Act, and advances secured by such paper, by direct obligations of U. S., by certain obligations guaranteed as to principal and interest by U. S., and by obligations of Federal intermediate credit banks maturing within 6 months.

[3] 1 percent on advances secured by Government obligations.

[4] ½ percent on advances secured by Government obligations maturing or callable in 1 year or less. This preferential rate eliminated in April and May 1946.

[5] Advances secured to satisfaction of Federal Reserve Bank.

[6] Rate of 2½ percent to other lenders (than banks) in effect until Apr. 11, 1942.

[7] Separate rate to banks eliminated.

No. 445.—Saving by Individuals in the United States: 1943 to 1950

[In billions of dollars. Includes unincorporated business savings of types specified but excludes corporate and Government saving. Current data are necessarily estimates and therefore subject to revision]

Type	1943	1944	1945	1946	1947	1948	1949	1950
Gross saving, total	+47.1	+49.8	+47.3	+33.6	+34.0	+35.6	+35.3	+45.
Liquid saving, total	+39.1	+41.6	+37.6	+12.9	+6.5	+4.3	+3.3	+2.
Currency and bank deposits	+16.2	+17.5	+19.1	+10.6	+2.0	−1.2	−1.2	+4.
Savings and loan associations	+.6	+.8	+1.1	+1.2	+1.2	+1.2	+1.4	+1.
Insurance and pension reserves	+6.8	+8.2	+8.6	+7.0	+7.1	+6.8	+5.9	+5.
Private insurance	+2.8	+3.2	+3.5	+3.4	+3.7	+3.5	+3.8	+4.
Government insurance	+3.9	+5.0	+5.1	+3.5	+3.4	+3.4	+2.1	+1.
Securities, total[1]	+13.9	+15.1	+9.9	+.7	+3.6	+4.0	+3.1	+1.
U. S. savings bonds	+11.1	+11.8	+6.9	+.9	+1.3	+2.1	+1.5	+.
Other U. S. Government[2]	+3.0	+3.9	+3.6	−.4	+.5	−1.0	−.4	−.
State and local government	−.1	−.1	−.2	−.4	+.4	+1.1	+.6	+.
Corporate and other	−.2	−.5	−.4	+.6	+1.0	+1.8	+1.3	+.
Liquidation of mortgage debt[3]	+.4	+.1	−.2	−3.2	−4.1	−4.1	−3.5	−3.
Liquidation of debt not elsewhere classified[4]	+1.3	−.2	−.8	−3.3	−3.4	−2.8	−2.3	−3.
Nonfarm dwellings[5]	+1.2	+1.0	+1.2	+4.1	+6.2	+8.5	+8.1	+12.
Other durable consumers' goods[6]	+6.8	+7.1	+8.5	+16.6	+21.4	+22.9	+23.8	+29.

[1] Does not include net purchases by brokers and dealers or other individuals financed by bank loans.

[2] Includes Armed Forces Leave bonds.

[3] Mortgage debt to institutions on one- to four-family nonfarm dwellings.

[4] Largely attributable to purchases of automobiles and other durable consumers' goods, although including some debt arising from purchases of consumption goods. Other segments of individuals' debt have been allocated to assets to which they pertain, viz., saving in savings and loan associations, insurance and securities.

[5] Construction of one- to four-family nonfarm dwellings less net acquisition of properties by nonindividuals. Also includes small amount of construction by nonprofit institutions.

[6] Consumer expenditures on durable goods as estimated by Department of Commerce.

Source: Securities and Exchange Commission; data are published quarterly in a special release and in the *Statistical Bulletin*.

[1] Excludes figures for banks, insurance companies, savings and loan associations, nonprofit associations, foreigners, and governmental bodies and agencies.

[2] Estimates of demand deposit balances as they would appear on the records of depositors. They differ from figures based on bank records such as given in regular banking statistics. Depositor-record estimates are lower than bank-record estimates; for example, total demand deposits as of Dec. 31, 1949 on a holder-record basis (see table) amounted to 63.8 billion dollars while on a bank-record basis these deposits amount to 77.9 billion.

[3] Private share capital in all operating savings and loan associations including private repurchasable shares, deposits, and investment certificates.

[4] Includes outstanding amounts of excess profits tax refund bonds beginning December 1945, as follows: 1945, $1,128 million; 1946, $29 million; 1947, $12 million; 1948, $7 million; 1949, $4 million. Armed forces leave bonds included beginning December 1947. Amount outstanding at time was $767 million. 1948, $464 million; 1949, $343 million.

[5] Includes real estate companies, finance and credit companies, insurance agencies (not carriers), investment trusts, security brokers and dealers, holding companies not otherwise classified, etc.

[6] Includes only amounts administered by corporate trustees.

[7] Includes holdings of farmers and professional persons.

raight average of market prices of all taxable bonds due or callable in 15 years and over.
ices derived from average yields on basis of a 4 percent 20-year bond based on Wednesday closing prices.
ased on composite of data (including industrial, utility, and railroad) and a conversion of yield indexes, based eld to maturity of each bond and assuming a 4 percent coupon with 20 years to maturity. From April 1937 te, prices are averages of weekly data for 17 A1+ bonds; from January 1929 to March 1937, data based on a ng group of A1+ bonds, one price monthly (first of month) being used.
ices derived from averages of median yields on noncallable high-grade stocks on basis of a $7 annual dividend.
from Board of Governors, Federal Reserve System.
ased on Wednesday's closing prices, or last preceding sale price; indexes weighted by number of shares of each outstanding in base period. Number of stocks represents number currently used; continuity of series not ed by change in number.
verages of daily closing figures. Changes have been made in stocks used at various times. However, the er of stocks has remained constant except for public utilities (see note 9).
or 20 stocks prior to June 2, 1938.
ased on prices end of month. 200 stocks used represent for the most part, an identical list, except in public y group, which is a continuous series composed of 24 electric utilities (representing combined holding and ting electric companies prior to 1942 and operating electric companies thereafter). Data for A. T. & T. Co., led in figures for 200 stocks; excluded from utilities in order to show more clearly the trend for electric operating anies.
cludes 15 bank and 10 insurance stocks and 1 public utility stock (see note 8).

rce: Department of Commerce, Office of Business Economics; Survey of Current Business, except as noted. original sources see table stub.)

No. 496.—Fire Losses, Total and Per Capita: 1876 to 1949

[**Amounts, except per capita, in thousands of dollars.** Continental United States only. Prior to 1916 figures are as compiled by the New York Journal of Commerce and include losses of $10,000 or over in the principal cities of the United States, adding 15 percent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being $214,531,000 as against $258,378,000) which cover all fires reported to the Actuarial Bureau Committee, adding 25 percent for unreported and uninsured losses prior to 1935 and 30 percent thereafter. Estimated fire losses are based on paid losses]

YEARLY AVERAGE OR YEAR	LOSS		YEAR	LOSS		YEAR	LOSS

17. Business Enterprise

Statistics in this section relate in general to the place and the behavior ... firm and business initiative in the American economy. More specifically, ... measures of and changes in business population, corporate assets and ... rtain types of business income and expenditure, and patents and copy-

... population and turnover.—These estimates of Office of Business Economics ... 500 and 501) are based on data from a number of sources, particularly ... the Census, Bureau of Internal Revenue, and Bureau of Old-Age and Sur... rance. A firm is defined here as a business organization under a single ... t and may include one or more plants or outlets; a firm doing business in ... one industry is counted only in that industry accounting for the highest ... of its total employment. A self-employed person is considered a firm only ... ther one or more employees or has an established place of business. This ... of business population differs from that of the Bureau of the Census which ... represents a count of establishments, i. e., manufacturing plants or retail

... number of new and discontinued businesses is estimated from tabulations ... by the Bureau of Old-Age and Survivors Insurance, which show the number ... ver identification numbers issued and canceled each quarter.

... s transfers represent purchases of going businesses, acquisitions of businesses ... h inheritance, transfers of businesses to a trustee or executor as well as changes ... form of business organization. The data are not directly comparable with those ... w firms and discontinuances.

...rmation on new incorporations is collected by Dun & Bradstreet and is available ...hly, by States, beginning in July 1945. The statistics include both completely ...businesses which are incorporated, and changes in existing businesses from the ...corporate to the corporate form of organization, the transfer of an existing corpora... to a new State, etc

...rporate assets and liabilities.—These data are from the Bureau of Internal Rev... and the Securities and Exchange Commission. In its annual report, *Statistics of ...me, Part 2*, the Bureau of Internal Revenue presents abbreviated balance sheet ... income account data for all United States corporations. In a quarterly release ...tled *Net Working Capital of U. S. Corporations*, the Securities and Exchange Com...sion publishes data on the net working capital position of all United States corpora..., exclusive of banks and insurance companies, showing the principal components ...urrent assets and liabilities

...orporation income, profits, dividends, and taxes.—The Bureau of Internal Rev..., the Office of Business Economics of the Department of Commerce, and the Board ...lovernors of the Federal Reserve System are the principal sources of statistics on ...e subjects. The statistics of these agencies overlap in many respects but are not ...parable because of differing purposes of compilation.

...orporation statistics based on income tax returns are published by the Bureau of ...rnal Revenue in the annual *Statistics of Income, Part 2.*

...orporate data of the Office of Business Economics are from statistics on national ...me and product which may be found in its *Survey of Current Business.* In par-

041°—51——29

ticular, see regular monthly issues of July 1950 and February 1951, and Nation Income Supplement of July 1947. These data are defined as required for purpos of national income estimation.

The primary sources of data for the Office of Business Economics estimates of profit taxes, dividends, and undistributed profits are the original corporate tax returns su mitted to the Bureau of Internal Revenue and summarized in the annual report *Statistics of Income, Part 2.* Various adjustments of the *Statistics of Income* da have been required by the national income treatment, particularly with respect depletion, capital gain or loss, and intercorporate dividends and because the origin corporate income statements do not represent the final stage of information. For d tails of these adjustments, see table 38 of the reports on national income and product i the *Survey of Current Business* July issue cited above. That table provides a reconcili tion between the national income profit series and those reported in *Statistics of Incom*

Unincorporated enterprises.—These data also are from the national income an product statistics of the Office of Business Economics. Net income of these enter prises is a composite income share. It includes return on proprietors' investment an risk, as well as return from proprietors' own labor and any labor contributed by pro prietors' families to the business.

Sources and uses of corporate funds.—These data indicate capital requirement of corporations and manner in which they are financed. Sources of funds should b equal to their uses. Certain discrepancies, however, apart from errors in estimatio interfere with this equality. These discrepancies are not particularly significan and are due to omission of such factors as (1) money accruing to corporations from a excess of sales over purchases of used plant and equipment (2) transactions in securi ties held as permanent investments except public offerings, and (3) the fact that ne new issues omit entrepreneurial capital for new corporations where no offering or sale of securities are made to the public or to institutions. Liquidation of such corporation is similarly not reflected.

Business sales and inventories.—These data include all companies, both corporat and noncorporate, major activities of which are in manufacturing or trade. Farm and other nonfarm businesses are not included. The manufacturing figures are th sum of (1) totals for corporations from Bureau of Internal Revenue *Statistics of Incom* data for 1939–47 and projections of 1947 figures by means of a representative sampl of manufacturing corporations for 1947–50, and (2) estimates for unincorporate enterprises projected, by means of sample data, back to 1939 and forward to 195 from benchmarks on sole proprietorships and partnerships from Bureau of Interna Revenue for the year 1947.

Retail and wholesale trade estimates are based on figures in 1939 Census of Busines carried forward by means of sample data, Bureau of Internal Revenue compilation and other information.

Net change in business inventories.—To ascertain net physical change in nonfar inventories, book values of beginning and ending inventories of each year are expresse in terms of constant base year prices by means of selected Bureau of Labor Statistic wholesale price indexes appropriate to each industry. Net increment in deflated boo value figures is then converted to a current price basis by index ratios of current price to base year prices. No inventory valuation adjustment is shown for farm inventorie because change in farm inventories is estimated (by Bureau of Agricultural Economics from physical quantity data.

.—Number of Firms in Operation, 1929 to 1949, and New and Discontinued Businesses, Transfers, and New Incorporations, 1944 to 1950

ds except new incorporations. Data are for continental United States. Excludes firms in agriculture, ishing and the professional services. New businesses include only firms which have been newly d; going concerns which have been purchased are considered business transfers. Discontinued busi-ude closures of all kinds without reference to reason for discontinuing—e. g., failure, retirement, illness tor, etc.]

from and payables to U S. Government exclude amounts offset against each other on corpora- amounts arising from subcontracting which are not directly due from or to U. S. Government.
rketable securities other than U S. Government.
942 includes provisions for renegotiation other than those combined with income tax liabilities.

rities and Exchange Commission; Statistical Series, Net Working Capital of U. S. Corporations. hed quarterly.

No. 504.—Corporation Receipts, Deductions, Profits, and Tax: 1925 to 194

[Includes data for Alaska, District of Columbia, and Hawaii; based on income tax returns as filed, prior to audi adjustments or other changes made after the returns were filed, as the result of carry-backs, relief granted unde section 722 of the Internal Revenue Code, recomputation of amortization of emergency facilities, or renegotiatio of war contracts. All corporations are required to file returns except those specifically exempt, such as mutual fraternal, civic, and charitable organizations not operating for profit. Returns of inactive corporations are ex cluded from these tabulations, except as noted. In comparing data over a period of years, changes in law mus be taken into consideration, especially discontinuance for 1934–41 of privilege of filing consolidated returns (excep by railroad corporations and their related holding or leasing companies and, in 1940–41, by Pan American trade corporations) and the restoration of this privilege in 1942. See source publications for effect of changes on stati tical items. Data represent combined totals for returns reporting net income and those reporting no ne income. For number of returns, see table 370, p. 327]

[In millions of dollars]

ITEM	1925	1930	1935	1940	1944	1945	1946	1947
Compiled receipts, total [1]	134,789	136,588	114,650	148,237	262,201	255,448	288,954	367,74

Cost of operations	(2)	(2)	9,190	12,297	24,312	22,666	23,273	28,20
Interest paid	3,617	4,861	3,261	2,701	2,288	2,308	2,251	2,50
Taxes paid [6]	(7)	2,297	2,628	4,317	5,965	5,585	5,831	6,80
Depreciation and depletion [8]	3,330	4,449	3,701	4,003	5,643	6,620	5,065	6,49
Other deductions	33,801	44,142	24,167	28,832	36,249	39,546	47,366	57,74
Compiled net profit or loss [9]	9,316	4,649	5,423	9,348	26,547	21,345	25,399	31,61
Net income or deficit [10]	7,621	1,551	1,696	8,919	26,304	21,139	25,193	31,42
Deduction due to net loss for prior year [11]	243	158	----------	123	149	114	140	18
Total tax [12]	1,170	712	735	2,549	14,884	10,795	8,875	10,90
Compiled net profit less total tax	8,146	3,937	4,688	6,800	11,663	10,551	16,524	20,63
Dividends paid:								
Cash	5,190	8,184	5,941	6,089	6,057	6,061	7,497	8,36
Stock	544	414	136	140	247	334	527	70

[1] Total compiled receipts consist of gross sales (less returns and allowances), gross receipts from operations (whe inventories are not an income-determining factor), all interest received on Government obligations (less amor izable bond premium), other interest, rents, royalties, excess of net short-term capital gain over net long-term cap tal loss, excess of net long-term capital gain over net short-term capital loss, net gain from sale or exchange property other than capital assets, dividends, and other taxable income. Total compiled receipts exclude no taxable income other than tax-exempt interest received on certain Government obligations.

[2] Not available.

[3] Beginning 1936, "Dividends from domestic corporations" are taxable income, tabulated with "other receipts.

[4] Beginning 1934, includes in addition to the wholly tax-exempt interest, that which is partially tax-exemp Interest on Treasury notes issued on or after Dec. 1, 1940, and obligations issued on or after Mar. 1, 1941, by th United States or any agency or instrumentality thereof, is wholly taxable and is included in "other receipts for 1941–47.

[5] Beginning 1936, includes contributions or gifts (limited to 5 percent of net income before this deduction).

[6] Excludes (1) Federal income tax and Federal excess-profits taxes; (2) estate, inheritance, legacy, successio and gift taxes; (3) income taxes paid to a foreign country or possession of United States, if any portion is claimed a tax credit; (4) taxes assessed against local benefits; (5) Federal taxes paid on tax-free covenant bonds; and (taxes reported in "Cost of goods sold" and "Cost of operations."

[7] Tabulated with "Other deductions."

[8] Includes amortization of emergency facilities for 1940 and later years.

[9] Compiled receipts less compiled deductions.

[10] Net income (or deficit), in general, represents taxable income less allowable deductions, except that for 19 and 1930, and for 1940–47, amount shown is before deduction due to net operationg loss of prior years.

[11] Deducted by corporations reporting net income.

[12] In addition to income tax, includes: declared value excess-profits tax, 1933–45; defense tax, 1940; and exce profits tax under provisions of Second Revenue Act of 1940, 1940–46.

No. 507.—Corporate Income Before Federal and State Income and Exces Profits Taxes, by Industry: 1943 to 1949

[In millions of dollars. Corporate income before taxes, as included in national income statistics, represent earnings of corporations organized for profit which accrue to residents of the Nation, measured before Feder and State profit taxes, without deduction of depletion charges and exclusive of capital gains and losses. Profit accruing to residents are measured by eliminating intercorporate dividends from profits of domestic corporation and by adding net receipts of dividends and branch profits from abroad. In other respects, definition of profit is in accordance with Federal income tax regulations. Corporate income before taxes is measured net of capit gains and losses, dividends received, renegotiation refunds, and accelerated emergency amortization charge but before deduction of depletion charges. Definition with respect to depletion charges has an important effec on data for mining industries]

No. 508.—Corporate Profits, Taxes and Dividends: 1939 to 1950

[In billions of dollars. These series are as presented in official national income statistics. Corporate profits figures represent earnings of corporations organized for profit which accrue to residents of the Nation. (See also headnote, table 507.) They are given both before and after Federal and State taxes on corporate earnings. Disbursement of tax refunds have been deducted from tax liability in year in which tax liability was incurred. Net corporate dividend payments represent amount of cash dividends disbursed to residents of the Nation, and therefore are measured after elimination of intercorporate dividends. Undistributed corporate profits comprise difference between corporate profits after taxes and net dividend payments. Quarterly data are seasonally adjusted at annual rates]

YEAR AND QUARTER	Profits before taxes	Income tax liability	Profits after taxes	Dividends	Undistributed profits
1939	6.5	1.5	5.0	3.8	1.2
1940	9.3	2.9	6.4	4.0	2.4
1941	17.2	7.8	9.4	4.5	4.9
1942	21.1	11.7	9.4	4.3	5.1
1943	25.1	14.4	10.6	4.5	6.2
1944	24.3	13.5	10.8	4.7	6.1
1945	19.7	11.2	8.5	4.7	3.8
1946	23.5	9.6	13.9	5.8	8.1
1947	30.5	11.9	18.5	6.6	12.0
1948	33.9	13.0	20.9	7.5	13.4
1949	27.6	10.6	17.0	7.8	9.2
1st quarter	28.3	10.9	17.4	7.9	9.5

No. 510.—Annual Sales, Profits, and Dividends of Large Manufacturing Corporations: 1940 to 1949

[In millions of dollars. Includes data for 200 corporations with assets of $10,000,000 and over. Asset classification is as of end of 1946. Profits before and after taxes are as published by the 200 companies except for certain adjustments, chiefly to exclude special charges and credits and intercorporate dividends where large. Series includes little or no representation of some important nondurable goods groups such as meatpacking, tobacco and rubber. Data not available before 1939]

No. 516.—Industrial and Commercial Failures—Number and Liabilities 1857 to 1950

[Excludes all railroad failures. Series revised beginning 1933 to exclude real estate and financial companies. Thes revisions bring failure record more nearly in accordance with type of concerns covered by "Total number c concerns in business," in which no changes were made. Beginning 1939, new series includes voluntary di continuances with loss to creditors and small concerns forced out of business with insufficient assets to cove all claims, in addition to failures included in former series]

YEAR OR YEARLY AVERAGE	Total number of concerns in business [1]	Number of failures	Current liabilities (1,000 dollars)	Average liability	YEAR OR YEARLY AVERAGE	Total number of concerns in business [1]	Number of failures	Current liabilities (1,000 dollars)	Average liability

No. 516.—Industrial and Commercial Failures—Number and Liabilities 1857 to 1950

[Excludes all railroad failures. Series revised beginning 1933 to exclude real estate and financial companies. Thes revisions bring failure record more nearly in accordance with type of concerns covered by "Total number c concerns in business," in which no changes were made. Beginning 1939, new series includes voluntary dis continuances with loss to creditors and small concerns forced out of business with insufficient assets to cove all claims, in addition to failures included in former series]

YEAR OR YEARLY AVERAGE	Total number of concerns in business [1]	Number of failures	Current liabilities (1,000 dollars)	Average liability	YEAR OR YEARLY AVERAGE	Total number of concerns in business [1]	Number of failures	Current liabilities (1,000 dollars)	Average liability

No. 517.—Industrial and Commercial Failures—Number and Liabilities, by Months: 1945 to 1950

[Liabilities in thousands of dollars. Current liabilities include all accounts and notes payable and all obligations whether in secured form or not, known to be held by banks, officers, affiliated companies, supplying companies or the Government. Deferred liabilities (the difference between current, as defined above, and the total) are therefore long-term obligations held by the public]

[1] Figures include patents for inventions, designs, and reissues of patents. Includes applications without fees from 1918 to date.
[2] Data are for period from July 28, 1836, to Dec. 31, 1850, except as otherwise specified.
[3] Data are for 11 years beginning 1840; records prior to this date are not available.
[4] Data are for 8 years beginning 1843.
[5] Data are for 13 years beginning 1838.
[6] Data are for the year 1870.
[7] Data are for 7 years beginning 1874.
[8] Registration of labels suspended from May 27, 1891, to June 9, 1896.
[9] Data are for 8 years; first print registered Mar. 7, 1893.
[10] Data are for the year 1926.
[11] Figures for 1940 are for the six-months period ended June 30, 1940. On July 1, 1940, jurisdiction of prints and labels was transferred to the Copyright Office, Library of Congress, and data concerning them are compiled by that organization. (See table 524.)
[12] Includes 150 trade-mark republications (under Trade-Mark Act of 1946) of trade-marks registered under prior acts for 1947; 19,730 for 1948; 12,983 for 1949; and 2,053 for 1950.

18. Communications

Statistics shown in this section include financial and operating data for telephon wire-telegraph, ocean-cable, and radio-telegraph carriers which render domestic ar foreign service, data on newspapers, periodicals, and books, and data on the post service. Also included are financial and statistical data relating to authorized standar (AM), FM and television radio broadcast stations and networks in the continents United States and possessions. Additional statistics on the communication industr as well as statistics on the number of telephones on farms, radios in occupied dwellin units, and the manufacture of communication equipment appear in other sections o this *Abstract*.

In the Census of Electrical Industries, the Bureau of the Census has compiled at 5-year intervals, beginning in 1902, reports on the telephone and telegraph industries covering all systems and lines. The last survey was made for the year 1937. Since the establishment of the Federal Communications Commission in 1934, statistical coverage of communications has been concentrated in that agency. Because of the intrastate character of many mutual, cooperative, and smaller commercial telephone companies, the Federal Communications Commission has not been able to continue the same coverage as shown in the Census of Electrical Industries. Where telephone data are presented by States, such information is incomplete to the extent that only the larger interstate carriers are represented. However, on an industry-wide basis, gross operating revenues of the telephone carriers reporting to the Commission are estimated to include approximately 95 percent of the operating revenues of all telephone carriers in the United States. Reports filed by radio broadcast stations and networks, wire-telegraph, ocean-cable, and radio-telegraph carriers cover substantially all domestically domiciled units in these industries which operate in the United States and its possessions or between the United States and foreign countries. Statistical data compiled from these reports are contained in *Statistics of the Communications Industry in the United States* and in the reports to the Congress of the United States, both of which are published annually by the Federal Communications Commission.

"Bell System" as referred to in this section, consists of the American Telephone & Telegraph Co. and its principal telephone subsidiaries. Data on the postal service obtained principally from the annual reports of the Postmaster General, are also included in this section.

No. 525.—American Telephone & Telegraph Co. and Principal Telephone Subsidiaries (Bell Telephone System)—Summary: 1925 to 1950

[Figures are as of December 31]

ITEM	1925	1930	1935	1940	1945	1949	1950
Telephones (thousands)	11,910	15,187	13,573	17,484	22,446	33,388	35,343
Central offices (number)	6,147	6,639	6,896	7,052	7,374	8,224	8,470

8.—Telephone Systems—Summary, Class A Carriers: 1926 to 1949

ss A telephone carriers filing annual reports with F. C. C. Class A carriers are those whose average perating revenues exceeded $100,000. Gross operating revenues of class A carriers (excluding inter- duplications of Bell System) reporting in 1937 represented approximately 94 percent of revenues of one carriers as reported for Census of Electrical Industries for that year. Figures include data for onsolidated and merged for which annual data are available]

[1] Pole and wire mileages reflect acquisition on Oct. 7, 1943, of facilities of Postal Telegraph Companies.
[2] Excludes agency and commission offices, numbering 12,470 on Dec. 31, 1950.
[3] Figures for 1915 and prior years represent net income before bond interest.
[4] Effective Jan. 1, 1943, the Federal Communications Commission prescribed a new system of accounts for telegraph carriers, and receipts and expenses as stated above for subsequent years are not fully comparable with results for prior years.
[5] Net income from current operations, before extraordinary adjustments of income applicable to prior years.
[6] Excludes controlled pole lines and wires no longer recorded in plant records.
[7] Deficit. [8] After extraordinary credits and charges.

[1] Excluding rural free delivery routes, ocean mail routes, and air-mail routes to foreign countries.
[2] Audited postal surplus or deficit which is greater or less than excess of receipts or expenditures by the amount of adjusted losses and contingencies.
[3] Domestic excludes and international includes foreign countries on domestic basis.
[4] Continental United States only. Data for years prior to 1926 are estimates.
[5] Postage stamps first issued under act of Mar. 3, 1847, and placed on sale at New York July 1, 1847.
[6] From Nov. 1, 1864, when money-order system first went into operation, to June 30, 1865.
[7] From Sept. 1, 1869, to June 30, 1870. International money orders first issued under convention of Oct. 12, 1867.

No. 544.—Postal Service Revenues, by Source: 1920 to 1949

[In thousands of dollars. For years ending June 30. See headnote, table 543]

Average rate of cost							
Per mile of length (dollars)	386.12	471.70	436.17	508.09	661.98	1,045.15	1,128.6
Per unit mile traveled (cents)	15.36	18.41	19.06	20.23	23.09	31.37	32.6
Per 60-foot car mile (cents)	39.31	45.70	45.40	44.31	44.01	54.34	53.9
Electric railway service:							
Number of routes	288	224	135	85	66	42	3
Length of routes (miles)	8,042	7,012	4,459	2,690	1,963	1,297	1,14
Annual travel of space units (thousand miles)	10,487	9,829	6,047	3,786	3,140	2,181	1,74
Annual rate of obligation (thousand dollars)	566	571	349	236	224	285	23
Average cost per unit mile traveled (cents)	5.39	5.81	5.77	6.24	7.13	13.06	13.7
Power boat service:							
Number of routes	284	265	196	175	146	134	13
Length of routes (miles)	49,791	40,130	21,043	19,613	8,701	8,034	8,30
Annual travel (thousand miles)	5,298	4,806	2,860	2,451	1,605	1,319	1,20
Annual rate of obligation (thousand dollars)	1,492	1,401	1,065	924	521	672	80
Average cost per mile traveled (cents)	28.16	29.15	37.95	37.71	34.64	50.93	62.5
Air mail service:							
Length of routes (miles)	2,665	14,907	28,894	37,943	56,849	130,093	155,31
Miles traveled with mail (thousands)	2,077	14,939	31,149	59,236	166,576	321,662	331,30
Mail carried (million pound-miles)	[5]	[5]	6,790	18,671	122,909	67,717	82,51
Cost of service (thousand dollars)	2,744	14,618	8,838	19,426	35,199	[4] 47,199	[4] 53,23
Average cost per mile (dollars)	1.32	0.98	0.28	0.33	0.21	0.15	0.1

[1] Annual expenditure (regular authorizations) represents estimated cost for transporting normal mail traffic over regular routes only, based on contracts outstanding at end of each fiscal year. Annual cost includes emergency and side and transfer service. Average rates based on regular authorizations.

[2] For expenditures for Railway Mail Service, see table 545.

[3] Includes 25 percent interim increase granted participating railroad companies under Railway Mail Pay Case, I. C. C. Docket No. 9200.

[4] Not computed. [5] Subject to revision.

Source of tables 545 and 546: Post Office Department, Annual Report of the Postmaster General.

47.—Delivery Service—City and Rural Free Delivery and Star-Route Service: 1870 to 1949

[note, table 543. Free city delivery was instituted in 1863; rural free delivery in 1897. Star routes are utes between towns which are let on a contract basis. Star route service in Alaska is not included here; r 1949 as follows: Number of routes, 34; length, 3,792 miles; annual travel, 230,011 miles; annual rate of ion, $60,012]

	CITY FREE DELIVERY			RURAL FREE DELIVERY				STAR ROUTES

19. Power

Energy for supplying mechanical power, heat, light and refrigeration for the complex machinery and processes necessary to maintain productivity and comfort in the United States is derived primarily from coal, oil, water, natural gas, wood and waste, wind, certain basic chemical and physical reactions, and the rays of the sun. Of these an increasing percentage of the coal, oil, water, and gas are being converted to electric energy for application to the energy requirements of our economic system. In 1949 approximately 23 percent of the coal, 8 percent of the oil, practically all of the water power, and 11 percent of the natural gas were consumed in the production of electric energy.

Statistics on these various sources of energy are compiled by numerous agencies but only a few of the series are reasonably complete or arranged to avoid duplication in a manner that permits ready computation of total energy requirements. Oil, coal, natural gas, and wood yield many products as well as power and, consequently, enter into many statistical series.

Data on coal, oil, and natural gas production, utilization, and related subjects are compiled annually by the Bureau of Mines and are published in the Minerals Yearbook. For summaries of statistical material from this source, see section 28, Mining and Mineral Products. Data on natural gas utilization and the production of manufactured gas from coal, oil, and related products, its utilization, and related statistics are published by the American Gas Association in its monthly bulletins and annual statistical numbers. Annual summary data are included in this section.

Data on the production of electric energy by type of prime mover and showing the quantities of basic fuels—coal, oil, natural gas, and others—used in production, and the capacity of all generating plants by type of prime mover and related statistics are compiled and published annually by the Federal Power Commission. These data cover both generation for public use by electric utilities and for use by the producer where generated by non-utility establishments. Data on sales, revenues, and customers by classes of service, on rates and typical bills, and related matters are also published by the Commission. Monthly statistics on production, fuels used in production, sales by classes of service, salaries and wages, taxes, and other costs are also published and distributed by the Federal Power Commission in a loose-leaf current data series known as Electric Power Statistics. Statistics on the distribution of electric energy by utilities for public use are presented monthly and annually by the Edison Electric Institute in its Statistical Bulletins. Summaries of these statistics appear in the following tables.

Data on the use of power by manufacturing, extracting, and related industries are issued from time to time by the Bureau of the Census in its Censuses of Manufactures and Mineral Industries. Statistics based on these studies appear in the sections on manufacturing and mineral industries in this Abstract. For the period 1939 to 1946, data on the use of electric power by major industry groups were compiled and published by the Federal Power Commission in a report on Industrial Electric Energy. This series has been discontinued, however, with 1946 the latest data available.

Over-all statistics on water as an actual and potential source of power are compiled by the Federal Power Commission and are shown in table 567.

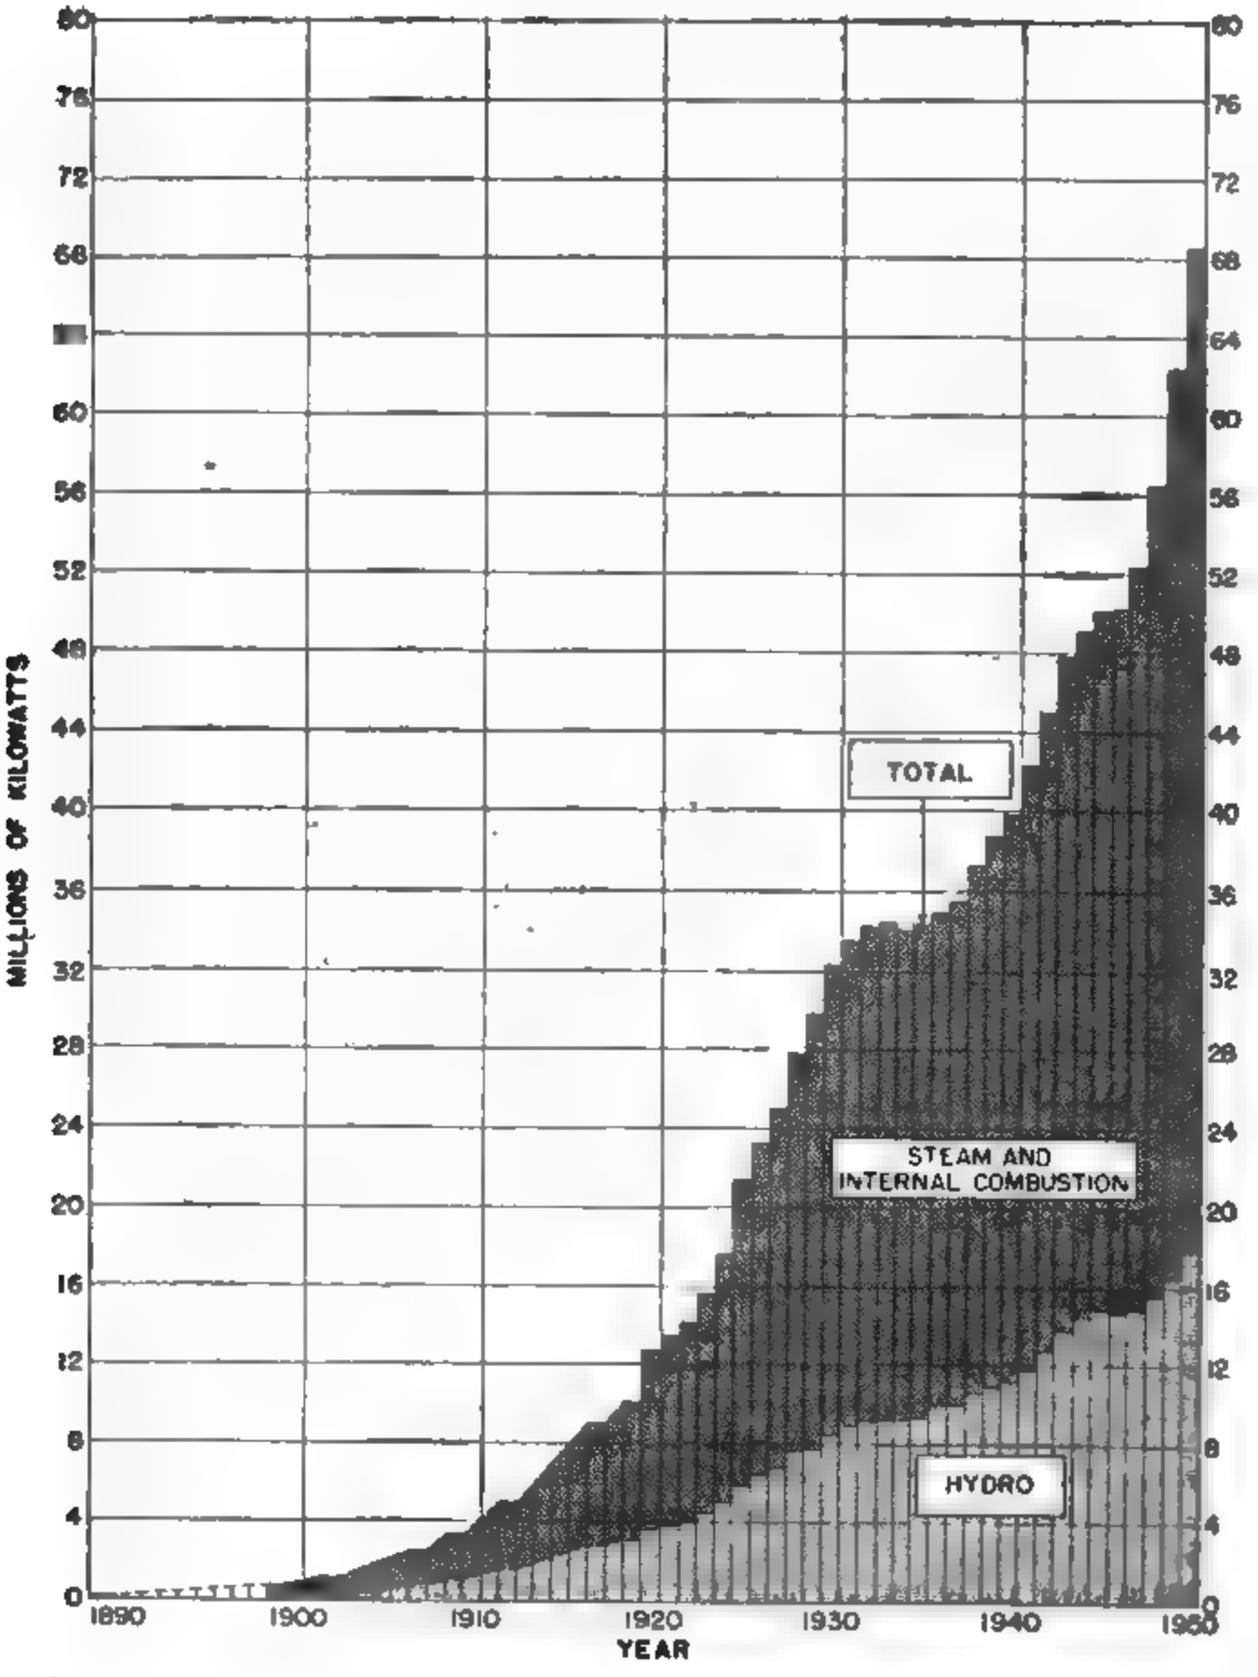
The Bureau of the Census in the Census of Electrical Industries compiled at five-year intervals beginning in 1902 a report on the Electric Light and Power Industry. The last survey made was for the year 1937. Summary statistics from this report are shown in table 555.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series G 159–170") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

Data in this section relate to continental United States except as indicated.

FIG. XXI.—INSTALLED CAPACITY OF ELECTRIC UTILITY GENERATING PLANTS IN T UNITED STATES: 1889 TO 1950

[See table 552]



Source: Federal Power Commission.

No. 550.—Energy from Mineral Fuels and Water Power—Annual Supply: 1889 to 1949

[In trillions of British thermal units. Unit heat values employed are: Anthracite, 12,700 B. t. u. per pound bituminous coal and lignite, 13,100 B. t. u. per pound; petroleum, 5,800,000 B. t. u. per barrel; natural gas, 1,07 B. t. u. per cubic foot. Water power includes installations owned by manufacturing plants and mines, as wel as Government- and privately-owned public utilities. Fuel equivalent of water power calculated from kilo watt-hours of power produced wherever available, as is true of all public-utility plants since 1919. Otherwise fuel equivalent calculated from reported horsepower of installed water wheels, assuming capacity factor of 20 per cent for manufacturers and mines and of 40 percent for public utilities. See also *Historical Statistics*, series G 159–170

[1] Assuming average central-station practice for each year; declined from about 7.05 pounds of coal per kilowatt hour in 1889 to 1.34 pounds in 1949.
[2] Not available. [3] Based on amount of coal displaced by gas, as estimated by gas companies.

Source: Department of Interior, Bureau of Mines; Minerals Yearbook. Preliminary data published in annua report, Bituminous Coal and Lignite.

No. 551.—Electric Utilities—Number of Electric Utility Supply Systems and Generating Plants, by Class of Ownership: 1922 to 1949

[Duplications of establishments operating in two or more States have been eliminated. Each type of prime move in combination generating plants counted separately; nonutility generating plants, approximately 4,500 in 1949, producing primarily for industrial use, are not included]

Dec. 31	Total, all classes	Privately owned	Publicly owned				
			Total	Municipal	Federal	Public utility districts and State projects	Cooperative

[1] Industrial classification comprises production and capacity of 3,578 industrial electric power plants of 1 kilowatts and over in 1949, including amounts for stationary electric power plants of railroads and railways.
[2] Each prime mover type in combination plants counted separately.
[3] Based on capacity in service at end of year.

[1] Less than 500,000.

Source: Federal Power Commission; based on annual report, Production of Electric Energy and Capacity Generating Plants, 1949.

No. 555.—Electric Light and Power Industry—Summary: 1902 to 1937

[Figures cover all establishments engaged either in generation and distribution of electric energy, or distribution or transmission of electric energy, to public or private consumers. Excludes establishments which consume all current generated, such as manufacturing and mining companies, railroads, railways, hotels, and other enterprises not in nature of public utilities, unless a portion of generated output was sold commercially. Plants operated by Federal Government or by States excluded unless energy sold commercially]

ITEM	1902	1912	1917	1922	1927	1932	1937
Number of reporting establishments,[1] total	3,620	5,221	6,542	6,855	4,236	3,420	3,501
Generating all or part of current	(2)	4,646	5,124	4,339	2,331	1,788	1,815
Distributing or transmitting only	(2)	575	1,418	1,906	2,004	1,641	1,686
Number of separate generating stations	(2)	(2)	5,952	5,444	4,801	4,339	[3] 4,022
Prime movers, hp. (thousands)	1,845	7,530	12,987	19,861	25,710	27,967	30,230
Steam engines	1,394	1,895	1,702	1,371	994	649	715
Steam turbines		3,054	6,747	12,355	24,323	23,904	23,177
Internal-combustion engines	12	111	310	303	548	881	1,101
Hydroturbines and water wheels	439	2,469	4,277	5,832	9,844	13,533	15,230
Generators, rated kilowatt capacity (thousands)	1,212	5,165	8,994	14,313	25,511	34,623	36,481
Output,[4] kilowatt-hours (millions)		14,183	31,044	50,274	96,529	111,716	168,300
Reported as generated	2,507	11,569	25,438	40,292	74,686	79,667	121,097
Reported as purchased or received from other sources	(2)	2,614	5,606	9,983	22,142	32,058	47,203
Number of customers (thousands)	(2)	3,838	7,179	12,710	21,790	23,862	27,216
Revenue from elec. service ($1,000)	[5] 84,187	[5] 267,139	[5] 502,060	[5] 1,020,439	1,802,655	1,975,304	2,356,512
Sales, kilowatt-hours (millions)	(2)	(2)	25,782	41,965	79,011	88,265	132,980
Distribution for other purposes (non-revenue), kilowatt-hours (millions)	(2)	(2)	(2)	(2)	17,817	23,451	35,370
Operating expenses, ($1,000) [6]	(2)	(2)	(2)	553,069	[7] 750,494	803,100	1,042,193
Value of electric utility plant ($1,000,000)	505	2,176	3,060	4,465	[8] 9,297	12,564	12,941
Employees, number	30,326	79,335	105,541	150,762	251,020	244,573	281,334
Salaries and wages ($1,000)	20,647	61,162	95,242	212,433	[7] 367,632	[7] 323,830	476,362

[1] The term "establishment" as here used may represent a single electric station (either generating or distributing or both) or a number of such stations operated under the same ownership. [2] Not available.
[3] Comprises 1,112 stations operated by steam; 1,283 by internal-combustion, 1,426 by water; and 206 composite (stations having more than 1 type of prime mover).
[4] Comprises generated output and energy purchased and received from other sources. Since the energy "Received from other sources" was, in a large part, purchased from other electric light and power companies, a considerable duplication is involved, as such energy would also be included in the "Generated."
[5] Includes "Estimated value of free service."
[6] Includes cost of fuel purchased and interchanged power, maintenance and other operating expenses.
[7] Reported by commercial establishments only. No data for municipal establishments.
[8] Includes value of plant and equipment, $902,000,000, owned by companies engaged in the operation of electric light and power plants and other public utilities, not distributed among the several utilities.
[9] Not comparable with other years; includes only salaries and wages chargeable to electric operating service.

By REA cooperatives [2]	----	----	517,500	1,051,000	1,533,894	1,921,160	2,343,730
Other public [3]	----	----	84,000	170,900	200,890	216,445	243,910
EASTERN FARMS [4]							
Number of customers (farms served), average	423,393	551,480	1,431,028	2,160,265	2,737,946	3,135,730	3,578,500
Sales, kilowatt-hours (1,000)	315,597	481,688	1,535,350	3,394,000	4,934,000	6,263,212	7,761,200
Revenue ($1,000)	22,166	26,832	66,525	124,309	168,159	206,727	252,602
Kilowatt-hours per customer	745	873	1,073	1,571	1,802	1,997	2,168
Annual bill, average	$52.37	$48.63	$46.46	$57.50	$61.45	$65.90	$70.71
Revenue per kilowatt-hour (cents)	7.03	5.57	4.33	3.66	3.41	3.30	3.25
WESTERN FARMS [4]							
Number of customers (farms served), average	189,661	213,406	413,989	637,600	838,993	966,096	1,128,460
Sales, kilowatt-hours (1,000)	1,473,195	1,210,710	1,620,000	2,514,000	4,040,000	5,130,110	6,080,400
Revenue ($1,000)	24,524	21,572	35,500	52,595	72,104	91,167	108,922
Kilowatt-hours per customer	7,768	5,673	4,396	3,943	4,815	5,310	5,389
Annual bill, average	$128.95	$100.98	$85.72	$82.41	$86.19	$94.52	$96.48
Revenue per kilowatt-hour (cents)	1.66	1.78	1.95	2.09	1.79	1.78	1.79

[1] Census figures; relate to Apr. 1 for 1930 and 1940 and Jan. 1 for 1935 and 1945.
[2] Represents cooperatives only and excludes customers of all other agencies (companies and municipals financed in whole or in part by REA.
[3] Customers served by municipal systems and various power districts not financed by REA.
[4] "Eastern farms" are those located in the area not affected by heavy irrigation pumping and their statistics are a measure of use of electricity on the average farm. "Western farms" are those where irrigation may be involved. Possibly less than one-fifth of farms in irrigation States do actual pumping, but statistics are not available to make a more accurate separation. Figures for "Western farms," therefore, are more a reflection of fluctuation in the energy used than they are of the conventional farm requirements.

Oil gas production	58	34	58	83	113	116	147	172	185

[1] Includes fuel used in production of manufactured gas during periods of peak demand or emergency only, for use in systems regularly distributing natural gas.
[2] Bench and producer fuel.
[3] Oven and retort charge.
[4] Less than 500 tons.
[5] Includes 9,000 tons used as oven and retort charge in 1946, 10,000 tons in 1947, 7,000 tons in 1948, and 5,000 tons in 1949.
[6] Includes 500,000 gallons used as bench and producer fuel.

No. 567.—Water Power—Developed, 1920 to 1949, and Estimated Undeveloped

[In thousands of kilowatts. Developed water power for 1949 and prior years represent rated kilowatt capacity of electric generators operated by actual installations of water wheels and turbines. Amounts prior to 1939 include generator capacities of electric utility plants only as generator capacities of industrial plants not generally available. 1939 and 1949 industrial figures not directly comparable, in many instances appear to be in close agreement. Water wheel and turbine capacity of industrial and miscellaneous plants, expressed in horsepower, and including mechanical drive plants (of 395,000 horsepower in 1939) not having electric generators were: 1921, 1,726,578; 1925, 1,750,323; 1930, 1,665,932, 1935, 1,929,404; 1939, 2,122,228]

Electric utility figures through 1939 based on report—Electric Power Statistics, 1920-40; industrial, 1939, based on Bureau of Census report—Power Equipment and Energy Consumption, 1939 Census of Manufactures. Developed water power, 1949, from annual report, Production of Electric Energy and Capacity of Generating Plants, 1949, and industrial electric power summaries.

20. Roads and Motor Vehicles

Public roads.—Federal Government statistics on public roads are compiled and published by the Bureau of Public Roads of the Department of Commerce. Since 1945, such data have been published annually in *Highway Statistics*. For statistics prior to 1945, the same Bureau's publication, *Highway Statistics, Summary to 1945* shows available public roads data carried back over periods ranging from 20 to 50 years.

The first road mileage survey was made in 1904. Other basic road mileage surveys were made in 1909, 1914, and 1921. Data for these early surveys appear in Department of Agriculture, Bulletin 1279, *Rural Highway Mileage, Income, and Expenditures, 1921–1922.*

The term "rural" as used in this section may be roughly defined as an area which lies outside of communities having 2,500 inhabitants or more. The statistics shown here, which are compiled on the basis of individual reports from the different States, are largely consistent in their adherence to this definition of rural. "Urban extensions" are continuations of designated State-system roads in or through cities or towns of 2,500 inhabitants or more. "County and other local roads" are those rural roads over which the State exercises no direct control.

Motor vehicles and fuel.—Motor-vehicle production data are compiled by the Automobile Manufacturers' Association and published in the annual report, *Automobile Facts and Figures.* The Bureau of the Census of the Department of Commerce compiles and publishes statistics on the motor-vehicles and equipment industry. These data are published in the reports of the Census of Manufactures, and are also included in Section 30 "Manufactures" in this volume.

Motor vehicle registration figures are based on reports and records of State motor vehicle registration departments. The statistics are compiled and published by the Bureau of Public Roads in the annual report, *Highway Statistics.* Statistics on motor fuel consumption are also compiled and published by the same agency in the report mentioned.

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series K 174–181") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945.* In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

No. 568.—Rural Roads in the United States—Approximate Mileage: 1921 to 1949

[In thousands of miles. Rural roads include roads outside of incorporated areas and certain of the more populous unincorporated areas. Figures cover continental U. S. and refer to existing mileage at end of calendar year. See also *Historical Statistics*, series K 174-181]

[1] No segregation of secondary State highways from primary systems in 1930; figures shown include an undetermined amount of municipal street mileage on State systems or connecting these systems. Not strictly comparable with subsequent years, since county road mileage had not yet been taken over by State highway departments.
[2] Not available.
[3] Low type includes soil-surfaced, gravel or stone, bituminous surface-treated, and mixed bituminous surfaces; high type includes bituminous penetration, bituminous concrete and sheet asphalt, Portland cement concrete, brick, and block.
[4] Includes funds transferred to or from local units. Data for D. C not included prior to 1940. Beginning 1940, includes proceeds of highway-user imposts allotted by the State treasurer for (1) county and other local roads and streets and for (2) nonhighway purposes.

[1] Low type includes soil-surfaced, slag, gravel or stone, and low-type bituminous; high type includes high-type bituminous, Portland cement concrete, brick and block.
[2] Includes only mileage of roads not forming a part of State or local highway systems.
[3] Includes 8,270 miles of State park, forest, institutional and other roads that are not part of State or local highway systems.
[4] Includes small amount of unsegregated urban mileage.
[5] State park, forest, and reservation roads not classified by surface type.
[6] County roads are under State control in Delaware, North Carolina, Virginia (all but three counties), and West Virginia.

No. 571.—Disbursements of State-Highway Funds, by States: 1921 to 1949

(Includes disbursements, whether from current revenues or proceeds of loans, for construction, maintenance, interest and principal payments on highway bonds, transfers to local units, and miscellaneous disbursements. Beginning 1935 covers calendar years; figures for earlier years for many States represent fiscal years. Beginning with 1940, figures not comparable with those for prior years as they include data for certain State income applicable to highways, namely, proceeds of highway-user imposts allotted, without passing through State highway departments, by State treasurer for (1) county and other local roads and streets and for (2) nonhighway purposes. These data not included in prior years)

[In thousands of dollars]

[1] Includes busses. A substantial part of the trucks and busses reported comprises chassis without body; hence value of bodies for these chassis not included. Includes military trucks; total sales for the period Sept. 1, 1939, through 1946, amounted to 2,575,000, valued at $5,257,588,000. Production for the period Jan. 1, 1940, through 1946 was 2,601,000.

[2] Beginning 1937, represents standard equipment.

[3] Prior to 1925, busses included with passenger cars.

[4] Less than 500.

[1] Excludes vehicles owned by military services.
[2] As reported. State registration requirements differ widely.
[3] Includes registration fees, certificates of title, transfer or registration fees, permits, fines, etc.; excludes motor-fuel and motor-carrier taxes, for California, includes $39,289,000 vehicle license fees and for Washington, $7,648,000 motor vehicle excise taxes.
[4] Includes fees for registration of automobiles (including taxicabs), busses, and trucks and tractor trucks.
[5] Commercial full trailers included with trucks.
[6] Includes fees for registration of trailers.
[7] Data for trucks under 1,500 pounds capacity included with automobiles.
[8] Data for taxicabs included with trucks.
[9] Includes 1,284 automobiles of the diplomatic corps.
[10] Represents publicly owned only. Heavy semitrailers registered with tractors (as a unit). Automobile trailers not required to register.

No. 580.—Number of Motor-Vehicle Accident Fatalities by Place of Accident, Place of Death, and Place of Residence: Reporting Area and Each Reporting State, 1948

[Based on special transcripts supplied through cooperation of State vital statistics offices and State traffic authorities in a reporting area which covered 47 States and the District of Columbia and represented 99.5 percent of population of United States. Reported fatalities represented about 99.8 percent of total motor-vehicle accident fatalities in United States in 1948]

21. Transportation, Air and Land—Steam and Electric Railways, Express Companies, Motor Busses, and Civil Aeronautics

Steam railways.—Because of the long period in which it has been subject to close Federal regulation and the degree of its consolidation, there is an extensive coverage of important statistical items relating to the railway industry. The *Statistics of Railways in the United States*, published annually by the Interstate Commerce Commission since 1888, is the most important source for steam railway statistics. Various other periodical reports are also issued by the Interstate Commerce Commission. The Association of American Railroads supplements official railway statistics with various releases.

The term "steam railways" as used in this section includes electrified divisions operated by such carriers. The total steam railroad mileage of the United States comprises: (a) Regular interstate carriers (and their nonoperating subsidiaries) reporting to the Interstate Commerce Commission; (b) switching and terminal railroads, also reporting to the Commission; and (c) private railroads (defined by the Commission as "circular" because they report on brief circulars and as "unofficial"). Except in certain mileage data the circular and unofficial companies are not included in any of the statistics. The switching and terminal roads were formerly included with operating railways, but are now separated, and data for them do not appear in most of the tables.

Nonoperating subsidiaries include proprietary companies, which are covered by the reports of operating carriers, and lessor companies which have no traffic and whose reports appear only in statistics of capitalization, dividends, and investment.

Operating railways are divided into three classes, according to the amount of their annual operating revenues, class I, having more than $1,000,000 of such revenue; class II, from $100,000 to $1,000,000; and class III, less than $100,000. During recent years more detailed reports are required from class I carriers than from smaller companies. The basis of the figures in each table is indicated by notes. Omission of class II and class III railroads affects very little the comparability of statistics with those of earlier years as regards most items, since the bulk of the business is done by class I.

The Interstate Commerce Commission divides railroads geographically into three districts and eight subsidiary regions. Each railroad is treated as a unit and placed wholly in some one district or region. Broadly speaking, the eastern district includes territory east of Chicago and north of the Ohio and Potomac Rivers; southern district territory east of the Mississippi River and south of the Ohio and Potomac Rivers; and western district, the remainder of the country.

Electric railways.—The Interstate Commerce Commission issues annually an abstract of the annual reports of electric railways, chiefly interurban, which report to it. The American Transit Association publishes street railway statistics in its annual *Transit Fact Book*. The Bureau of the Census has published a quinquennial report on electric railways from 1902 to 1937. . In the more recent years the report also covered affiliated trolley-bus and motor bus operations. The last Census of Electrical Industries was for the year 1937.

Motor carriers.—Statistics of class I for-hire carriers (those with $100,000 or more of gross annual operating revenues) are compiled by the Interstate Commerce Commission from annual and quarterly reports submitted to it by these carriers. This series begins with 1939 data.

The annual review and statistical number of *Bus Transportation*, a McGraw-Hill publication, summarizes operations of common carriers and school busses.

Civil aeronautics.—Federal promotion and regulation of civil aviation are carried out by two bodies—the Civil Aeronautics Administration and the Civil Aeronautics Board. The Civil Aeronautics Board is an independent agency concerned primarily with the issuance of certificates of public necessity, economic regulation, the formula

tion of safety regulations and the investigation of accidents to civil aircraft. The Civil Aeronautics Administration is an operating agency of the Department of Commerce. Its principal activities are the building and operation of air navigation aids, the enforcement of safety regulations and promotion of a national airport system.

The *Statistical Handbook of Civil Aviation* is published by the Civil Aeronautics Administration. This *Handbook* brings together all official statistical data on the development of civil aviation in the United States, including summaries of statistics published by the Civil Aeronautics Board in *Annual Airline Statistics*. The Civil Aeronautics Administration has also published a detailed historical record of America's aircraft production during the recent war. This publication is entitled *U. S. Military Aircraft Acceptances, 1940–45—Aircraft, Engine, and Propeller Production.*

Historical statistics.—In this section, tabular headnotes (as "See also *Historical Statistics*, series K 28–33") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. In that historical supplement to the *Statistical Abstract*, statistics are carried back year by year as far as possible. See also the historical appendix of the present issue of the *Abstract* for specific titles of series and the earliest year shown in the supplement.

No. 584.—Steam Railways—Mileage Owned and Mileage Operated: 1925 to 1949

[As of Dec. 31. See also *Historical Statistics*, series K 28–33]

[1] Includes circular and unofficial companies. [2] Includes lessors, proprietary, circular, and unofficial companies.
[3] For railways reporting track by class. [4] Includes switching and terminal companies except as noted.
[5] Since 1916 represents steam locomotives and freight cars of class I railways, excluding switching and terminal companies.
[6] Includes lessor companies since 1921; for 1925 and subsequent years, also includes proprietary companies except those which are part of systems filing consolidated annual reports.
[7] Increase in investment over a period of years cannot be obtained accurately by subtraction of 1 year's investment from that of another owing to reorganization, sale, or abandonment reclassification, etc.
[8] Includes depreciation on "Miscellaneous physical property" for years prior to 1920. Amortization of defense projects included subsequent to 1940.
[9] Includes actually outstanding, nominally issued, and nominally outstanding securities, and equipment obligations.
[10] Average for 1908–1910. [11] Average for 1899 and 1900.
